## Reaching for the Stars

On 20 July 2019, exactly 50 years will have passed since the first man set foot on the moon. To this day, only the United States has completed successful manned missions there. They sealed its victory over the then Soviet Union in the Space Race, which had begun in the mid-1950s between the two Cold War superpowers. In the early years, however, the Soviet Union had been in the lead: In 1957 Sputnik 1 became the first satellite to go into orbit around the Earth; in 1961 Yuri Gagarin became the first person to travel into space. That rivalry has since given way to co-operation. The International Space Station is a project run by the space agencies of the US, Russia, Europe, Japan and Canada. Scientists from around the world come together up there to conduct experiments.

### **Apollo Astronauts – The Best of the Best**

Neil Armstrong was the first man to set foot on the moon in 1969. Only 11 other astronauts followed in those footsteps until the end of US moon missions in 1972. How were those fortunate few actually selected?

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, IFE, LR

**264898 002**

### **The Centerpiece of the Apollo Missions – The Saturn V Rocket**

The centerpiece of the Apollo missions was the gigantic Saturn V rocket. Without it, there would have been no flights to the moon. Its development was masterminded by Wernher von Braun from Germany. He led a team of more than 200,000 scientists and engineers.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, IFE, LR

**264898 003**

### **Is There Life Beyond Earth? – Exploring Our Solar System**

Scientists are looking for evidence or even proof that there is or has been life elsewhere in the cosmos. They believe missions to Mars and to the moons of Jupiter and Saturn will help them in their quest.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, IFE, LR

**264898 004**

### **Our Link to the Stars – Cosmic Rays**

Life on Earth owes its existence to the stars. And scientists believe that these stars continue to exert an influence on us – through cosmic rays. Research facilities all over the world are exploring just how they affect us and our environment, as well as how they facilitated life in the vastness of the universe.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, IFE, LR

**264898 005**

### **Living in Space – Fantasy or Imminent Reality?**

Manned space flights are expensive and, despite all the technological advances, they are still dangerous. Could it nonetheless be the case that one day people will head off into space not just to conduct scientific research but to settle on other planets?

**Documentary, 30 min.**, 2018, 4K; Arabic, English, Spanish; VoD, M, LR

**264898 006**

### **Aeronautics – What's the Point?**

Aeronautics may be very expensive, but it is proving very useful. For example, satellites monitor Earth's landmasses and oceans, making it possible to identify changes swiftly. They provide evidence that climate change is a reality and that it is caused by humans.

**Documentary, 30 min.**, 2018, 4K; Arabic, English, Spanish; VoD, M, LR

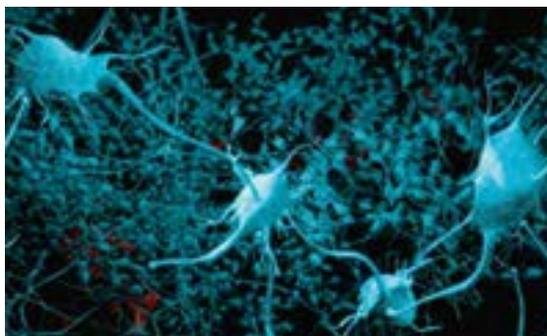

**264898 007**

### **Space Junk – Long Ignored, Now a Major Threat**

Debris has been accumulating in space for decades now – old satellites and bits of rockets, for example. All that junk represents a serious and growing risk to spacecraft and satellites. But the responsible agencies on Earth have been slow to face up to the problem, let alone develop ways to clean up space and mitigate the risk.

**Documentary, 30 min.**, 2018, 4K; Arabic, English, Spanish; VoD, M, LR

## The Human Miracle

The human heart pumps 8,000 liters of blood around the body every day. Human eyes can differentiate between more than seven million colors. Human skin has thousands of sensors that detect sensations and relay information to the brain. The human brain can store the same amount of information as 20,000 dictionaries. All these statistics show that the human body is quite rightly regarded as a miracle. And not all human capabilities can be expressed in numbers.

**264781 001**

### **Little Conquerors – How Babies Discover the World**

In the first three to four years of their lives, children accomplish incredible feats of learning. They set out to explore and conquer the world. They aim to make contact with their counterparts from the first moment. Children are naturally inquisitive, and learning is an almost automatic process – providing they grow up in a stimulating environment in which they feel safe. For a long time, scientists thought conscious communication only began with language. But pre-linguistic contact with the world is the very first stage of all communication and learning.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264781 002**

### **The Ego... What is it?**

Is human consciousness just a neurochemical process? If so, what does that mean for the idea of free will or the human subject or self? Does modern brain research show that it is not the self that decides what we think and want, but rather chemical and physical processes in the neurons? Some philosophers reject such theories. They point to the impact that consciousness can have on the nervous system, for example in the case of the placebo effect.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264781 003**

### **How Our Muscles Influence Our Lives**

Until now, the 640 muscles in the human body were viewed as components of a highly complex system, but also as passive command receptors. But new research shows that the fibers play a much more important role. Muscles emit a large number of transmitters, most of which have not yet been properly analyzed, and communicate with other organs.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264781 005**

### **What Makes Some of Us Strong?**

Why does one person emerge stronger from a crisis, and another cracks under the strain? Why do some people know how to turn failure to their advantage, while others do not? The capacity to cope successfully with stressful situations such as failure, misfortune and emergencies is what researchers call resilience. But where does such strength come from? Is it something we are born with, or can we acquire it through learning?

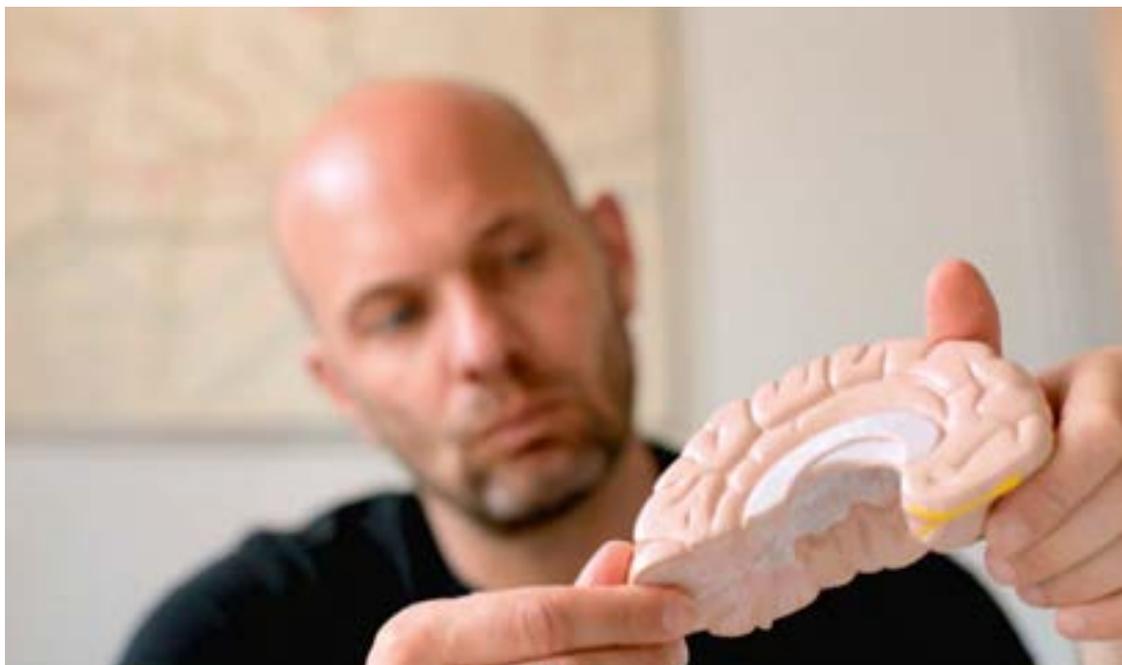

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264781 006**

### **The Secret of Healing Powers**

A baby is born and survives that doctors think does not stand a chance. A paralyzed cellist returns to the concert stage, even though that is said to be out of the question after four brain operations. Both recoveries were only possible because doctors were prepared, alongside modern medicine, to put their faith in the power of self-healing.

**Documentary, 30 min.**, 2011, HD; Arabic, English, Spanish; LR

## The Mysteries of the Brain

The brain is the nerve center of the human body. It is the point where all information from the body and its environment is collected and processed into reactions and memories. Everything we think, say or do is controlled by the brain, as are processes that occur without our conscious input, such as understanding what we are seeing or hearing, feeling joy or fear, or recognizing danger. Researching the workings of the human brain is an even greater scientific challenge than decoding the human genome.

#### The Brain Pacemaker

Deep brain stimulation is a treatment that can provide therapeutic benefits to people who have Parkinson's. The method involves placing electrodes at the heart of the afflicted region of the brain via a small hole drilled in the skull. These electrodes restore order to neural activity via electrical pulses. They are connected to a pulse generator implanted below the clavicle or in the abdomen via insulated wires that run beneath the skin.

**Documentary, 30 min.,** 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

### 264762 002

#### How We Learn

The brain never stops learning. It is probably more flexible than we ever imagined. Experiments have shown that when it comes to absorbing information and making decisions, young people are not always at an advantage. Evidence that evolution has programmed the brain to learn is provided by its own internal reward system: learning makes you happy and content, right through to an advanced age.

**Documentary, 30 min.,** 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

### 264762 003

#### Nerve Center for Movement

We need our brain to think and learn. But it is also responsible for controlling our movements. We learn to control our movements through the cerebral cortex. Later, when those movements have become so automatic that we execute them without having to think about them, other regions of the brain take over. But it is not just a case of the brain affecting our movements, movement itself also has an influence on the performance of the brain.

**Documentary, 30 min.,** 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

### 264762 004

#### Understanding Pain

Increasing numbers of people suffer from chronic pain. Latest studies show that such pain is an acquired behavioral pattern, like a program that has been stored by the brain. And once a pain memory has affected the nervous system, it is not easily erased, even with medication.

**Documentary, 30 min.,** 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

264762 005

**Sleep as a Source of Energy**

We need seven to eight hours of sleep every day. Sleep can have an enormous impact on our quality of life. If you have slept well, you are likely to be active, receptive and healthy. And regular, adequate sleep appears to be especially important for the brain. The reasons for this have not been fully explained, but experiments show that when we do not get enough sleep, our memory capacity is greatly reduced.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

264762 006

**Conquering Fear**

Fear is an instinctive protective mechanism, which is often activated without our conscious input. For example, we jump to the side when a car gets too close. This instinctive reaction is key to our survival. Fear can result in high performance, during an examination for example, but it can also leave you paralyzed. The situation becomes critical when fear gets so out of control that it suddenly turns into panic. Scientists are exploring ways to conquer fear.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

264762 007

**What Makes a Person Evil?**

Violent crime often leaves us speechless with incomprehension. How are such deeds committed? What occurs in the minds of the perpetrators? Are the mechanisms that trigger such actions similar in all those who carry them out, or are they very different? Neuroscientists have found some surprising answers to these questions.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

264762 008

**Doping for the Brain**

In a bid to enhance their performance in various activities, many people use prescription drugs developed to treat health problems. That holds not only for physical performance but also for mental functioning. But does 'brain doping' really help? What is certain is that it has negative side effects and can inflict long-term damage.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

264762 009

**Invisible, But Highly Effective: Our Thoughts**

We can use our thoughts to control devices and move artificial limbs. Our thoughts even have the power to heal disease. But what are thoughts? Mere brain waves, or something more? The latest neurological research shows that thoughts and feelings belong together, that they influence each other and cannot be understood independently of each other.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD; LR

264762 010

**Neuromarketing – Tracking Our Decisions**

How does a person decide what to spend money on? Do commercials influence behavior? When do ads elicit the intended response, when are they ignored? Neuromarketing deploys psychological and neurological research to answer such questions. For the advertising industry and its clients, the answers are of huge significance and value in developing new strategies.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

264762 011

**How Scientists Manipulate Our Memories**

Scientists are looking for ways to erase terrible, distressing memories in order to help people overcome crippling fear. Neuroscientists have discovered that a certain enzyme is involved in longterm fear memories and are seeking to control its activity. Might this mean a ray of hope for traumatized people? Or is it a risky path for society to take?

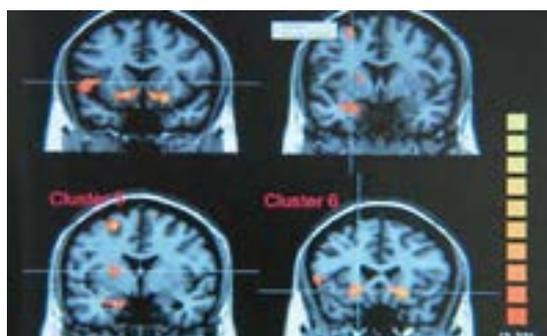

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

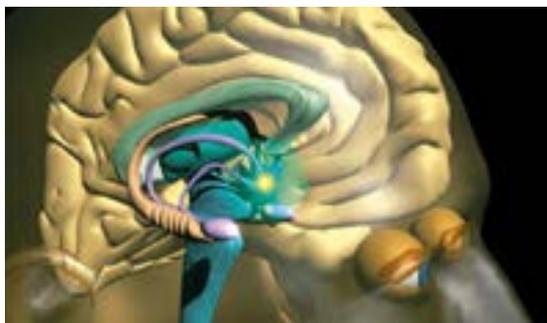

264762 012

**Puberty – The Brain's State of Emergency**

Puberty is often a challenging time in a family's life; for both parents and the youngsters themselves. During this phase of growing up, boys and girls watch their bodies change and experience accompanying mood swings. They have to accept that their childhood is coming to an end and that they're maturing into young men and women. Puberty begins in the head. This is because certain zones of the brain give the green light for an interplay of hormones that fundamentally alters the body.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, IFE, LR

264762 013

#### **Criminality – Controlled by the Brain?**

Sometimes, after someone has broken the law, he or she might say, “I don’t even know why I did it.” We tend to think that is just an excuse because we humans are in fact always in charge of our actions. But neurologists see it differently. Not only have they discovered that this assessment is way off the mark, they have also found out why some people commit serious crimes. These findings are forcing society and the judiciary to rethink how to call criminals to account and punish them; but also how to help them find their way back to leading a normal life again.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, IFE, LR

264762 014

#### **Always On Duty – When the Brain Needs a Break**

Our information society – packed as it is with smart-phones, tablets and computers – is making ever-greater demands on our brains. Time pressure and too much work can make people ill. Studies show that multi-tasking is ineffective and inefficient: The more tasks someone takes on, the slower he or she becomes and the more prone to making mistakes. Have we reached the point where our brain can no longer process the information coming its way? The answer is yes, say some neurologists, sociologists and IT experts. They recommend: Rebuild your attention span, take breaks, and insist on the right to turn off digital devices. Some go a step further and say: Rather than us adapting to the devices, it’s the devices that should be adapted to our needs.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, LR

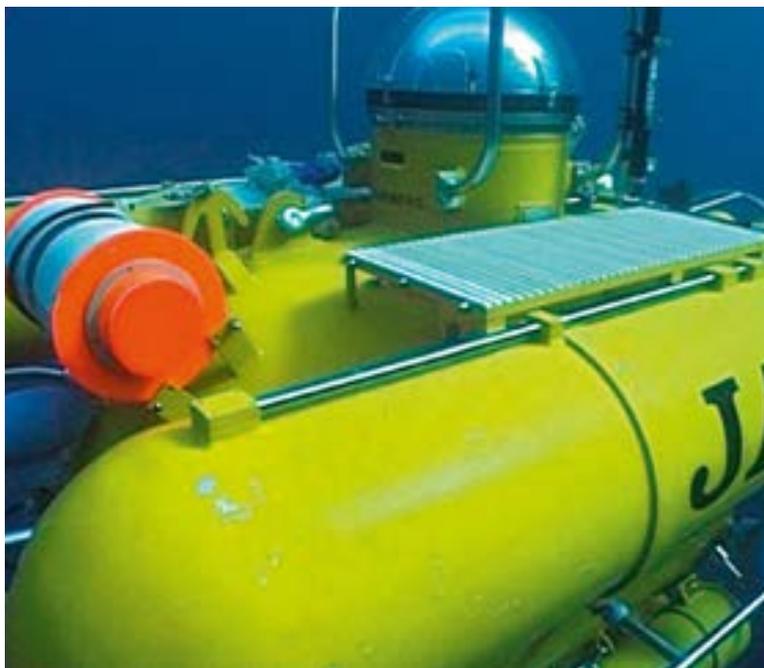

264762 015

#### **Hypnosis – What’s Happening in the Brain?**

Doctors and psychologists are deploying hypnosis to try to alleviate pain or treat ailments where no organic cause can be determined. Studies have shown that a lower dose of anesthetics is required if a patient has been hypnotized before undergoing surgery. Thanks to modern imaging techniques and major advances in neurology, scientists are also now able to show how the human brain works under hypnosis.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, LR

## Science on the Seven Seas

The oceans are the last great unknowns on our planet. We know less about them than we do about the moon. There are many reasons why researchers are making a concerted effort to gather information about the world's oceans. Concerns include the safety of global shipping traffic, the protection of marine plants and animals, and the search for natural resources. Comprehensive data are urgently needed if ocean resources are to be managed sustainably. And there is much to suggest that the oceans play a key role in the causes and consequences of climate change. Science on the Seven Seas reports on research projects about the mysteries of the deep.

