MEDIA DEVELOPMENT

Media and information literacy
A practical guidebook for trainers
2
Information and topics

You can download the guidelines and worksheets from this chapter here:
dw.com/akademie/mil-practical-guidebook-for-trainers
WORD SHEET

**Task**
Write a piece of information that you want to pass on in each square. It can be a name, a sentence, a tongue twister, or an interesting fact. Vary the length, complexity and how emotional or personal the information is. Cut out the squares.
Word of mouth

**TASK**

Cut out and fold the slips of paper in half and let the trainees pick the information they’ll quietly tell someone else.

| Chilean earthquake characteristics do not meet conditions necessary to generate a tsunami. |
| Protesters burned an American flag in front of the U.S. Embassy yesterday. |
| The nation grieves for five children who died in a traffic accident while on their way to school. |
| Youth should be in touch with their cultural roots. |
| Unbelievable! Justin Bieber lost 12 kilos in 15 days after he fell in love with his new girlfriend! |
| Color of the Year: Blue. Click here to buy the latest blue jeans! |
| Facebook has more than 1 billion users all over the world. Each user profile is worth money. |
| Teachers’ salaries should be high enough so they aren’t tempted to accept bribes. |
| In December 2004, a tsunami killed thousands in Southeast Asia. |
Weighing information

The “weighing information” method helps raise awareness for the quality of information. It makes trainees think about what quality criteria are important to them when dealing with information.

PREPARATION

Divide the classroom itself into three sections marked number 1, 2, and 3 and explain that each section represents an opinion regarding a criterion for information quality:

1. I consider this somewhat important.
2. I consider this very important.
3. I consider this essential.

You can use the criteria mentioned in the following worksheet (page 43), have the trainees think of other quality criteria, or use a combination of both.
Weighing information: Quality criteria

**TASK**

Read the quality criteria aloud. If you prefer to have trainees read the criteria aloud, cut out slips of paper or use cards for the different criteria, fold them in half and let trainees draw the one they will read.

Once a quality criterion is read aloud, trainees decide how important it is to them personally. They rate each criterion on the scale of 1 to 3 by physically going to the corresponding section of the room (see page 42).

On individual index cards, write down a key word for each criterion and the number of points it received, and pin or tape the cards to the wall.

Add up the points for each criterion (i.e. the number of trainees in that section) to show how important this criterion is to the group.

The group then briefly reflects on and discusses the various ratings and the degree of personal importance:

- Why did you rate this quality criterion as you did?
- Can you give an example from national media to support your rating?

At the end, sort the index cards according to the number of points each criterion received, going from the least important to the most important. If you like, analyze and discuss the results with the group.

---

The information answers the question: **What** has happened to **whom**?

The information answers the question: **Why** has something happened?

The information answers the question: **Where** has it happened and **when**?

The information answers the question: What will the **consequences** be?

The information is delivered in **simple** and **comprehensible language**.

The information describes the **reality** as accurately as possible.

The information describes something that has **relevance** for me and my life.

The information refers to a **current event**.

The information cites **reliable sources**.

The information doesn’t include **advertising**.

The information doesn’t try to **influence** my **point of view**.

The information provides an overview of **several perspectives**.

The information provides an **objective** image of what has happened.

The information doesn’t contain **misinformation** and **prejudices**.
Channels of information 1 — government press

Examples:

1. What kind of information can you find there?

2. What are typical issues? Mark those that are important to you.

3. How is the information produced? What is the presumed objective of the media maker?

4. Search for an example and check the quality of the information.
Channels of information 2 — private press (commercial)

Examples:

1. What kind of information can you find there?

2. What are typical issues? Mark those that are important to you.

3. How is the information produced? What is the presumed objective of the media maker?

4. Search for an example and check the quality of the information.
Channels of information 3 — news agencies

Examples:

1. What kind of information can you find there?

2. What are typical issues? Mark those that are important to you.

3. How is the information produced? What is the presumed objective of the media maker?

4. Search for an example and check the quality of the information.
Channels of information 4 — independent press

Examples:

1. What kind of information can you find there?

2. What are typical issues? Mark those that are important to you.

3. How is the information produced? What is the presumed objective of the media maker?

4. Search for an example and check the quality of the information.
Channels of information 5 — social media, Web 2.0

Examples:

1. What kind of information can you find there?

2. What are typical issues? Mark those that are important to you.

3. How is the information produced? What is the presumed objective of the media maker?

4. Search for an example and check the quality of the information.
Channels of information 6 — talking to people (firsthand)

Examples:

1. What kind of information can you find there?

2. What are typical issues? Mark those that are important to you.

3. How is the information produced? What is the presumed objective of the media maker?

4. Search for an example and check the quality of the information.
Preparation a press conference

This group represents:

TASK

Prepare for the press conference in two steps.

1. Pretend to be journalists and prepare some questions to assess the quality and topics covered by the information sources represented by the other groups.

2. Now prepare some answers for when you represent an information source yourself and have to answer questions from the journalists.
Cut out letters, words and headlines from old newspapers and magazines. Reassemble them to form headlines for your stories. Glue them onto the paper.

Combine your headlines with photos that you have cut out of newspapers and magazines or that you have taken yourself. Glue them to your wall newspaper as well.

Add a few sentences explaining your topics:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
News and categories

**TASK**
Read the definition and discuss the most important words from the definition:

**News is media-communicated information on selected current events.**

Information is often categorized and structured by media makers (printed and online newspapers, TV and radio stations).

**TASK**
Think of different categories and write them in the empty blocks. Mark your five favorite categories with a star. Next to the blocks, write down one example of news that fits each category.
News: Brief, initial inquiry

Now it’s time for the initial inquiry: basic research into current national or international events in various categories.

**TASK**

Research different media sources if they are available. Use newspapers, TV news (apps on cell phones), radio news (apps on cell phones), the Internet, and social media. Scan the media for current events and select those with high significance.

Don’t forget the target audience. Don’t get too detailed; basic information is enough. Take notes and write the information sources down in the table as well.

<table>
<thead>
<tr>
<th>Category</th>
<th>Basic Information</th>

Broadcast structure

**TASK**

Hold an editorial meeting to determine the topics to be covered. Real media broadcasts have at least one additional person who works only on the time schedule, structure, and organization of the broadcast.

How the broadcast in this exercise is structured depends on the number of trainees and groups. There should be at least five different topics from the various news categories, and the total broadcast should last from five to ten minutes. Set a fixed length for each report.

**VISUALIZATION**

Draw the structure of the broadcast on a flip chart and visualize the number of reports, the sequence, the topics and categories, the duration of each report, and the names of the presenters. Also write down other responsibilities as needed.

**PRESENTATION**

You can choose to have an additional presenter to introduce the reports or just let the groups read their reports out loud like in a radio broadcast. Record just audio or with video using a camera or cell phone.

<table>
<thead>
<tr>
<th>#</th>
<th>Topic</th>
<th>Category</th>
<th>Presenter</th>
<th>Duration</th>
<th>Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Protests in Hong Kong</td>

</table>
Research and news writing

**TASK**
Research your current event and write down key words. Use different sources of information, compare and verify them. Don’t just collect basic information, but also information about different viewpoints and the causes and possible consequences of the event. Remember to stay objective and investigate various points of view and sources.

**TASK**
Now write your news report in your own words. First, structure your information. Keep the two parts in mind, the lead (who, what, when, where, why and how) and the body with additional information, explanations, and statements. Measure the time that you need to read the report aloud and keep to the allotted time. Try to figure out how many sentences are possible and report as much information as possible in the given amount of time.
DW Akademie

DW Akademie is Germany’s leading organization for media development and Deutsche Welle’s center of excellence for education and knowledge transfer. As a strategic partner of Germany’s Federal Ministry for Economic Cooperation and Development we strengthen the universal human rights of free expression, education, and access to information.