**264749 001**

### **Ice from the Depths – The Search for Gas Hydrate**

Methane hydrate is an icy compound of the highly potent greenhouse gas methane. There are significant deposits of the substance under the ocean floor. An expedition led by the marine geologist Gerhard Bohrmann is carrying out research into methane hydrate as a potential source of energy – but also as a substance that could exacerbate global warming.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; IFE, LR

**264749 003**

### **Treacherous Giants – Iceberg Research in Canada**

Twenty to forty thousand icebergs calve every year from the glaciers of Greenland. One in ten of them then drifts onto one of the world's most important shipping routes. Scientists from the Canadian Institute for Ocean Technology are working on an iceberg early warning system and looking for ways to protect ships from the floating giants.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**264749 004**

### **Dangerous Beauties – The Mysterious World of the Jellyfish**

Jellyfish reside in all ocean waters, from coastal regions to the deepest seas. Their life-cycle is characterized by extreme transformations. And although some species of jellyfish number among the seas' most deadly inhabitants, their sheer variety and beauty are a source of fascination. Jellyfish are effective hunters and an important food for many marine animals. Zoologist Gerhard Jarms has been investigating the jellyfish for years.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264749 005**

### **Teeming with Life – The Coral Sea off New Guinea**

The Raja Ampat archipelago is located off the coast of New Guinea. Its waters contain a greater variety of species than the entire Caribbean. An international team of scientists has set out to explore this unique habitat and find out what has caused this huge variety of flora and fauna. They say Raja Ampat must be protected as a world heritage site.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264749 006**

### **Hidden Giants – Seamounts in the Atlantic**

Seamounts are the huge, largely unexplored mountains that rise up from the ocean floor. Some peaks extend beyond the surface of the water and create islands, others almost reach the surface and create areas of relatively shallow water right in the middle of the ocean. The slopes of these seamounts are home to unique ecosystems. European scientists are taking a closer look.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264749 007**

### **Intelligent Monsters – The Giant Octopus of the North Pacific**

Contrary to popular belief, the octopus is a sensitive, adaptable and highly intelligent creature. Biologist Karen Palmer is searching for new insights into these eight-armed cephalopods in the sea around Vancouver Island off the Canadian Pacific coast.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264749 009**

**Baltic Bottleneck – Research in the Cadet Channel**

The shipping channel between Germany's Fischland-Darss-Zingst peninsula and Denmark's Falster Island could be described as the Baltic Sea highway. Every day some 200 vessels struggle through the bottleneck, which is tricky to navigate. Known as the Cadet Channel, the waterway also accommodates researchers looking for sunken ships and studying the marine habitat in order to try to prevent further accidents.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264749 010**

**Simple Survivors – Facts About Sponges**

Phylogenetically speaking, sponges are ancient life forms with a very simple structure. This makes their inner workings and characteristics all the more interesting. Scientists believe that some sponges can live for 10,000 years. Some contain glass fibers more sophisticated than any industrially-produced optical fibers. And they form substances that could revolutionise both medicine and technology.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

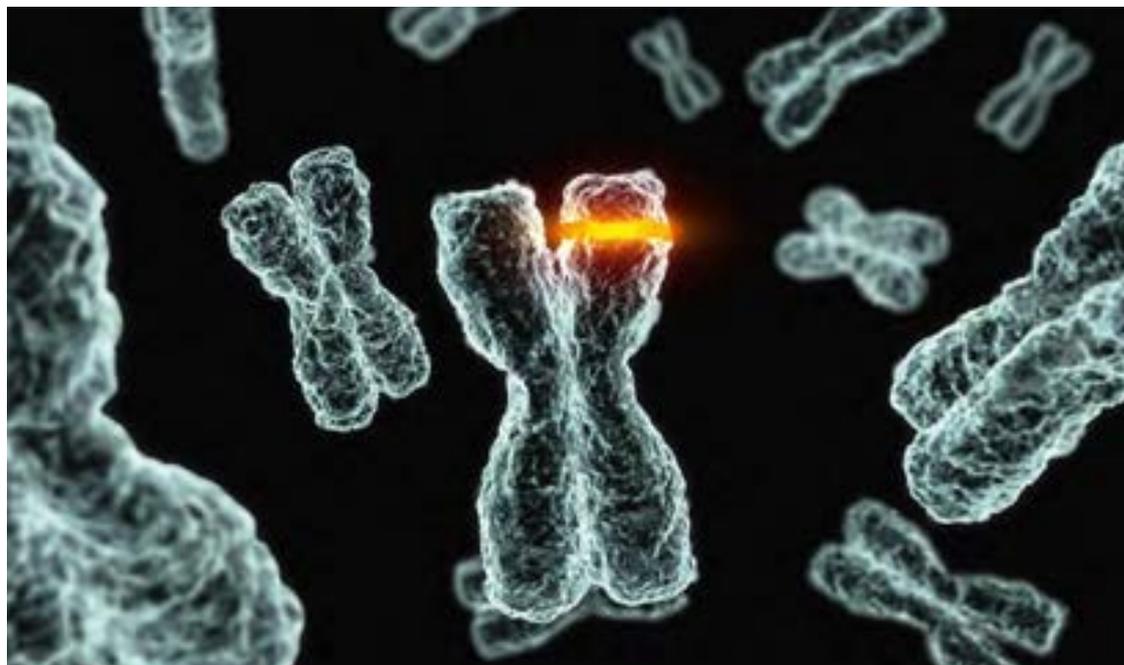

**264749 012**

**Safety on the High Seas – Surviving an Emergency**

Seafaring is safer than ever, but ships still get into difficulties on a daily basis. Scientists and engineers are working on ways to ensure optimal safety conditions for crews and passengers out at sea. How can ship construction contribute to better safety? And how can rescue facilities be improved? And if a vessel is in trouble, how can the people onboard be evacuated rapidly and in an organized fashion?

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

## Foresight

Mankind has always dreamed of being able to see into the future. Scientists try to create things that others might regard as pie in the sky. For example, innovative medical procedures or new industrial materials, intelligent communication technology or revolutionary approaches to environmental conservation. All this is only possible if researchers are independent and creative, and if they have the courage to break new ground. But how much of the research being carried out into futuristic projects is science, and how much of it is fiction? What methods are employed? What are the positive and negative aspects of trying to anticipate the future?

**264724 008**

### Motorized Farming – The Next Agricultural Revolution

They sow seeds, pull up weeds and spread fertilizer. It is hoped that small farming robots will one day be able to work completely autonomously and carry out all the jobs that need to be done out in the fields. Researchers all over the world are working on high-tech solutions to one of the most urgent problems facing humanity: To produce enough food as the world's population continues to grow.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264724 009**

### Supersonic Race

In four-and-a-half hours from Europe to Australia. It may sound like pie in the sky, but it may soon become a reality, with a supersonic plane currently being developed by engineers in England. And they are not alone. Researchers in other parts of the world are also working on ideas to usher in a new era of civilian flight. Their common aim is not just to make air travel even more rapid, but also profitable and environmentally friendly.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264724 010**

### Mega Metropolis – Architecture as Selling Point

Cities are growing in many parts of the world. They compete on an international level for investments and labor. Architecture can become a key factor in location appraisal, as well as an expression of a globalized working environment. But does urban planning on such a gigantic scale necessarily lead to fresh economic momentum?

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264724 011**

### 21st Century Sport – Performance-Enhancing Technology

Technical equipment in top-level sport is gaining in importance. Research institutes are continually developing new materials and devices to help athletes break records and win medals. Using examples from the world of winter sports, we demonstrate how even small changes in equipment can mean the difference between victory and defeat.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**264724 012****The Food of Tomorrow**

Researchers and inventors are at work in laboratories and trial kitchens to develop the foodstuffs of tomorrow. Technically speaking, there are few limits. German scientists have for example succeeded in manufacturing a fat-free sausage – something food technologists had thus far deemed to be impossible. But are these new foodstuffs also effective in counteracting diet-related illnesses?

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264724 013****Mankind 3.0 – The Future of Information**

Modern man produces and consumes a vast amount of data around the clock. And in the face of such a tremendous tide of information, he is dependent on the services of data providers and communicators. But just how reliable are service providers in the electronic sphere? Do we have everything under control – or are we under control? How will we use information in the future, and what kind of information will it be?

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264724 015****The Synthetic Materials of Tomorrow**

Today's world would be inconceivable without synthetic materials such as plastic. But crude oil as the basis for most plastics is finite, and non-degradable materials represent a huge environmental problem. So scientists are busy developing bioplastics made out of vegetable matter.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

**264724 019****The Hunt for Genetic Treasure**

Genetic researchers worldwide are searching for the key to illnesses such as cancer, Alzheimer's and Parkinson's. They assemble their insights and clues as to the origins of these diseases like pieces of a giant puzzle. It might eventually be possible to simply switch off defective genes that cause diseases.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

**264724 020****The Textiles of the Future**

Intelligent materials that supply the skin with pharmaceutical products, protective vests with air conditioning or textile sensors that monitor bodily functions – scientists and the textile industry are working hard to design the clothing of tomorrow, often with health or safety benefits.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**264724 021****The Vision of a New Factory**

The factory of the future should be efficient, use renewable energy sources and have zero emissions. This is not just a utopian vision. Around the world, thousands of research teams are developing manufacturing technologies that make both economic and ecological sense.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; VoD, LR

**264724 022****How 3D Printing is Changing Our World**

Economists expect 3D printing will trigger a new industrial revolution. The technology is already used to manufacture all kinds of components. And just as music and books can be downloaded from the Internet, in future consumers will be able to print replacement parts at home.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**264724 023**

#### **Small Hydropower Stations, Big Future**

Hydropower plants supply clean energy. But large-scale projects often have major drawbacks of an ecological, financial or technical nature. So researchers are looking for ways to make small hydropower plants efficient and affordable.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**264724 024**

#### **Multi-Talented Algae**

Algae are miracles of versatility: They absorb CO<sup>2</sup> from the atmosphere, they can be used as food and as fertilizer, are deployed in cancer research and promise to become a viable alternative to fossil fuels. Researchers are only just beginning to explore the vast potential of these organisms.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**264724 025**

#### **Refuse as a Key Resource**

Our cities generate treasure – concealed in garbage. Rare metals and other scarce materials can be found in old cell phones and cars, but also in derelict buildings. Extracting these materials presents scientists and engineers with a challenge.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**264724 026**

#### **New Momentum for Trade Vessels**

International shipping blasts close to a billion tonnes of carbon dioxide into the air every year, as well as toxic grime and dust. Some studies claim that air pollution from shipping is responsible for up to 50,000 premature deaths per year in Europe alone. Austrian captain Andreas Lackner has joined forces with naval architects to develop a low-emissions sail-powered freighter: a wind-propelled hybrid ship that will only have to switch on its engines when it's dead calm out on the water.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

## The Quest for Knowledge

Humans have always had a thirst for knowledge – whether it be to improve their lives and circumstances or out of sheer curiosity and the urge to get to the bottom of things. Without scientific discoveries, humanity would not have evolved at such a rapid pace. Life as we know it today would be unthinkable without the knowledge we gain through science and scholarship. Innovations and new insights are integrated into our lives in ever quicker succession. We watch scientists, engineers and inventors as they look for ways to increase human knowledge. These fascinating films accompany them in their Quest for Knowledge.

### **Making Artificial Blood – The Race is On**

Scientists, research labs and pharmaceutical companies are currently vying with one another to become the first to create the first fully synthetic blood. The need is immense: This film relates the background to the pursuit of “tailormade blood”, detailing both the positive and negative aspects of the process, the complexity and potential of blood, and the consequences of blood manipulation for the human body.

**264700 007**

### **Ice Recession in the Alps**

Global warming is not only affecting expanses of ice that are clearly visible, like the glaciers. The invisible ice of the mountains – the permafrost on peaks and in rock faces – is also receding, with dramatic consequences. This documentary accompanies researchers as they penetrate the interior of mountains to find out more about permafrost. A race against time has begun.

**264700 008**

### **Is Wind Energy Still Viable?**

Advocates and opponents are quite vocal about this regenerative form of energy. But that is not surprising, because wind energy has a lot to offer: for engineers, architects, and biologists.

**264700 009**

### **The Cyberhand – Giving Amputees a Sense of Touch**

In this film a patient tests the cyberhand, as it is known, for the first time. Unlike other artificial limbs, this neuroprosthesis is controlled not by electrical impulses from the muscles but directly by the nerves which control muscular contraction. The cyberhand is designed not only to serve the wearer as a gripping tool but also to impart a sense of touch.

**264700 010**

### **Does Water Live?**

Water is the element of life. Without H<sub>2</sub>O there would be no plants, no animals, and no micro-organisms. But could the elixir of life itself be alive? Can water store information? It is not only esoteric thinkers who believe that there is far more to water than has been thought.

**Documentary, 30 min.**, 2008, SD; Arabic, English, French, Spanish; LR

**264700 011**

### **Surviving in the Mountains – Altitude Sickness**

Climbers, skiers, and hikers are often plagued by the symptoms of altitude sickness which can result in fatal highaltitude cerebral or pulmonary oedema. Professor Peter Bärtsch from Heidelberg University is an internationally renowned expert on acute mountain sickness. His aim is to identify the exact causes of the condition and the best way of treating it.

**Israel's Water Shortage – The Dead Sea is Dying**

The Promised Land is also an arid land. The shortage of fresh water has been a problem in Israel now for several decades. Modern-day Israel consumes some two billion cubic meters of water every year. Roughly two-thirds of this volume are pumped into agriculture. Water is a precious resource and, to a certain extent, lies at the heart of Israel's conflict with its neighboring states and with the Palestinians. Desalination plants and droplet irrigation will, it is hoped, provide a solution to the problem.

264700 013

**The Hunt for Our Thoughts**

Our thoughts are free and, above all, private. At least that has been the belief up to now. But the time, it seems, has come to revise that belief, because brain researchers can now read our thoughts and identify our intentions, and even manipulate them. This new science can be helpful. But it also involves certain risks.

264700 014

**The Enigma of the Lightning Strike**

Millions of lightning bolts hit the Earth every day. But we know very little about them. At temperatures of up to 30,000 °C nothing can match them for heat; they pack millions of volts and can carry thousands of amps of direct current. Scientists in the US and Germany are attempting to cast new light on the process that creates lightning.

264700 015

**Expedition to the Bleeding Lake**

Lake Alat in southern Germany may not appear to be anything special – but descend 16 meters below the surface and you will see a deadly purple-colored cloud. This is a layer of sulphur-processing bacteria. There is no oxygen below this layer, and the water is extremely acidic. An expedition takes a closer look at the causes of this unique natural phenomenon.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

264700 016

**The Secret Reserves of Top Athletes**

“Faster, higher, further” is the motto of world-class sport. But in many disciplines, the unremitting drive to break records appears to be exceeding the limits of human capacity. The last reserves of sportsmen and women are mobilized by the latest high-tech methods of performance appraisal and optimization – but also by gene doping and other illegal practices.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

264700 017

**The History of the Climatee**

A lot of research is going on into the history of the climate – to understand the past and even to try to predict the future. Researchers are analyzing samples taken from the heart of Greenland's glaciers, ice that serves as an environmental archive stretching back more than 100,000 years. Scientists are also looking for records in libraries and archives – and scouting some of the oldest cities in Europe for telling clues.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

264700 018

**The End of the Line for the Fishing Industry?**

The global demand for fish has doubled since 1980. Now half of the world's stocks have been fished to their limits, while a quarter is thought to have been over-fished. If things carry on like this, commercial fishing could grind to a halt by 2050. Scientists are looking for ways to avert such a scenario – but policy makers rarely heed their advice.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

264700 019

**Light at the Speed Limit**

Light is crucial for life on Earth, yet it remains very hard to understand. Exhibiting properties of both waves and particles, it travels at 300,000 kilometers per second. It provides us with energy, allows us to observe the world around us, and is set to be the basis for devices and computers of the future.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264700 020****Radiation from Space**

The Earth is under incessant fire from cosmic radiation, which consists of all manner of particles. Scientists from around the world are working on solving its mysteries. They pool their knowledge, piecing it together like a puzzle, and keep a close eye on outer space in a bid to fathom the origins of our existence: What effect does this tide of cosmic particles have on us? Where does life come from? How did the Universe come about?

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264700 021****Energy from the Oceans**

Two-thirds of the Earth's surface is covered by ocean. The seas represent gigantic sources of energy, which scientists aim to harness to produce electricity. Their work focuses primarily on tides and currents, waves and the salt contained in seawater. The sea could meet the growing human demand for energy, without destroying the Earth.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264700 022****Death from the Laboratory?**

Rice farmers in Thailand are at high risk of contracting melioidosis. The disease is caused by bacteria that are found mostly in tropical and sub-tropical regions. Some progress has been made in efforts to combat the disease. But there are fears that the pathogen could also be used by terrorists planning a biological attack.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264700 024****The Weather Makers – Can We Control the Climate?**

It is currently common practice to influence local weather systems in more than 30 countries. Techniques are used to generate rainfall or sunshine, or to prevent dangerous hailstorms. But not enough research has been conducted into the consequences of such intervention in the climate. Despite the potential risks, weather manipulation is occurring with greater frequency throughout the world.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264700 025****Dangerous Debris in Space**

Since the beginnings of space travel, man has left a trail of debris behind him: burned out rocket stages, and disused and damaged satellites, for example. Hundreds of thousands of pieces of space debris are orbiting the Earth. Some scientists say the danger of collision is now so great that the era of space travel may already be nearing its end.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264700 026****The World's Highest Clinical Laboratory**

There can be few places on earth as hostile to life as Mount Everest. The human body is simply not made for the icy, thin air found at such altitudes, air that makes blood more viscous and alters brain and lung functions. But by studying the changes in the body caused by conditions on the world's tallest mountain, a European team of doctors is convinced it can develop new treatments for the critically ill.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264700 027****Hidden Poison**

You cannot see, smell or taste them, but they can have a serious impact on your health: toxins in food and everyday objects from clothing to toys. Harmful substances lurk at every turn, and primarily pose a threat to children. In a bid to protect consumers, scientists have been working for years on enhanced toxin detection methods.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264700 028****Research in the Rain Forest – Are Lianas Taking Over?**

As lianas continue their apparently inexorable advance, the equilibrium of the rain forests of Guyana is under threat. As they strive to reach light, the vines suppress everything in their path. Scientists take to the skies in a hot air balloon to investigate the causes and the consequences of this large-scale growth.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264700 029****Climate Change – A Threat for Historic Buildings**

Climate change is a threat not only to people, animals and plants, but also to monuments. By conducting a series of complex experiments, scientists hope to discover more about the effects of extreme temperature fluctuations and to find new ways to protect murals, valuable furniture and other historical objects.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264700 030****Mars Mission – Inside the Isolation Pod**

Not to see the sun, not to feel the wind, and to have no contact with their families for 105 days: That is part of the challenge facing six test astronauts in the service of science. An experiment at the Moscow Institute of Biomedical Problems simulates a flight to Mars in order to study the psychological and physical effects of such a long period of isolation.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264700 031****Communication Without Words – The Language of Facial Expressions**

A furrowed brow, a beaming smile, a twitch of the nose – our face is talking every second, even if we are not saying anything. It can produce more than 10,000 different expressions – with just eight facial muscles.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264700 032****The Wonderful World of Mushrooms**

Mushrooms are masters of chemistry and cooperation. They cooperate with microscopic algae to become robust hybrids, lichens, which can withstand both Arctic cold and blistering heat. Some of the substances they produce are poisonous to humans, some have a healing or hallucinogenic effect, and others are a source of flavor and aroma.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264700 033****Don't Panic! – How to Control Crowds of People**

If crowds of people start to panic, this can quickly become dangerous. Scientists, engineers and rescue services are teaming up to find ways to evacuate public places as swiftly as possible in the event of an emergency.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264700 035****Intelligent Creatures**

Until recently, behavioral research deemed an animal to be intelligent if it is aware of itself. But intelligence manifests itself in many different ways, and recent studies identify intelligent behavior in all kinds of creatures. Is it time to revise our understanding of animals?

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

**264700 036****Europe's Giant Elephants – Exploring a Lost Biotope**

120,000 years ago, giant elephants roamed the plains of Europe. A spectacular archaeological find in Germany reveals a great deal about the fauna and climate of that era, during which early humans tried to assert themselves over the animal kingdom.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

264700 037

**The Earth's Sensitive Surface**

Biological crusts of mosses, lichens and cyanobacteria cover vast areas of the Earth's surface like a skin. They protect against erosion and destruction – and act as a brake on global warming to a much greater extent than previously thought. But much too little is known about these sensitive layers.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

264700 038

**Bionics – Is Nature the Better Architect?**

Scientists are increasingly examining how complex technical problems are solved in the natural world. Their field of research is known as bionics. Looking at nature's solutions is especially worthwhile when exploring durability and load-bearing structures. How, for example, can sensitive electronic products be transported to customers in a secure and environmentally-friendly way?

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

264700 039

**Barriers to Knowledge**

Scientific progress has made the world more fathomable. But in many cases, researchers find themselves up against fundamental limitations on their knowledge. The transition between life and death, for example, or the question of human consciousness. The concept of time also presents science with puzzles it has so far been unable to solve.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

264700 040

**The Numbers Game**

Mathematics enables us to make complex forecasts and calculations that are of great use in our everyday lives. But maths has a hard time getting a handle on certain complex natural phenomena. What is the relationship between physical reality and the laws of mathematics?

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

264700 041

**The Essential Conundrum**

Is a vacuum really empty? What are Black Holes? Einstein's theory of relativity and quantum mechanics provide precise answers, but they contradict each other. Physicists are searching for the formula that unites both theories.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

264700 043

**Water – The Emergent Energy Source**

Hydropower is the most reliable form of regenerative energy. Engineers are currently testing completely new concepts for its use. For example, they are designing power stations that harness mountain streams or that run effectively on small amounts of water falling from low drop heights.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

264700 044

**The Silent Demise of a Species**

Around a third of the world's 5,000 species of amphibian are endangered. Scientists only have a limited understanding of why this might be the case. In Cameroon, two German tropical marine ecologists have spent years conducting research into around 100 indigenous species of frog.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; VoD, M, IFE, LR

264700 045

**Southern Italy – Understanding Volcanoes**

Vesuvius, Etna and Stromboli are among the most intensively explored and monitored volcanoes in the world. Researchers want to be able to predict eruptions more precisely, but this is proving to be difficult. Nevertheless, their work on the volcanoes of southern Italy is helping colleagues in other regions.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; VoD, LR

264700 047

**Tree Protection – Finding Ways of "Fingerprinting" Wood**

Illegal logging and the illegal trade in timber are destroying many of the world's forests. Scientists are trying to develop ways of identifying wood according to its type and origin. They hope that this will help to crack down on the destructive activities of crooks and smugglers.

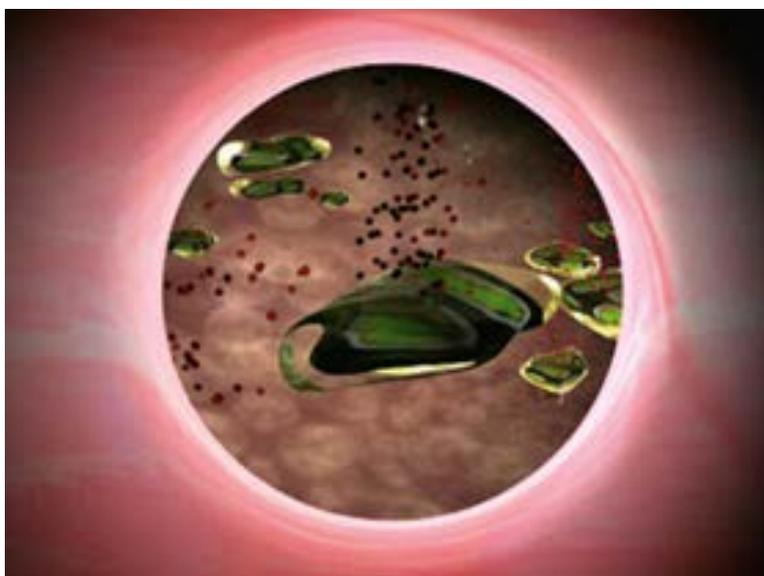

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 048

**Storm Research – How Meteorologists are Working to Make Flying Safer**

Extreme weather represents a risk to aeroplanes and those on board. Researchers are trying to gain a better understanding of storms in order to try to minimize the danger. German scientists have developed software that is able to predict storms at short notice. The next big step will be to convey these warnings directly to the cockpit via datalink.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

264700 049

**Eco-Friendly Chemistry**

Almost 90 percent of all chemical industry products are derived from mineral oil. But what will happen when oil reserves run out? Since the early 1980s, the German chemist and entrepreneur Hermann Fischer has focused his attention on the potential of plants. His research has shown that the resins, oils, starches and pigments in plants can replace all petrochemical products.

264700 050

**When the Earth's Magnetic Field Waxes and Wanes**

The earth's magnetic field doesn't just help us to navigate with a compass, it also protects our planet from space radiation and cosmic storms. But the field has weakened significantly in recent years. What are the potential consequences of this for humankind? Is there reason to fear a catastrophe?

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

264700 051

**Over Land and Sea – The Mystery of Bird Migration**

The annual migration of billions of birds is a mystery to science. Why do these creatures travel thousands of kilometers? How and when did such migration begin? Using up-to-the-minute technology, researchers hope to discover more about the lives of migratory birds – and thereby improve air traffic safety.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 052

**Self-Drive Cars for Safer Roads**

Human error is the most frequent cause of car accidents. For this reason, assistance systems and autopilots are playing an increasing role on the roads. Expectations of the new technology are high: enhanced safety, lower emissions and fewer traffic jams. Even cars that drive themselves are no longer simply a futuristic vision.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 053

**Bioacoustics – Investigating Animal Language**

The sounds animals make are astonishingly diverse. Scientists working in the new discipline of bioacoustics are using extraordinary methods to investigate a huge variety of noises produced by animals. Could these be described as a kind of language? Will it one day be possible to enter into dialogue with animals such as dolphins or elephants?

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 054

**The Inscrutable World of Clouds**

While research into the nature of clouds continues to yield fascinating new insights, it is also throwing up a number of questions. For example, there are clouds that cool the Earth, and others that cause temperatures to rise. One thing is clear: More information about clouds is needed if we are to make any reliable climate predictions.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 055

**High-Tech Animal Research**

How do kites choose their route over the Straits of Gibraltar? How do tiny butterflies manage to clear mountain altitudes of 3,000 meters and cover distances of more than 2,500 kilometers? In a bid to answer such questions, as many animals as possible are fitted out with small, extremely powerful transmitters by an international team of researchers.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 056

**Adrenaline – The Addictive, Lifesaving Hormone**

Adrenaline is a multifaceted hormone. At times of great physical or psychological stress, it swiftly adjusts our cardiovascular system and metabolism to the new situation. But it can also be addictive. In the case of extreme sportsmen and women, some even put their lives on the line in pursuit of new heights of stimulation.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 057

**Ticks – Danger in the Woods**

Just one bite from a tick can be enough to infect a person with dangerous pathogens. Recent years have seen an increase in the number of these parasites in Europe. By finding out more about ticks, researchers hope to improve their ability to predict when and where the dangers are lurking.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 058

**Running for the Rush**

Endurance sport is becoming a mass phenomenon. But medical professionals observe the trend with mixed feelings. On the one hand, they welcome the fact that more people are leading active lifestyles. But on the other, many recreational athletes are pushing themselves too hard. The intensive pursuit of sport requires good health and regular, long-term periods of training. Otherwise, the strain can damage tendons, ligaments and joints and, in the worst case scenario, cause a heart attack.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 059

**Animals as Early Warning Systems**

Scientists have observed changes in the behavior of goats close to the volcano Mount Etna in Italy several hours before an eruption. This would give the local authorities enough time to warn people living nearby. Can the behavior of other animals in other parts of the world serve as reliable predictor of dangers or even epidemics?

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 060

**How Animals Feel**

A rat frees another rat from a cage. An elderly chimpanzee adopts an orphaned baby monkey. Two elephants help one another find food. Do such displays of empathy and altruism show that animals are capable of moral behavior? And if this gives them advantages in the battle for survival – does this mean morality is a product of evolution? Behavioral biologists are taking a fresh look at how animals feel, and how they act upon their feelings.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 061

**Merapi – Java's Mountain of Fire**

Mount Merapi on the Indonesian island of Java is one of the most active and dangerous volcanoes in the world. It has claimed the lives of thousands of people over the past 100 years. The risk of a major new eruption with potentially global consequences is high. Researchers are trying to understand Merapi's dynamic system.

264700 062

**A Vision of a Zoo to Preserve Wildlife**

Zoos are often viewed as “animal prisons”, even though these days most zoo animals are born in captivity and many zoos take great care to ensure the enclosures are spacious and emulate natural habitats as far as possible. The World Association of Zoos and Aquariums works to ensure that nature conservation and biodiversity are a priority, and that zoos keep the public informed and aware of these issues. Are modern-day zoos managing to meet these challenges?

264700 063

**Rare Earth Metals – The Future of High-Tech Elements**

Modern life would be inconceivable without rare earth metals. These are an essential component of high-tech products such as smartphones and hybrid cars. But mining these 17 elements is usually both expensive and damaging to the environment. Efforts are underway to find greener ways to produce the problematic metals, to recycle them intelligently and to replace them altogether.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

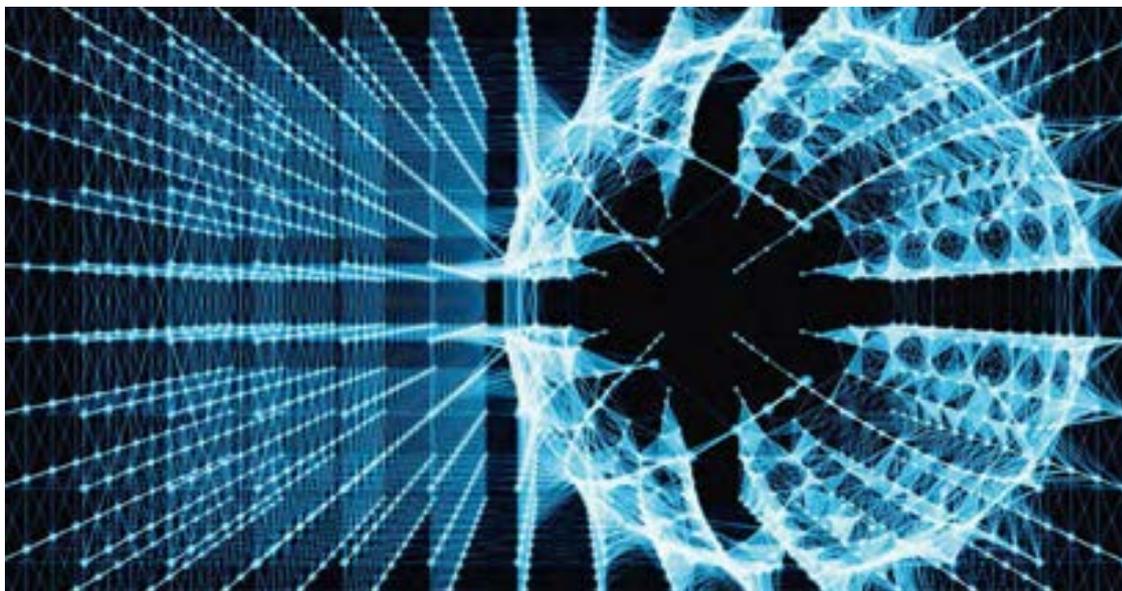

264700 064

**Medicine of the Apes – The Jungle Pharmacy**

Animals tend to eat particular plants when they are ill. In the Democratic Republic of Congo, a German biologist has analyzed what bonobos choose to eat. Her findings are of interest to the pharmaceuticals industry, as these plants could yield substances with which to create new drugs. But the bonobos are a species under threat, and what we can learn from them might soon be lost forever.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, M, IFE, LR

**264700 065**

**Black Holes – Investigating the Phenomenon**

Black holes are not only fascinating to sci-fi writers, but also beguiling to scientists. They are mysterious and they cannot be observed directly. Increasingly sophisticated technology is enabling astronomers to explore uncharted areas of space, giving them new and profound insights into the universe and its history.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, LR

**264700 066**

**Light Pollution – The Disappearing Darkness**

The Earth is becoming ever brighter. But too much artificial light at night can negatively affect the wellbeing of people and animals. Scientists are concerned at what they say are rising levels of light pollution. Is there anything that can be done, without plunging us into darkness? What steps can be taken to make our artificial lighting more sustainable and kinder to our health?

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, M, IFE, LR

**264700 067**

**Mining on the Ocean Floor**

On the floor of the Pacific Ocean, at a depth of four kilometers, there are vast reserves of manganese nodules. These contain many rare metals used in the manufacture of electronic devices. There are fears that extracting these metals could disrupt natural marine rhythms and threaten an ecosystem that we still don't really understand. Scientists are hoping that their research will ease the impact of deep-sea mining on the environment.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**264700 068**

**Leaving Nothing to Chance?**

Researchers base a whole variety of prognoses on the tide of data generated by advancing digitalisation. Predictive analytics uses data mining to create algorithms to predict trends in society and individual preferences. Such algorithms are of great interest both to the business world and to governments and their intelligence agencies.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**264700 069**

**Trust Your Gut**

Our intestine is like a second brain: What's known as the enteric nervous system surrounds the entire organ, permanently sending information to the brain and influencing our emotions. Now researchers have discovered that humans fall into three different intestinal groups or enterotypes. Like blood groups, these are not linked to gender, age or ethnicity. The discovery has led to promising developments in the treatment of intestinal disorders and in nutrition research.

**264700 070**

**The Decline of Alpine Glaciers**

Glaciers are places where the effects of climate change can be seen and measured on a daily basis. The retreat of glaciers in the Alps has been far more rapid than scientists had predicted. This is due to the exacerbation of global warming by local factors. The changes not only impact the Alpine ecosystem. Permafrost holds rocks and scree in place. If it melts, the results could be devastating.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; LR

264700 071

#### **Dangerous Dust from the Desert**

Dust storms occur primarily in arid regions of the world. As much as five billion tons of fine particles are whipped up into the air by high winds every year. This results in the affected soil losing its fertility. Dust storms are a danger to human health, crops, transport and technical equipment. Why do dust storms happen? And is there anything we can do to stop them?

264700 072

#### **The Hidden World of Fascia**

For a long while, fasciae were considered insignificant – but today we know that the soft connective tissue encases the parts of the human body like a fine mesh, interpenetrating and surrounding all internal organs, even veins and the brain. It forms a whole-body network that helps stabilize the body and keep it upright. Interest in the role of fasciae in a range of ailments is growing. They are also central to some new approaches to medical therapy.

264700 073

#### **Microplastics in the Ocean**

Most plastics never disintegrate, but are simply broken down into increasingly smaller particles until they are invisible to the naked eye. In the oceans, microplastics present a particular problem: What happens to them? Are they eaten by marine organisms? Are they buried beneath the seabed? And what are the effects if they enter the food chain?

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, IFE, LR

264700 074

#### **Measuring Emotion**

Scientists are working on technology to analyze and interpret facial expressions, language and gestures. They are developing avatars that can register emotions in humans and respond “sensitively”. “Empathetic” robots already serve as teachers’ aids. Data goggles convey their wearer’s feelings in real time. What impact will such technologies have?

#### **Expedition to the Arctic**

The “Vagabond” is a 15-meter research vessel with a shallow draught. The little yacht is home to the French captain Eric Brossier and his family. Scientists from all over the world charter it for their projects. For example, the climatologist Jochen Halfar, who researches the development of sea ice over the last millennium in the Arctic Ocean between Greenland and Canada.

#### **The Secrets of the Molnár János Cave**

There’s an extraordinary and little-known subterranean realm in the heart of the Hungarian capital Budapest – a system of water-filled caves known as the Molnár János Cave, which extends over several kilometers. Only experienced divers are allowed to enter. The cave is prized by scientists in several fields because it contains fossils, rare and even unique species of flora and fauna, as well as intriguing mineral deposits. The cave provides an insight into the region’s geological past and poses interesting questions about evolution.

#### **Blood in Short Supply**

Blood is the elixir of human life and an increasingly scarce commodity. This is because blood donation rates are down despite an increase in need. Researchers and doctors are searching for solutions. One approach is to reduce the number of transfusions. Another, to glean a substitute for human blood: from lugworms, for example, or stem cells.

**Insects: Superstars of Bionics**

There are more than a million known species of insect in the world. Sometimes, their talents are akin to superpowers. Bionics is a science that examines ways to apply biological structures and processes to modern technology: for example, you've never seen an ant traffic jam. And the Asian harlequin beetle has the most efficient immune system in the world. Two examples of how insects can help us to solve contemporary problems.

264700 079

**Bacteria: Life on the Seabed**

2,000 meters below sea level it's dark, water pressure is extremely high and undersea springs spew boiling hot water containing toxic substances. These hostile conditions do not deter bacteria, which flourish and form the basis for rich ecosystems with innumerable higher organisms. What is the relationship between these life forms? And what conclusions can be drawn concerning the significance of bacteria for human existence?

**The Amazing World of Spiders**

Spiders are everywhere we go, they're around us all the time as we go about our daily lives, but they're often not very popular with their human cohabitants. Maybe that's why we haven't wanted to know all their secrets. For example, few people are aware that some spiders can fly, some can live underwater, while others spit or dance. And so far, no one has managed to invent a technical material with the same incredible qualities as spider silk.

**Documentary, 30 min.**, 2018, HD; Arabic, English, Spanish; VoD, M, LR

**Intoxicated Animals**

Humans aren't the only consumers of alcohol. Many animals also regularly indulge, and even seem to sometimes enjoy the effects. But can they also get addicted? And does alcohol have the same effect on everybody and everything? Researchers from a variety of fields have been observing alcohol consumption in animals in a bid to gain new insights into the possible prevention and treatment of alcoholism in humans.

**The Dangers of the Acid Ocean**

The oceans of the world are absorbing more and more carbon dioxide, making them increasingly acidic. What impact is this having on marine life? Will it be able to adapt to this global change? Or will the creatures of the seas gradually disappear? Time may be running short, so marine biologists are urgently searching for ways to ensure their continued existence.

Know it! is DW Transtel's magazine all about knowledge. Do you know what factors influence climate change or what impact it has on humanity? Are you aware of the questions currently being researched by scientists? How much do you know about energy and the environment? Do you keep up-to-date with the latest developments in transport technology? Do you keep track of health and medical advances? And did you know...

All over the world, scientists are working to increase our knowledge. Engineers develop practical applications for new discoveries; their research makes it possible for people to embrace the future. Those equipped with greater knowledge have a better chance of solving problems, improving living conditions and curing diseases, and, ultimately, of securing the survival of humanity as a whole.

Know it! brings you magazine-length reports packed full of information on science, technology and everyday phenomena. Know it! lets you in on the latest developments and discoveries from all over the world. If you're curious about the world around you, just tune in and Know it!

### SAMPLE EPISODE 30 MINUTE VERSION

#### Fingerprint Breakthrough

For over a century now, fingerprints have been a powerful tool for identifying perpetrators. Now a new scanner can read them without touching or altering the underlying object.

#### The Perfect Mattress

If you don't sleep well, it can wreck your day. Researchers have discovered that individually tailored mattresses can have a positive impact on sleep patterns.

#### Window to the Future

Office buildings with glass facades need climate control systems to keep them cool inside during the summer and warm in the winter. A high-tech window could make that a thing of the past – and generate electricity at the same time.

#### Making Robots More Human

In the future, humanoid robots will be our servants – possibly even friends or companions. But there are still many complex hurdles that have to be overcome before that can happen.

#### Lego E-cars

In terms of performance, electric vehicles are expensive compared to combustion engine alternatives. Now a new modular system could make building them a much cheaper prospect.

#### High-Altitude Health

Doctors noticed long ago that people who live in cities are more likely to contract hay fever than those in the country. Is there a connection between allergies and environmental toxins?

#### Before Birth

Developmental researchers have found that a fetus is influenced dramatically by the world long before birth. The season in which you're born even has an impact on life expectancy.

## Totally Phenomenal

There is usually something unknown and exciting behind even the most everyday things – one simply has to take a closer look. And that is what *Totally Phenomenal* does. The series answers everyday questions about the realms of physics, chemistry, biology and geography. In each 15-minute program, a fascinating phenomenon is presented and explained with the help of models or 3D-animations. The programs also focus on the ways discoveries and inventions are used, thus creating a real-life connection for the viewers.

### **Rays Create Transparency**

From the detection of X-rays and the history of its various applications to computer-aided-tomography and X-ray screening at airports, the report highlights the importance of these invisible rays.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 002**

### **Satellites Show the Way**

This program explains how a satellite based global positioning and navigation system works and how it is used for supporting air traffic control, navigation systems for cars or for locating ships worldwide.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 003**

### **Waves that Warm**

Animals and humans alike are able to absorb and make use of the sun's infrared radiation via their skin. In the past, the sun was responsible for a natural greenhouse effect. Now, a human contribution, pollution, may have a snowball effect and lead to dramatic changes.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 004**

### **Super Eyes**

Being able to see – an important aspect of evolution. But different eyes function and see things differently. We show you fascinating images of what the world looks like from the perspectives of worms, flies or birds of prey.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 005**

### **Super Noses**

Who has the best nose in the animal kingdom? How can the nose distinguish various scents? What do the odours of perfumes and diapers have in common? This program addresses all the questions from the world of smells.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 006**

### **Super Ears**

Ears usually make it easy to find the organ with which animals receive sound waves. But there are less obvious ways in which some creatures "hear", or convert those sound waves into signals. Some of these vary greatly from animal to animal. Nature holds a number of surprises.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 007**

### **The Trail of DNA**

Genetic fingerprints are unique and can be extracted from the smallest skin particles or tiny hairs. DNA determines not only biological development, but also – in criminal investigations, for example – can place someone at the scene of a crime. DNA also provides information on who is related and who is not.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 008**

### **Invasion of the Viruses**

Experts sound the alarm. A new strain of an influenza virus may cause a pandemic. In a worst case scenario a type of influenza virus, hitherto only fatal for animals, could mutate and become a threat for humans. Do vaccinations offer sufficient protection from a pandemic?

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 009**

#### **Pretty Windy**

Wind can be a very destructive force, but can also be harnessed for good, in yachting or for windmills. This programme explains the basic mechanisms at work, when breezes become blasts and gusts become gales. A closer look at one of the driving forces behind changing weather conditions.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 010**

#### **Mr Jonas Dives into the Depths**

Mister Jonas fears depth. Diving? No thank you. No air to breathe, pressure on the ears, blurred vision and the threat of nitrogen narcosis. How do animals cope with this hostile environment? Mister Jonas takes a diving course and loses his fear of the deep.

**Documentary, 15 min.**, 2007, SD; English, French, Spanish; LR

**244680 011**

#### **Currents of Energy**

Water and wind power are among the oldest sources of energy, but their importance is set to increase dramatically as the need for environmentally friendly and emissions-free energy grows. This programme introduces several concepts and shows how they work.

**Documentary, 15 min.**, 2008, SD; English, French, Spanish; LR

**244680 012**

#### **Biofuels**

Say bio energy and most people usually just think of the use of biogases. But the commercially available fuel of the future will be produced from plants, and not faeces. What kinds of bio energy exist, and what contribution can they make to our future?

**Documentary, 15 min.**, 2008, SD; English, French, Spanish; LR

**244680 013**

#### **The Versatility of Crude Oil**

The world is dependent on oil. But global supplies are running low. This programme shows how the highly sought-after raw material was formed 150 million years ago, how high-tech equipment is tapping into the last reserves, and highlights the production of materials based on a common primary product, oil.

**Documentary, 15 min.**, 2008, SD; English, French, Spanish; LR

**244680 014**

#### **From Ore to Steel**

Metals are probably the most universal materials in the production of tools, weapons and jewellery. These metals have had a huge impact on the development of humankind. Today, research has switched its focus from copper, iron and steel to primarily light metals.

**Documentary, 15 min.**, 2008, SD; English, French, Spanish; LR

**244680 015**

#### **Cloning**

The first cloned mammal – Dolly the sheep – was presented to the public in 1997, and caused a sensation. Like no other field of research, the highly controversial issue of cloning represents hope for some, and terrifying scenarios for others.

**Documentary, 15 min.**, 2008, SD; English, French, Spanish; LR

**244680 016**

#### **A Glimpse into Space**

Satellites and powerful telescopes provide us with an exhilarating window on space – there we see stars explode, new ones being born, and black holes devouring anything that comes too close. It's a spectacle that can teach us something about our origins.

**Documentary, 15 min.**, 2008, SD; Arabic, English, French, Spanish; LR

**244680 017**

#### **The Sense of Touch**

Touch is one of the primal senses, important for orientation, the search for food, and social contact. It plays a key role in all of our lives. Intricate computer animations show the different touch sensory nerve cells in action.

**Documentary, 15 min.**, 2008, SD; English, French, Spanish; LR

**244680 018**

### **The Sense of Taste**

The tongue is a multifunctional organ – we use it to convey food to the back of the mouth, as well as for speech. But that’s not all it can do. Elaborate computer animations and models show how the taste buds on the surface of the tongue function.

**Documentary, 15 min., 2008, SD; Arabic, English, French, Spanish; LR**

**244680 019**

### **Glaciers**

The fascinating world of glaciers, revealed on a trip around the globe. 3D-animations and time-lapse films explain how glaciers are formed. By studying these highly sensitive indicators of climate change, researchers are trying to assess the future impact of rising global temperatures.

**Documentary, 15 min., 2008, SD; English, French, Spanish; LR**

**244680 020**

### **Nerve Network**

Without the body’s intricate internal wiring system, we wouldn’t even manage to bend a little finger. So much about our body is, so to speak, a “test of nerves”. A glimpse at the internal workings of the body shows just how this remarkable nervous system functions.

**Documentary, 15 min., 2008, SD; English, French, Spanish; LR**

**244680 021**

### **Volcanoes**

Volcanoes are created when magma rises and breaks through the earth’s surface. Experts around the world are always on the lookout for signs of new eruptions so that they can issue warnings. But despite today’s technology, totally reliable predictions are impossible.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 022**

### **The Tiniest of Clues**

It takes more than a police officer’s intuition to find out why somebody died a mysterious death. Forensic scientists armed with microscopes are often needed. Insects found on or inside a body can yield vast amounts of information about what happened – information that sometimes even leads to the killer.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 023**

### **Greenhouse Earth**

Without the greenhouse effect, the earth would be an ice-cold, uninhabitable planet. But since the advent of industrialization, the increase in greenhouse gases has brought with it disastrous consequences for the climate and the environment.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 024**

### **Sticky Situation**

Geckos and flies can walk on vertical surfaces. Unfortunate insects often meet their fate stuck to a spiderweb or a carnivorous plant. Scientists are looking into how methods of adhesion found in nature can be put to technological use.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 025**

### **From Dinner to Dung**

Animal and human bodies extract the nutrition they need from food, then expel the rest. That’s where nature’s recycling service comes into play, thanks to the dung beetle and other tiny helpers.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 026**

### **Suction Systems**

Suction pads are in use everywhere – from the bathroom shower mat to the mount for a car’s navigation system. Nature mastered the principle of using a vacuum to fasten things millions of years ago. The study of suction systems in animals is proving very useful in developing new suction technologies.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 027**

### **Nuclear Power**

Some say nuclear power will solve the world’s energy problems; others say it is far too dangerous. Nuclear fission has been used for half a century now to generate electricity. This film explains how it works and takes a look at the security measures at a new nuclear power plant being built in Finland.

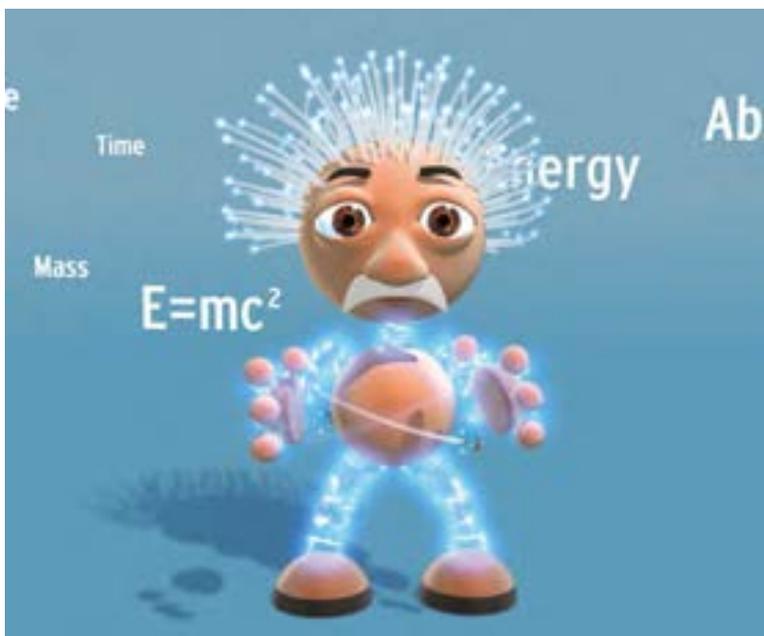

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

**244680 028**

### **Geothermal Energy**

The scorching, seething core of our planet is an immense and largely untapped source of energy. Geothermal energy could become an interesting alternative to fossil fuels, which are expensive and contribute to global warming. Iceland already taps the earth’s heat. In principle, geothermal energy can be harnessed almost anywhere.

**Documentary, 15 min., 2009, SD; English, Spanish; LR**

## EinSteinchen

$E=mc^2$  – the most famous formula in the world. Everyone knows it, but very few know what it actually means. This is true of most of Albert Einstein's revelations. You don't have to be a genius in physics to understand our program. Whether it's the photoelectric effect or the relativity of time, the virtual figure EinSteinchen will help you understand the ideas behind Einstein's work in a simple and straightforward fashion. In twelve 90-second, elaborately animated clips, the virtual whiz explains the great scientist's most important discoveries. EinSteinchen speaks directly to viewers, and makes them want to learn more about the basic principles inherent in Einstein's theories. He explains difficult concepts using amusing and fascinating examples that anyone can understand.

### Absolute and Relative

It's all a question of perspective! EinSteinchen provides a simple example revealing how size – depending on your point of reference – is actually relative.

124666 002

### $E=mc^2$

Einstein's famous formula! EinSteinchen explains that energy can turn into mass, while mass can likewise be converted into energy. This second process, for example, constantly occurs in our sun.

124666 003

### The Discovery of Slowness

What is the 'relativity of time'? EinSteinchen shows how time changes when traveling through space. Of course, speed also plays a role. An external observer watching a clock on a spacecraft that was accelerating through space could see time 'slow down' as the ship gained speed.

124666 004

### As Fast as Light

EinSteinchen explains that light always moves at the same speed, and why nothing can be faster than light.

124666 005

### Glowing Atoms – Stimulated Emissions

How does a laser apparatus create its special, highly concentrated beam of light? EinSteinchen explains the role that 'excited' atoms play in the process.

124666 006

### The Supermolecule – Bose-Einstein Condensation

When EinSteinchen drops the temperature of molecules close to absolute zero, they change state and begin behaving like a single 'wave'.

124666 007

### The Spooky Long-Distance Effect

EinSteinchen takes a look at a paradox. Two particles can continue to be 'entangled' with each other even if they're far apart in space.

124666 008

### Bent Space

EinSteinchen shows how incredibly massive objects exerting enormous gravity actually bend space, and how even light follows the curve.

124666 009

### Dancing Particles

Molecules are in constant motion. Even inanimate particles can move in seemingly unpredictable ways. EinSteinchen explains how the forces that play a role in interactions between molecules can be defined by formulas.

124666 010

### Electricity from Light

Light can exhibit the characteristics of either a particle or an electromagnetic wave. That's why light energy can be converted into electrical energy. EinSteinchen shows us how.

124666 011

### The Invisible Force

EinSteinchen reveals how the forces of gravity exerted by stars and planets keep everything in the universe in motion.

124666 012

### Wormholes

Theoretically, two black holes could distort space-time in the universe so extremely that they would create what's called a 'wormhole'. EinSteinchen explains how a theoretical journey through this kind of cosmic tunnel could provide shortcuts across the enormous distances of space.

### Nuclear Medicine: A Formula and its Results

When an atom in a radioactive element decays, then part of the matter that makes up its nucleus is transformed into energy. This is part of the proof that backs up Einstein's realization that mass and energy are two sides of the same coin. Without Einstein's discovery that is expressed in the formula  $E=mc^2$ , some later medical developments would not have been possible. Artificially produced radioactive substances known as radiopharmaceuticals play a major role in modern medical diagnostics and research.

124665 002

### Satellite Navigation – Einstein's Contribution to Galileo

Time is relative – in the field of satellite navigation, Einstein's theory has practical applications. In space, clocks tick differently than they do on Earth. But the accuracy of satellite navigation systems is dependent on how precisely the atomic clocks on board can measure time.

124665 003

### The Speed of Light – Part 1: Light Researchers

At the root of Albert Einstein's Special Theory of Relativity is the assumption that the speed of light never changes. Einstein said that the speed of light is a universal constant, one that always remains the same no matter where you are. Is that really the case? European researchers now want to conduct an experiment in space to find out.

124665 004

### The Speed of Light – Part 2: Radar Satellite

The speed of light also standardizes the exact length of a meter. That's important for large-scale surveys like those slated to be carried out by the radar satellite TerraSAR-X. The radar satellite will begin surveying Earth's surface with an accuracy never before seen in civilian applications. The new satellite, for example, will be able to map the ongoing urban sprawl of some of the world's largest cities.

124665 005

### The World's Fastest Flash

Laboratories all over the world have been taking part in a competition to create shorter and shorter flashes of laser light. Now physicist Ferenc Krausz has broken a new barrier. He's first to produce an attosecond pulse. An attosecond is an unimaginable 0.000 000 000 000 000 001 of a second long. The technique that Krausz used is based on Einstein's prediction of stimulated emission. The great physicist's hypothesis helped lay the foundations for the development of that incredibly versatile tool – the laser.

124665 006

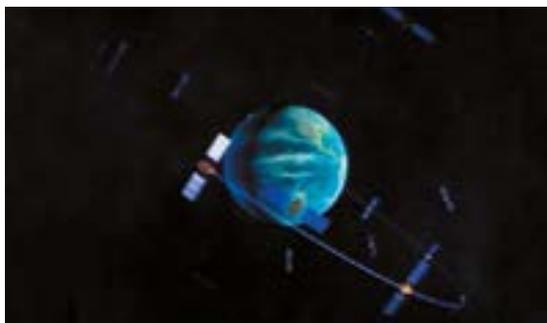

### Juggling Ultra-Cold Atoms

Though he's just 32 years old, Immanuel Bloch is already a professor of physics at the University of Mainz. He's an expert on a state of matter that was predicted by Albert Einstein – Bose-Einstein condensation. Immanuel Bloch has now taken things a step further. He has become the first to crack the Bose-Einstein condensation wave and regularly arrange several hundred of these special atoms into a glowing grid. In the future, grids like these could make up the basic elements of a new kind of supercomputer.

124665 007

### Cloned Atoms Through Teleportation

For the first time ever, Rainer Blatt was able to transfer the state of one atom to another. Although the process is called 'teleportation', no matter is transported from one spot to another. Instead, information leaps the gap. To achieve his goal, Blatt made use of what Albert Einstein described as the 'spooky action-at-a-distance between particles'. The discovery is a scientific sensation, even though the teleporting distances crossed up until now have only been a few hundredths of a millimeter.

124665 008

#### Cosmic Telescopes: Discovering Distant Galaxies

According to a theory first put forward by Albert Einstein, a large body of mass curves space and the light that traverses it. Clusters of galaxies create what are known as gravitational lenses. Astrophysicist Joachim Wambsganz has spent years studying this phenomena in deep space. He searches and maps massive celestial objects such as galaxies that possess strong gravitational fields. These curve or bend the space around them, and force light from even more distant galaxies and objects into a curved rather than a straight trajectory. The process also 'bundles' the light, focusing and increasing its intensity.

124665 009

#### Racing down Einstein's Paths

Molecules in gas and fluids tend to behave in unordered and random ways. This phenomenon, first identified by the Scottish botanist Robert Brown and therefore named Brownian Motion, was also of great interest to Albert Einstein. In 1905, he published his studies on Brownian Motion. Today, his findings can help researchers solve many of the problems linked to the movement of particles.

124665 010

#### Organic Solar Cells

What a pain: the cell phone has to be charged at the mains every few days. But in future that could be rendered obsolete by a portable charging unit in a jacket. It consists of wafer-thin organic solar cells. Like conventional silicon cells, the organic solar cells convert light energy into electrical current. The principle behind it is the photoelectric effect. Albert Einstein received the Nobel Prize in 1921 for his explanation of this phenomenon.

124665 011

#### The Search for a Theory of Everything

For much of his life, Albert Einstein sought a formula that would describe and encompass all four fundamental forces. He failed to find a unifying theory. The tunnel in Geneva is huge – and it runs in a circle that's 27 kilometers long. Thousands of scientists all over the world are waiting with bated breath for experiments to begin in the Large Hadron Collider. It's hoped that the gargantuan apparatus will be able to generate a kind of small scale Big Bang, lasting for just fractions of a second, that will recreate the conditions just after the birth of the universe.

124665 012

#### Time Travel Through Wormholes – Nothing More than a Dream?

As early as 1935, Albert Einstein and Nathan Rosen recognized that relativity theory did not rule out 'bridges' through space-time. Today, we call these hypothetical pathways 'wormholes'. Physicists nowadays admit that time travel through wormholes is at least theoretically possible, although journeys into the past or future have remained firmly in the realm of science fiction.

## Our Technical World

Technology is an integral part of almost all areas of life, and is developing at an increasingly rapid pace. It is very visible in, for example, telecommunication, transport and medicine. But increasingly we take technology so for granted that we barely notice it. Our Technical World shows new and spectacular examples of how technology is deployed and the challenges it must withstand.

### Digital Archives

The digitalization of archives and libraries has now been underway in many countries for decades. But the variety of different data formats and storage technologies used means that creating digital collections that remain readable for ever is a task of immense proportions. It's hoped new methods and devices will help make our digital heritage accessible to future generations.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, LR

**264848 002**

### Machines in Control

Computer-based assistance and autopilot systems are increasingly taking over the wheel in planes, trucks, cars and ships. Some boffins say freighters could soon sail the world's seas without the need of a crew. Skepticism about these technological advances is giving way to acceptance. How do these systems work? And are they safe?

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**264848 003**

### The Effect of Light

LED lights are now widely used in homes and offices and as headlights in cars. They're energy-efficient and long-lasting. The color and brightness of LED lamps can also be adjusted, for example, over the course of a day. That means they can influence human biorhythms. Clever light management could make office work more pleasant and shift work less damaging, and reduce jetlag on longhaul flights.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**264848 004**

### Doctor Robot

Robots are making huge strides in medicine. They are used in surgery, diagnostics and rehabilitation. People with disabilities can now control wheelchairs and prosthetics with their thoughts. Tiny nanobots are being developed that will be able to repair the body from within, clear plaque from blood vessels and release medication directly into tumours.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**264848 005**

### High-Tech Farming

Technology is gaining ground in agriculture as well. Satellite-controlled systems guide tractors and other machines with unprecedented accuracy. The equipment is becoming ever more powerful, efficient and complex – leaving operators to focus almost solely on monitoring its performance.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

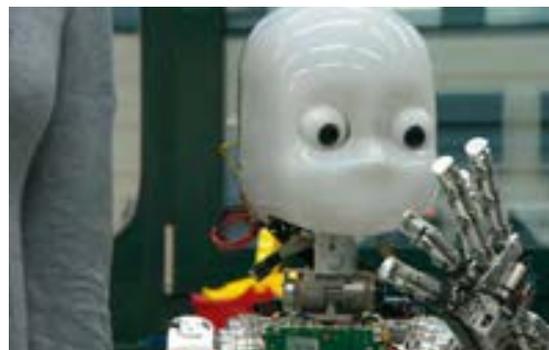

**264848 006**

### The World's Tallest Clock Tower

The world's biggest clock faces adorn the top of a huge new building in Mecca in Saudi Arabia. It is adjacent to the holiest site of Islam, the Kaaba. The four clock faces have a diameter of 43 meters, the minute hands are 23 meters long, and each of the four motors weighs 21 tonnes.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

## Faster, Higher, Stronger

### Tomorrow's Technology

Faster, Higher, Stronger – technology has always been a driving force of human development. Engineers around the world tackle every conceivable challenge and regularly achieve the impossible. Tomorrow's Technology is all about amazing adventures, intellectual and physical. Faster, Higher, Stronger – Tomorrow's Technology tracks the latest developments from the drawing board to implementation. The brilliant engineers of today are helping to shape the world of tomorrow.

#### Digital Thinking – Intelligent Robots

Robots are becoming increasingly useful to scientists and engineers. They inspect pipes and power stations, dive to inhospitable depths, and analyze rock samples on Mars. Their capabilities are advancing by leaps and bounds. But the artificial intelligence of robots differs greatly from human intelligence. Scientists are working hard to make robots much smarter and more like us.

**Documentary, 30 min.**, 2011, HD; Arabic, English, Spanish; LR

**264777 002**

#### Networking the World – Extreme Pipeline Construction

Pipelines are the lifeblood of our oil and gas-dependent world. Many cut through very inhospitable regions of Earth. Laying pipelines is often a dangerous undertaking and one that presents engineers with huge technical challenges.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264777 003**

#### Mass Transportation – Tokyo's Railway System

Tokyo's urban rail network is used by around three and a half million commuters every day. Shinjuku is the main hub, and the busiest station in the world. It takes up-to-the minute technology to keep so many people moving smoothly and safely at Shinjuku and throughout the city.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264777 004**

#### Mirror Power – Energy Production for the Future

The sun is destined to play a central role in future energy production. Huge solar power stations are already capturing tremendous amounts of energy and converting it into electricity. The solar furnace designed by inventor Denis Eudeline was far ahead of its time. Its enormous array of mirrors captures and bundles sunlight to produce incredible heat.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264777 005**

#### The Sky's the Limit – Aerial Cableways

Aerial cableways are now an integral feature of transport systems in mountainous regions, moving both people and goods over deep gorges and the most challenging terrain. Aerial cableways are also set to play a key role in city transport networks. In Algeria for example, cable railways are already a key element of public transport.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264777 006****In Free Fall – Improving Parachutes**

For many decades, parachutes have been an indispensable feature of flight safety. Civilian and military researchers are working on new parachute systems that will bring entire aircraft safely down to earth in an emergency.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 007****Unstoppable – Plowing Through the Pack Ice**

Double acting ships are the latest technological achievement in the shipbuilding sector. These tankers or freighters are also ice-breakers, which means they can navigate the dangerous Northeast Passage alone, and that is quite a challenge for crews and engineers alike.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 008****The Source of Human Energy – A Power Plant Within Us All**

A person generates around 100 kilowatt hours of heat and kinetic energy every year. Researchers have begun to examine how this human energy source could be of benefit to the environment. Their vision is to transform the heat and motion generated by human beings into electricity.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 009****Powering the Giants – Marine Propellers**

The propeller is a key component of any ship. Its design is one factor determining the ship's speed and energy efficiency. The construction of a propeller is highly specialized work. Every propeller is unique, designed for one particular vessel and manufactured with incredible precision.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 010****Sky High – Building Taller Turbines**

Engineers are designing ever taller towers for wind turbines in order to increase their electricity yield, which climbs one percent per meter in height. The tallest ever turbine tower clocks in at 200 meters, and the whole thing weighs in at 7,000 tones. Engineers and construction teams perform amazing feats at dizzying heights, to ensure that these technological marvels go into operation.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 011****Robots With Scalpels – The Operating Theater of the Future?**

This is one medical vision for the future that is not without controversy: A new generation of computers able to work entirely self-sufficiently and conduct operations – more efficiently and more precisely than any surgeon. Before long, it's hoped that robots will be performing open-heart surgery and operating on the brain. But just how safe will these automated procedures be without any human control?

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 012****Quick and Clean – The New Generation Power Grid**

The future of European wind energy is out on the high seas. Vast wind farms are planned 120 kilometers off the German North Sea coast – further away from the mainland than ever before. Transporting the electricity over such long distances requires new technology: High-voltage, direct-current transmission.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 013****Technology in Miniature – A Scale Model of the World**

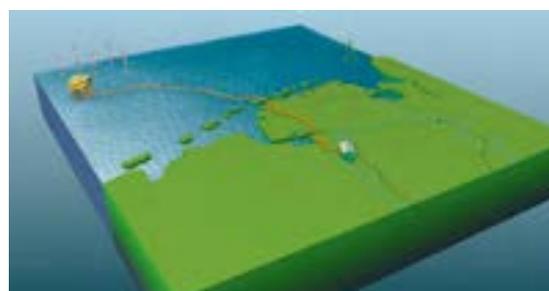

How is it possible to travel across all of central Europe and the US in just a few hours? The answer is simple: By visiting the "Miniatur Wunderland", or miniature wonderland, in Hamburg, Germany – an enormous model railway built on the scale of 1:87. 1,000 trains, 11,000 wagons and 200,000 plastic figures animate this exciting, tiny world. The attraction is a technological masterpiece that pulls in the crowds.

**Documentary, 30 min.,** 2011, SD; Arabic, English, Spanish; LR

**264777 014****Airbus – Every Day A New Aircraft**

Almost every day, a new aircraft leaves the Airbus plant in the northern German city of Hamburg. This is where the final assembly of the short- and medium-range A320 takes place – using components brought in from all over Europe. It's also where the huge A380 gets a coat of high-performance varnish in the world's largest painting hangar. New plastic components reinforced with carbon fiber are being developed to make the aircraft of the future lighter and more stable. Technicians and flight crews conduct virtual tests on each and every plane. The high-tech future is taking off.

264777 017

**High-tech Trucks on the Autobahn**

In goods traffic on Germany's highways, nothing is left to chance. The trucks are part of a high-precision logistics system. Customer deliveries are timed to the minute. To ensure the system works, trucks are monitored via satellite. Sensors in the asphalt count the vehicles: if there are too many on the roads, the speed limit on the digital road signs is reduced. Congestion managers provide real-time information to radio stations and navigation systems. The priorities are to prevent traffic jams and ensure maximum safety.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

264777 018

**Man's Dream of Flight**

"I fly, therefore I am" – that is the idea driving inventors and engineers to fly ever higher and further using as few resources as possible. Their innovations, such as paragliders and wingsuits, are not only exciting for extreme sportsmen and women. Latest developments in ultra-light aircraft and solar aircraft are paving the way for a more flexible and environmentally-friendly future.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

264777 015

**The Port of the Future**

Container ships have always been big and they are getting even bigger. More and more cargo has to be transported and handled as speedily as possible. But how will the world's ports cope with these higher volumes in the coming decades? While Dubai's Jebel Ali Port has focused on expanding its footprint, the port of Hamburg, where more real estate is not available, has focused on automation and rationalization, and Rotterdam has built the world's first fully-automated terminals. What do these developments and trends mean for the ports of the future?

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

264777 016

**Offshore Heroes**

Out on the high seas, the wind and waves rule – a fact that is respected by the builders of offshore wind farms, as they erect gigantic structures out at sea. One large German wind farm is 140 kilometers from the coast. Manufacturing the huge turbines on land is only the first challenge facing constructors. Living and working out at sea requires courage, strength and skill in a daily battle with the forces of nature.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

## How Nature Heals

People around the world have been using natural substances to heal and cure illnesses for thousands of years. Long before doctors dominated the healing process with chemistry and scientific instruments, the natural world provided therapeutic resources in the form of plants, water, light and nutrition. Today, both patients and doctors are reconsidering “old” forms of treatment. There are hundreds of effective ways to treat human ailments – without troublesome side effects. Our series presents traditional and new forms of natural medicine.

### **Yin and Yang – The Chinese Art of Healing**

The Chinese art of healing is about more than acupuncture and herbalism. It also encompasses a healthy lifestyle and a good diet to bolster the immune system against illness. We embark on a search for the origins of natural healing practices in China’s southern provinces.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**264745 002**

### **Paths to Islamic Healing – A German Doctor’s Quest**

Dr. Lydia Reutter from Tübingen in southern Germany travels to Cairo to learn about traditional Arab medicine. But this knowledge is not easy to come by. These days, few hakims – or traditional healers – still work in the timehonored fashion.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**264745 003**

### **The Healing Power of Crystals**

Minerals such as sodium chloride, sulphur and chalk have a healing effect on the human organism in specific medical applications. For example, saline air alleviates the symptoms of asthma, sulphur baths ease tensions, and chalk with special healing properties is used to treat skin diseases.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**264745 005**

### **Poison – It’s All in the Dose**

Doctors have known for centuries that the point where a poison becomes deadly is primarily a question of dosage. Tiny amounts of these deadly substances can actually even have a healing effect. Research on poisonous substances is aimed at developing new medicaments based on the highly effective agents produced by nature.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**264745 008**

### **The Maggot Cure – An Alternative to Antibiotics**

Injuries that don’t heal properly often result in amputations. But if doctors were to treat the wounds with maggots, then the affected limbs of up to a third of patients could be saved. The fly larvae consume dead tissue and thereby accelerate the healing process.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

**264745 009**

### **Radiation – The Invisible Power**

Radiation therapies are seen today as a highly credible alternative to medicinal treatment. For example, bathing in radium-rich water is often prescribed for rheumatism, arthritis, spine complaints and respiratory ailments. The sun’s ultraviolet rays are known to alleviate neurodermatitis and psoriasis.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

**264745 010**

### **Homeopathy – Placebo or Real Cure?**

Homeopathy is one of the best known alternative therapies. But neither scientists nor homeopathic practitioners themselves can explain how it works. One of the fundamental principles of the treatment is that homeopaths devote a great deal of time to their patients. They treat illnesses in accordance with the maxim “like cures like”.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

**264745 012**

### **Medieval Medicine – Secrets from the Monastery**

Since the early 1990s, a German medical historian has been scouring the libraries of European monasteries for documents detailing old remedies, recreating them and testing their efficacy. His conclusion: In the treatment of chronic ailments such as asthma, rheumatism or neurodermatitis, the old herbal preparations have greater healing powers than those conceived by conventional medicine.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

**264745 013**

**Healing Horses – The Wonders of Equine Therapy**

Horses are highly sensitive animals. They are capable of responding to movements barely perceptible to humans and can effect healing where regular therapies fail. For example in the case of people who have been in a coma following an accident and have to relearn bodily functions such as breathing, swallowing and picking things up. Equine therapy promotes the healing process on both a physical and psychological level.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**264745 014**

**Fasting as a Cure – New Research**

Studies carried out by Russian scientists over several decades suggest that medically-supervised fasting can be used to treat a range of physical and psychological ailments. Recent studies appear to confirm at least some of these findings.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**264745 015**

**Qi – The Chinese Art of Healing**

Therapies in traditional Chinese medicine such as acupuncture or acupressure are enjoying increasing popularity worldwide. Although modern science has yet to understand how they function, such therapies can nevertheless yield astonishing success. For example, they can alleviate pain and allergies, and help people overcome addiction.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**264745 016**

**Hypnosis, Meditation, the Laying on of Hands – The Healing Powers of Complementary Medicine**

There are chronic diseases that continue to baffle modern medicine. Yet practitioners of alternative therapies say they can help, with methods such as hypnosis, meditation and relaxation exercises. Scientists have been looking into whether these approaches are effective – and why.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, LR

**264745 017**

**A Change in Diet – To Alleviate Symptoms**

With modern medication, many health complaints can be cured or at least alleviated. But drugs have side effects, and they can sometimes be severe. Three doctors from northern Germany have specialized in prescribing changes to their patients' diets as a way of reducing their reliance on medication.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

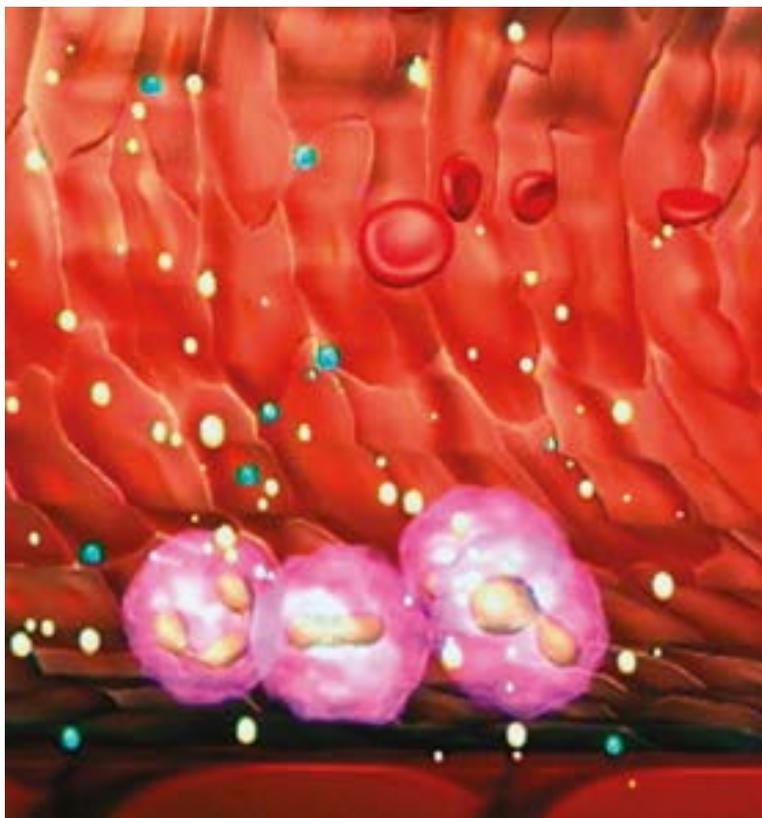

**264745 018**

**The Healing Powers of the Inner Physician**

A view that is catching on in modern medicine is that the body's self-healing response should be harnessed in the treatment of ill-health. Studies also suggest that a person's mindset and attitude can influence the course of a disease.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

## TeleMed

Huge progress has been made in medical practice over recent decades. For example, the discovery of fiber optics has made it possible to take a close look at the stomach or intestine and identify problem zones. Computer tomography creates three-dimensional images without using harmful X-rays. Intensive care medicine, transplantation medicine and genetic engineering are now making it possible to tackle diseases previously regarded as incurable. But there is still much uncharted scientific territory, for example with regard to diseases that have only emerged with our civilization.

### Healing Power from the Desert – Secrets of the Bushmen

Devil's claw is regarded as the most effective remedy against arthritis. In the struggle for survival, the Hoodia cactus from the Kalahari is taken as an appetite inhibitor. Is the knowledge of the inhabitants of the desert being exploited?

Documentary, 30 min., 2007, SD; Arabic, English, French, Spanish; LR

**264607 028**

### Healing Power from the Desert – Secrets of the Xhosa

The anti-viral and bacterial properties of sutherlandia frutescens, a South African shrub, bolster the immune system, stimulate the metabolism, and are used to combat secondary diseases associated with AIDS.

Documentary, 30 min., 2007, SD; Arabic, English, French, Spanish; LR

**264607 040**

### Hospital Death

The spread of the so-called superbacteria through hospitals around the world is worrying. "Super bugs" such as Methicillin-resistant Staphylococcus aureus or MRSA, which causes infected wounds, lung infections and sepsis, have raised great concern because of their resistance to conventional antibiotics.

Documentary, 30 min., 2009, SD; Arabic, English, Spanish; LR

**264607 041**

### Stem Cell Research in the Fight Against Cancer

Recent research seems to indicate that cancer originates in stem cells that trigger tumour growth and cannot be killed off by chemotherapy. The results of the latest studies could provide the basis for a new therapy in which antibodies specifically target the cancer stem cells and destroy them permanently.

Documentary, 30 min., 2009, SD; Arabic, English, Spanish; LR

**264607 042**

### Nanoparticles and Bioweapons Against Cancer

Scientists hope to come up with a new treatment for prostate cancer with the help of an immune therapy based on a toxic metabolic product of a particular kind of bacteria. Tiny nanoparticles convey the anti-cancer therapeutics in this innovative form of locally applied chemotherapy.

Documentary, 30 min., 2009, SD; Arabic, English, Spanish; LR

**264607 043**

### Fungi and Larvae – Nature's Antibiotics

Researchers are increasingly turning their eye to nature's antibiotic reserves, as widening immunity to conventional antibiotics means a reduction in efficacy. Pathogens can't become resistant to these alternative natural antibiotics, which employ a different and unique mechanism to inhibit their growth.

Documentary, 30 min., 2009, SD; Arabic, English, Spanish; LR

**264607 044**

### From Plant to Pill – Hops as a Medicine

Hops have been used for centuries in manufacturing pharmaceuticals. In addition to being known for the effective treatment of anxiety, hops have been shown to possess an astounding therapeutic potential for the future treatment of cancer, diabetes, heart problems and AIDS.

Documentary, 30 min., 2009, SD; Arabic, English, Spanish; LR

**264607 046**

### The Addiction Phenomenon

Medical experts and scientists are in agreement that addiction – be it drug-related or behavioural – is a "real" illness, which is linked to detectable changes in the brain. This film looks at the latest findings of the Interdisciplinary Centre for Addiction Research at the University of Würzburg.

Documentary, 30 min., 2009, SD; Arabic, English, Spanish; LR

**264607 047**

**The Placebo Effect**

When a sick person feels better after being given medication containing no active drugs whatsoever, this is known as the placebo effect. Although scientists have long been familiar with this effect, they have only just begun to try to explain it. Now they have evidence linking the placebo effect to parts of the cerebral cortex thought to be involved in developing expectations for the future.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264607 049**

**Medical Advancement Through Space Travel**

Space travel programs generate a huge amount of scientific research. Many space-related discoveries and inventions are now part of our daily lives. The relatively new science of space medicine utilizes insights from space travel to further the advancement of clinical diagnostics and the treatment of diseases.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264607 050**

**The Fight Against Breast Cancer**

It is estimated that 350,000 women are diagnosed with breast cancer every year in Europe alone. Exact numbers are not available. Nor is there much information on the impact of advances in the prevention, therapy and aftercare of breast cancer. One thing is clear though – survival rates have definitely improved.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264607 051**

**Deafness: A Thing of the Past?**

Could deafness and hearing loss soon be an affliction that no one suffers from anymore? Doctors and scientists believe this to be a realistic vision. They have developed what is apparently a miracle cure for deafness – the cochlea implant. But this technical innovation has been rejected by some deaf people, who do not view their condition as an illness that needs to be cured.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**264607 052**

**Bacteriophages – An Alternative to Antibiotics?**

During the Cold War the Soviet Union was cut off from western advances in antibiotics research and therapy. But it developed its own tradition of using bacteriophages to tackle infections. Bacteriophages are viruses that destroy bacteria. Some are believed to do so without harming the patient. The main center for work on bacteriophages is in present-day Georgia. While bacteriophage therapy is used there, it is not permitted in many countries because its effectiveness has not been adequately demonstrated.

**Documentary, 30 min.**, 2011, HD; Arabic, English, Spanish; LR

**264607 054**

**Tackling Cancer with Heavy Ions**

Some tumors cannot be completely removed by surgery. Affected patients are now pinning their hopes on a newly developed heavy-ion accelerator. Using powerful magnetic fields, the device charges particles into a beam that can destroy diseased tissue with the utmost precision.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264607 056**

**The Power of Protein – Can It Help Treat Cancer?**

Scientists have discovered that patients with skin, liver or colon cancer have reduced levels of CYLD. It is a protein that inhibits the growth of tumors. But it will be some time before these findings can be applied to the development of any new cancer therapies.

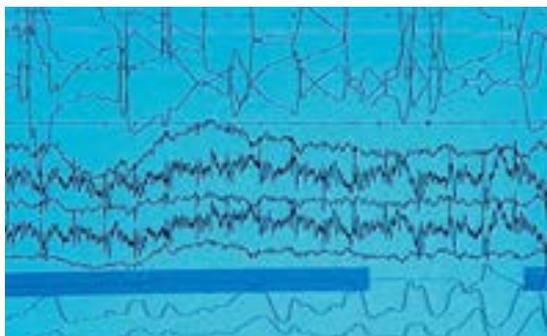

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264607 057**

**Update on Aspirin**

Aspirin is one of the best-known medications in the world. It is usually taken to alleviate pain. But recent research indicates that it may have significant other uses, for example in the prevention of colon cancer.

**Documentary, 30 min.**, 2012, HD; Arabic, English, Spanish; LR

**264607 058**

**Women Get Sick Differently**

When it comes to afflictions of the body and mind, women deal with them in a different way to men. Women also experience illness in different ways. These well-known facts are rarely considered by doctors, scientific research and the pharmaceuticals industry. There are however signs that this attitude is changing, albeit slowly, within the medical industry, which is dominated by men.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**264607 059**

**The Stone Age Approach – A New Take on Old Remedies**

Scientists around the world are currently fascinated by a new perception of the human body. They are attempting to understand how our evolutionary history has influenced the kinds of diseases that affect our lives, and are developing treatments from knowledge of how people lived in the Stone Age.

**Documentary, 30 min.**, 2012, HD; Arabic, English, Spanish; LR

**264607 060**

**Flu Vaccines – A Challenge for Science**

Flu viruses are highly adaptable. Researchers track down suspicious mutations and dangerous viral combinations across the globe. In response to a rise in new strains of potentially lethal flu, the scientists' goal is to develop super-flu vaccines early enough to prevent epidemics.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**264607 061**

**When Back Pain Strikes – Which Treatments Can Help?**

Back pain is a common complaint in the modern world. One key cause would appear to be an increase in pressure and stress in the workplace, resulting in prolonged tension in the muscles of the back. Latest research shows that such pain can be alleviated using a combination of different therapies.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

**264607 062**

**The Crucial First Hour – New Emergency Rescue Concepts**

In a medical emergency, it is essential to initiate treatment as quickly as possible. Doctors all over the world are developing new strategies to make optimal use of the first hour following the occurrence of a traumatic injury. That window of opportunity is known as the 'golden hour'.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; VoD, LR

**264607 063**

**Covering up the Evidence – When Doctors Make Mistakes**

Tens of thousands of people die every year as a result of mistakes in their medical treatment. Fear of the consequences often leads doctors to cover their errors up or deny them. But the frequency of such mistakes can be considerably reduced with the help of systematic analysis, simple checklists and regular training.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**264607 064**

**Tuberculosis – A Disease Returns**

For decades it was thought that tuberculosis had been eradicated. Now the disease is spreading again – at an alarming pace. The pathogens have developed resistance to the usual antibiotics. Because research into TB ceased, no new drugs are available. So the battle has recommenced.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

**264607 065**

**The Burnout Enigma**

It would appear that nowadays nobody is safe from the threat of burnout, whatever his or her occupation. Burnout, or long-term exhaustion, is primarily caused by perpetual pressure and stress in the workplace. Various therapeutic approaches are being explored, but the best protection is provided by mindfulness and prevention.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**264607 066**

**Healing Foods**

Can changing your eating habits not only prevent the occurrence of disease, but cure illness as well? An increasing number of conventional medical practitioners are embracing ideas and methods developed in traditional Ayurvedic medicine. A change in diet can make a big difference even for patients with certain forms of cancer and heart disease.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

**264607 067**

**Healing in Harmony with the Body Clock**

These days, many people lead lives that are out of synch with the body's natural healthy rhythm. The consequences are insomnia, depression, diabetes, even dementia. By administering doses of medication in harmony with the body clock, doctors are achieving astonishing results.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 068**

**Electric Shocks Against Pain – New Approaches in the Treatment of Migraines**

Often, it's a long time before migraine sufferers are correctly diagnosed. But now it's possible to spot and treat the disease early. One option is botox, another electric impulses that block the nerves at the back of the head.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**264607 069**

**Varicose Veins Adieu – The Possibilities of Radiowave Therapy**

Patients with varicose veins are usually advised by doctors to have the affected veins removed from the leg. It's an effective, but messy treatment. Radiotherapy is a gentler method. It's just as effective, and involves hardly any loss of blood.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**264607 070**

**No More Joint Pain – Treatment Using the Body's Own Cells**

It sounds like a vision of the future: A defective part of the body is reproduced in a test-tube using the body's own cells and repaired. In the case of injured joints such as hips, knees or shoulders this is no longer a vision, but a reality.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**264607 071**

**When Cold Saves Lives – The Power of Cool Temperatures**

It's not a pleasant experience to wait for 10 minutes in a cold chamber at a temperature of minus 110 degrees Celsius – but for patients with severe rheumatism, it's an effective way of alleviating pain for long periods. Cold is also used as a treatment to prevent brain damage in stroke patients.

**Documentary, 30 min.**, 2015, SD; Arabic, English, Spanish; LR

**264607 072**

**Cancer Prevention – Opportunity or Risk?**

Everyone fears a cancer diagnosis. That's why many people attend precautionary examinations. But scientists are regarding these with increasing skepticism. This is because early screening tests aren't always reliable. A false diagnosis can plunge patients into a crisis, or result in them being given unnecessary treatment.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 073**

**Stroke – Every Minute Counts**

Every year more than 15 million people around the world have a stroke. Almost half of them then have to contend with the resulting damage to their health. Doctors hope a new range of treatments will help reduce this number significantly.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 074**

**Prostate Cancer – Gentle Treatment Provides Hope**

Prostate cancer is one of the most common cancers in men. New, gentler operative procedures can target aggressive tumours more precisely without complete removal of the prostate gland.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**264607 075**

**Rheumatism – How to Relieve the Pain**

Rheumatism is an umbrella term for a variety of ailments affecting the joints, bones, muscles, tendons and ligaments that often cause intense pain. There is still no cure for rheumatic diseases, but there are various ways to ease the pain.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**264607 076**

**Back to Life – How Medics Are Outwitting Death**

In cases where there used to be no hope of saving a life, doctors today can do exactly that if the right equipment is to hand. For example, mobile heart-lung machines, mechanical cardiac massage devices and cooling mats to decelerate damage to and loss of brain cells.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 077**

**Pain – A New Approach to an Old Complaint**

The brain is capable of deciding on a case-by-case basis whether and how intensively we experience pain. It is even able to blank out pain altogether. This insight is finding increasing application in the treatment of disease.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**264607 078**

**Battle Against Sepsis – New Research Brings Hope**

Sepsis must be treated quickly to prevent organ failure or death. A new device makes it possible to diagnose sepsis quickly and easily, and there has been progress in developing a drug to fight the potentially life-threatening condition.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**Alcohol Addiction – Are Brain Pacemakers the Cure?**

Doctors in eastern Germany are attempting to cure people of alcohol addiction by using a brain pacemaker that is normally used in the treatment of Parkinson's disease. Electrodes are implanted in the brain to suppress the craving for alcohol.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**264607 080**

**Chronic Disease – Protection Through Germs**

One in every three children in Europe is chronically ill, while in the US completely healthy children are the exception. Doctors suspect that too much hygiene may be the reason. Studies show that exposure to germs and dirt boosts the immune system to keep us healthy.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 081**

**The Human Microbiome – Maintaining Good Health with Useful Bacteria**

The skin, intestine and numerous other human organs are home to a multitude of micro-organisms. Not only are these harmless, they actually make vital processes such as digestion possible. But these microbe communities are often damaged by an unbalanced diet, antibiotics or excessive hygiene, resulting in serious illness.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, LR

**264607 082**

**Elimination Using Microparticles – The Gentle Alternative to Surgery**

Many women are diagnosed with benign uterine tumours. When they cause severe symptoms, gynaecologists can recommend removal of the uterus. But there is a less drastic alternative: Blocking the flow of blood to the tumours with small particles. A similar method is used to treat benign prostate enlargement in male patients.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 083**

**The Doctor as Detective – Tracking Down Unknown Diseases**

There are cases in which doctors simply cannot identify an ailment. Some patients consult numerous specialists over the years without ever getting a diagnosis or therapy. A German cardiologist has set himself an ambitious goal: to find the correct treatment for patients whose symptoms challenge the standard diagnostic scheme.

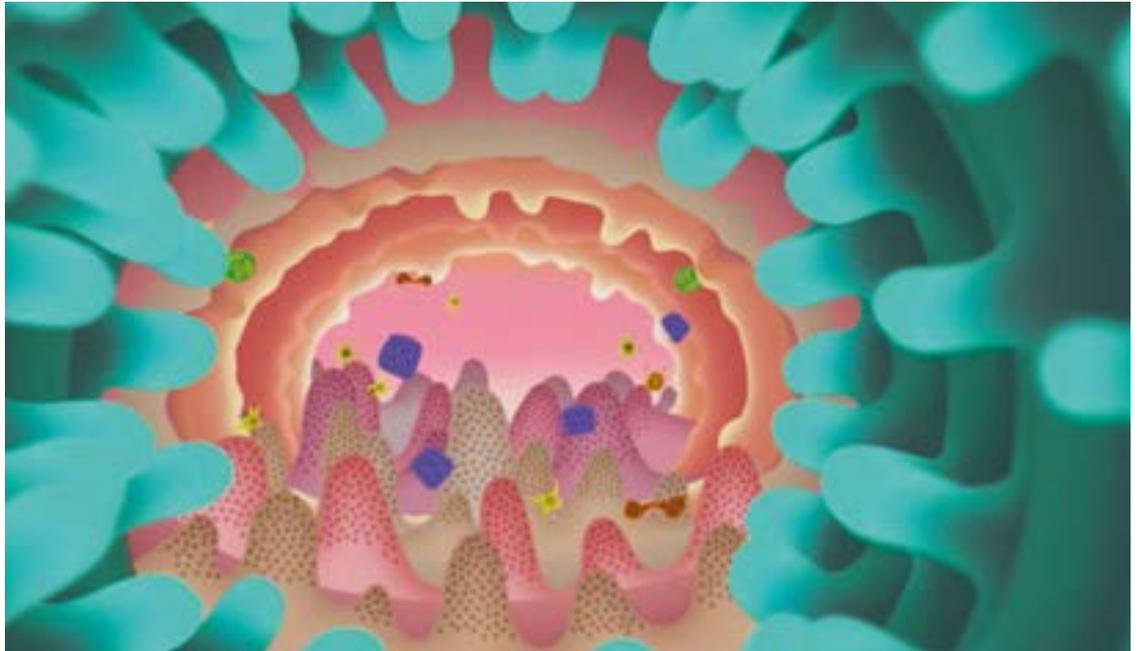

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**264607 084**

**Blocked Arteries – Identified Early, Treated Carefully**

It's usually older people who suffer from blocked leg arteries. That almost always causes severe calf pain and can result in a heart attack or stroke. But if the problem is spotted early enough, there are gentle ways to restore blood flow.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

264607 085

**Food Intolerance – Not Just a Fad Diagnosis**

For some, avoiding foods that contain gluten, lactose or fructose is a lifestyle choice. For others, it is a medical necessity. But the fact that some people are intolerant of these substances does not mean that pasta products, dairy products or certain fruits are basically harmful. Those with sustained digestion problems should see their doctor, as intolerances and allergies can pose serious health risks.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

## The World of Medicinal Plants

From household remedies to natural healing, the spectrum of medicine in the 21st century has never been wider – with research and practice ranging from the traditional to the innovative. We go round the world to explore regional traditions and uncover a few pharmaceutical secrets along the way.

### **The Traditional Medicine of Bhutan – Healing in the Himalayas**

With its fertile soil, the kingdom of Bhutan in the eastern Himalayas is known as the land of medicinal plants. Traditional medicine still serves as the basis for much of its health care. The Golden Needle and herbs are used to relieve pain. Other medicinal plants are used to boost energy levels and potency.

**Documentary, 30 min.,** 2008, SD; English, French, Spanish; LR

**264710 002**

### **Red Bush to the Rescue – The Cure-All Tea**

Rooibos is indigenous to the Cedarberg region of the Cape of Good Hope in South Africa. ‘Rooibos’ means ‘red bush’ in Afrikaans. In the early 20th Century, locals found that the needle-like leaves of the wild *Aspalathus linearis* plant produced a tasty, aromatic tea. These days, red bush tea is sold all over the world. Much of its popularity stems from its alleged healing properties: It has been argued that rooibos can help protect against some forms of cancer.

**Documentary, 30 min.,** 2008, SD; English, French, Spanish; LR

**264710 003**

### **King of the Herbs – Ginseng, the Miracle Cure**

Ginseng is one of the most widely studied medicinal plants in history, staple of traditional Chinese medicine and a cornerstone of the Yin-Yang concept. We report on ginseng farmers and traders, researchers, restaurants, kings and cooks – and of course the rare wild mountain ginseng, which has become as sought-after as gold.

**Documentary, 30 min.,** 2008, SD; English, French, Spanish; LR

**264710 004**

### **Of Weeds and Wonders – Herbs with Healing Properties**

You see them growing wild by the sides of roads and in meadows – dandelions, plantains and masterwort. Everyone knows what they look like, but few know that they have healing properties. We explore the medicinal uses of common weeds that grow around the world – from Bavaria to tropical forests.

## The Great Outdoors: Our National Parks

All around the globe, national parks play a key role in maintaining the ecological balance and biodiversity of our world. As nature reserves, they promote the natural and long-term development of extensive habitats and their species and ecosystems. National parks provide people with the scope and space for scientific research and education, as well as for leisure and tourism. This series takes a fascinating look at national parks all over the world. Using breathtaking footage, we show the unique character of these biospheres.

**164836 001**

### **Vast Expanse – Grand Canyon National Park, USA**

Over millions of years, the Colorado River carved out a path up to 1,800 meters deep into the rock of the eponymous plateau, creating what is probably the most famous canyon in the world. It is a UNESCO world heritage site and the most popular national park in the USA, drawing some five million visitors every year.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 002**

### **Extraordinary Fauna – Humboldt National Park, Cuba**

Cuba is an island with a wide variety of landscapes and is home to unique species of flora and fauna. The Alexander von Humboldt National Park ensures the continuance of one of the most extensive diversity of species in the world, while at the same time providing a place for scientific research and the sheer appreciation of the natural world.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**164836 003**

### **Peaceful Coexistence – Pyrenees National Park, France**

With towering peaks of up to 3,000 meters, the mighty Pyrenean mountain range separates the Iberian Peninsula from the rest of Europe. The Pyrenees national park provides ample space for traditional agriculture in harmony with the seasons, and it offers protection to rare species of animals such as the griffon vulture, brown bear and Pyrenean chamois.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 004**

### **Unspoiled Coastal Forests – Slītere National Park, Latvia**

Dense mixed forest covers the sand dunes at Cape Kolka on the Baltic coast and is home to lynxes, elks, beavers and many other animals. We document the cycle of seasons at Slītere National Park, which is also popular with hikers and mountain bikers.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**164836 005**

### **Underwater Treasure Hunt – Cocos Island National Park, Costa Rica**

Cocos Island in the Pacific Ocean is the subject of many legends telling of pirate treasure. But the uninhabited tropical island's greatest treasure has to be its biodiversity, particularly underwater: This is undoubtedly one of the most spectacular places to dive in the world.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 006**

**Alpine Beauty – Hohe Tauern National Park, Austria**

The Hohe Tauern National Park in the Austrian Alps encompasses mighty glaciers as well as the country's highest peak, the Grossglockner. This fascinating habitat has been shared by animals and people for millennia.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**164836 007**

**No-Limits Eco-Tourism – Krüger National Park and Environs, South Africa**

Krüger National Park is one of the largest game reserves in Africa. But during the dry season, the larger animals often leave the park and enter privately owned nature reserves that specialize in sustainable tourism. Maintaining the animals' freedom of movement is the first step towards enlarging the national park.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**164836 008**

**Protected Paradise – Tubbataha Reefs Natural Marine Park, The Philippines**

Close to the center of the Sulu Sea in The Philippines is the world's most remote national park station. Nine rangers are on duty here protecting the Tubbataha Reef from illegal fishing and damage against the environment. The area, which is a UNESCO World Heritage site, is one of world's most spectacular diving regions and is regarded as a key breeding ground for many threatened species in the largely depleted waters of The Philippines.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 009**

**The "Green Roof" of Europe – Šumava National Park, Czech Republic**

Along with the adjacent Bavarian Forest National Park in Germany, the Czech Šumava National Park forms central Europe's largest continuous forested area. Mountain plateaus and upland moors are characteristic features of the landscape. Along what used to be the heavily fortified "Iron Curtain", nature was left to flourish undisturbed. Animals here still avoid the area along the old border even though it is long gone.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**164836 010**

**Guardians of the Holy Mountain – Mount Kenya National Park, Kenya**

At 5,200 meters, Mount Kenya is Africa's second tallest mountain. It straddles the equator and is the heart of the Mount Kenya National Park. The mountain is considered holy by the communities living near it. The unique fauna of the Mount Kenya National Park attracts poachers. Rangers protect the wildlife and assist visitors from around the world who come to climb the peaks.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 011**

**A Desert by the Sea – Lençóis Maranhenses National Park, Brazil**

The dunes of Brazil's only desert, which extends from the Atlantic through the federal state of Maranhão 40 kilometers inland, call to mind enormous bed sheets. This is in fact the name of this National Park, which protects the bizarrely beautiful landscape of windswept dunes and crystal clear, deep blue freshwater lakes. Rangers ensure that tourists only enter the park on specially guided expeditions.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**164836 012**

**Conservation as Opportunity – Phong Nha-Ke Bang National Park, Vietnam**

Phong Nha-Ke Bang National Park is a UNESCO World Heritage site and one of the world's largest karst regions, with hundreds of caves and grottoes. There are also mountains and extensive tropical forests, home to a wide range of species. Tourism is flourishing, and that provides local people with a source of income. But even forty years after the end of the Vietnam War, Phong Nha-Ke Bang is still riddled with unexploded mines and bombs, which pose a serious risk to humans and animals.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 013**

**Surrounded by Ice – Glacier Bay National Park, USA**

The Glacier Bay National Park in southwest Alaska comprises more than 50 glaciers. The calving of the glaciers in the bay is a show-stopping natural spectacle. Receding ice levels have resulted in the development of an ecosystem that is just 200 years old, which also provides scientists with exciting research opportunities.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 014**

**Rebuilding a Reserve – Bouba Ndjida National Park, Cameroon**

The national park in northern Cameroon was established in 1968. After many years of neglect, it is once again being actively managed, thanks to close cooperation between the park authority and people living there. Bouba Ndjida is a refuge for eland antelopes, primates, wild cats, elephants and many other species.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 015**

**Nature Conservation Out at Sea – The Strait of Bonifacio International Marine Park, France and Italy**

This international marine park comprises a nature reserve on the French island of Corsica, a national park on the Italian island of Sardinia and the stretch of sea in-between, the Strait of Bonifacio. It is both a busy waterway and a protected ecosystem, frequented by supertankers and by rare animal and bird species. That presents conservationists with ecological and economic challenges.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 016**

**Newfoundland's Raw Beauty – Gros Morne National Park, Canada**

Canadians simply refer to the island of Newfoundland, situated to the east of the mainland, as "The Rock". The harsh climate of the North Atlantic defines the isolated rocky island and its fauna, with several species unique to the area. The national park plays a key role in the protection of the natural environment and the cultural legacy of the Newfoundlanders, preserving them for future generations.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; LR

**164836 017**

**Underwater World in Need of Protection – Western Pomerania Lagoon Area National Park, Germany**

The park serves to protect a unique landscape both beside and in the Baltic Sea in northeastern Germany. Research divers are documenting the little-known underwater world, thereby drawing attention to both the beauty of and the threat facing the fragile ecosystem there. A night dive provides marine biologists and photographers with new insights.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 018**

**Spectacular Mountainscapes – Rocky Mountain National Park, USA**

Visitors to the state of Colorado in the heart of the United States are greeted by a pristine environment of mountains and animal habitats with breathtaking views. There are more than 60 peaks over 4,000 meters here, in one of the highest national parks in the country. Adventurers can explore the wilderness on horseback.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**164836 019**

**Habitat for People and Animals – National Park of Abruzzo, Lazio and Molise, Italy**

There are only a few dozen Marsican brown bears left in the wild. They are native to the rugged mountains and forests in and around the national park in the Apennines east of Rome. Wildlife photographer Bruno D'Amicis promotes conservation and sustainable tourism here in the wild heart of Italy, where you can observe bears, wolves, deer and chamois in their natural surroundings.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; LR

## Let's Go Wild

In rainforests, in savannas, in the mountains or at the depths of the oceans – all over the world, animals have adapted biologically and behaviorally to their differing habitats. In recent years and employing up-to-the-minute technology such as high-speed cameras and ultra-sensitive sensors, filmmakers have been able to capture extraordinary images of animals and their habitats thus far shielded from the gaze of humans. The more we learn about how animals live in the wild, the more amazed we are at the marvels they represent.

**164817 001**

### **Serengeti Adventure – Capturing Animals on Camera**

The endless expanse of the Serengeti in eastern Africa is one of the world's best-known wild animal habitats. Reinhard Radke spent two years there observing herds of gnus, crocodiles and cheetahs to create a fascinating and breathtaking film.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 002**

### **Andean Bears – The Shy Mountain-Dwellers**

The only bear native to South America lives in the cloud forests of the High Andes. Andean bears are the last remaining species of short-faced bear. The diet of these timid creatures consists primarily of plants and fruit, though they will occasionally attack and kill for meat. The Andean bears and their habitat are largely unprotected, and humans are posing an increasing threat to the population.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**164817 003**

### **Africa's Largest Elephants – Big Tuskers**

Big Tusker is the name given to Africa's most powerful bull elephants, whose tusks weigh at least 50 kilograms each. There are thought to be just 40 surviving Big Tuskers on the entire continent. At the Krüger National Park in South Africa, we gain an insight into the lives of Africa's last giants.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**164817 004**

### **Polar Bears in the Grass – Canada's Remarkable Predators**

Hudson Bay in northeastern Canada is home to the world's only polar bears that live mainly in forests and on grassland, which are only covered in ice during the winter. Once that ice has melted, the bears are forced to revert to a predominantly herbivorous diet, and a tough battle for survival begins again.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**164817 005**

### **Giant Anteaters – The Peculiar Loners**

Whether in marshlands, forests or savannas, the giant anteater can be found in a range of habitats in Central and South America. Regardless of where it lives, the anteater's chief concern is to find an abundance of ants and termites. We observe these curious animals in the pristine tropical wetlands of the Pantanal basin in Brazil.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**164817 006**

### **Dragonflies – Agile Hunters of the Air**

Dragonflies have lived on earth for 320 million years. They spend most of their lives as larvae underwater, until they emerge as adults and take to the skies as consummate hunters. Using high-speed cameras, we show the complex beauty of a dragonfly's flight.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; VoD, LR

**164817 007**

### **Anaconda – The Queen of the Snakes**

The anaconda is one of the largest snakes in the world. Some specimens grow to a length of nine meters. When it comes to the lives of these huge reptiles, there are still many unanswered questions. Anacondas inhabit the northern lowlands of South America, and spend much of their time under water. We visited some living along the rivers of a remote Brazilian forest.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**164817 008**

### **Kea – New Zealand's Quirky Parrots**

Kea or Mountain Parrots are among the most intelligent birds of all. The only parrots that can live in snowy climes, they are highly playful creatures that like to experiment. This makes them unpopular with people who live in the alpine regions of New Zealand, where few pieces of technical equipment are safe from the inquisitive birds.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 009****Giant Otters – The Sociable Hunters**

Giant otters live in the rivers, lakes and swamps of South America's tropical rainforests. Apart from their size, their highly developed social behavior also makes them distinct from other otters. The animals live in groups of up to 10 and hunt, sleep, play and raise their young together.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**164817 010****Termites – Highly-Efficient Builders**

They shy away from sunlight and some species are even blind, but termites are outstanding architects, perfect road builders, optimally organised harvesters and, above all, efficient users of energy. Their nests are architectural works of art and are home to highly-complex societies made up of different castes with specialist functions.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**164817 011****Jaguar – The Majestic Beauty**

The jaguar is the world's third-largest cat, and king of the South and Central American rainforests and savannas. These animals prefer habitats that are humid and close to the water, and occupy large swathes of territory which they patrol alone. The jaguar was revered as a deity in many Native American cultures. But to this day, little is known about its way of life.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**164817 012****Raccoons – Adaptable Cosmopolitans**

The raccoon is indigenous to North America, where it is a common sight. But now there are also large populations of the animal in Europe. Recent research shows that they inflict very little damage on the biodiversity of their new homes. The intelligent, adaptable mammals are omnivores that are active at dusk and during the night, and they evidently like to live in close proximity to humans.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 013****Meerkats – Vigilant Foragers**

Meerkats live in arid regions of southern Africa. They lead a highly sociable existence in groups of up to nine, feeding mainly on insects and other arthropods. Several groups can join together to form a mob, which then shares an underground burrow complex.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**164817 014****Indian Lions – The Kings of Gujarat**

Lions are not only indigenous to Africa. They were once a common sight in Asia too. Today, only a few hundred are left there, and they all live in and around the Gir Forest National Park in the Indian state of Gujarat. Thanks to a comprehensive protection scheme, the population is beginning to recover.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**164817 015****Manatees – Friendly Giants of the Caribbean**

Many West Indian manatees like to spend the winter in the warm waters of Florida, gathering at springs or in river estuaries. But there they face the constant danger of collision with motor boats. Many manatees are injured or killed by propellers. If they are lucky, the wounded are taken to their very own hospital at Tampa Zoo.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 016****Komodos – The Last Dragons**

The Komodo dragon is the world's largest species of lizard, and can be found in the Lesser Sunda Islands of Indonesia. Komodo dragons are hunters and scavengers that feed on large animals. They also eat smaller members of their own species. Toxins in their saliva help incapacitate their prey.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**164817 017****White Storks – Europe's Summer Guests**

As winter approaches in the northern hemisphere, white storks head south to sub-Saharan Africa or southern Asia. The return journey takes many to Central Europe, where they spend the summer. There they have about 100 days to find a mate, breed and raise their young before their next departure.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 018**

#### **Hippopotamuses – Heavyweight Water Dwellers**

Hippos are among the world's heaviest land mammals. They live in Kenya, Zambia and other countries of sub-Saharan Africa. They spend their days bathing in rivers. By night, they graze on land. They may appear docile, but when it comes to defending their young, hippos can become extremely aggressive.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 019**

#### **Monarchs – The Long-Haul Butterflies**

Monarch butterflies have striking orange and black wings and live in North America. But what makes them very special is their annual two-way migration to sunnier climes in Mexico and back again. It takes three or four generations to make the lengthy trip. Their mass migration is a magnificent spectacle.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**164817 020**

#### **Asia's Rhinos – Rare Loners**

The Sumatran rhino is a critically endangered species. It's thought they may number less than 200. Its larger relative the Indian rhinoceros is faring only slightly better, with around 3,000 animals living in parts of northern India and Nepal. Members of both species live mostly solitary lives.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**164817 021**

#### **Amur Tigers – The World's Biggest Feline Predators**

The Amur tiger is the largest living tiger subspecies. There are only 500 of them, and they live in eastern Russia, China and North Korea. No other tigers live so far north. The primary threats to these majestic hunters are the degradation of their habitat and poaching.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**164817 022**

#### **Dormice – Agile Nocturnal Climbers**

The dormouse is a cute and cuddly rodent common in parts of Europe and Asia. They are nocturnal and they hibernate for up to seven months. When they're not sleeping, they spend much of their time climbing in trees and bushes. While other animals have an entire year, dormice are under pressure to complete all the tasks necessary for their survival during the short summer nights.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 023**

#### **European Brown Bears – Masters of the Carpathians**

The brown bear is the largest land-based carnivore in Europe. These days, it only lives in highly inaccessible regions. There are several thousand bears still living in the Carpathian Mountains of Poland, Slovakia, Romania and Ukraine. Here, they preside over the food chain and fulfil an important ecological role.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 024**

#### **Sperm Whales – The Deep Divers of the Animal Kingdom**

Sperm whales are the largest species of toothed whale. They hunt large squid at depths of up to 3,000 meters, and are present in all the world's oceans. Hunted intensively in the past, they are still considered an endangered species. Sperm whales display complex social behaviors, but we still know very little about them.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**164817 025**

#### **Asian Elephants – The Thoughtful Giants**

Asian elephants are a little smaller than their African cousins. Their temperament is considerably gentler, which is why they are still used as working animals in Asia to this day. In the wild, Asian elephants are nocturnal and semi-nocturnal and can be found in a diverse range of habitats – places that are increasingly encroached upon by humans.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**164817 026**

#### **Red Wood Ants – Eurasia's Forest Police**

Red wood ants improve the soil, spread plant seeds, remove cadavers and prevent the mass reproduction of other insects: they are hugely important for the ecosystem of the forests of Europe and Asia. They are a protected species in some countries, but occasionally it is necessary to relocate a colony.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

## The Allure of Nature

Mountain peaks that tower skywards. Beaches shaped by the force of ocean waves. Fjords that reach far into craggy mountainscapes like glistening arms. Deserts that form fantastical panoramas of ever shifting sands. Ancient forests that have an aura of dignity and tranquility. Animals that enter into a harmonious union of incredible complexity and perfection with their natural habitats. The diversity of the natural world is the Earth's greatest asset. We celebrate The Allure of Nature in breathtaking images.

**164797 001**

### **The Islands of the North**

Iceland is a place to experience the elemental forces of nature at first hand. The island, located between the European and American continents, is a stunning example of the forces that have shaped our planet. The ice-covered neighboring island of Greenland offers a tranquil contrast. The calving of the gigantic glacier in the Ilulissat icefjord is an especially majestic sight.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**164797 002**

### **In Search of Water**

The most beautiful part of the African desert region of Ténéré is where it is most hostile to life – at its heart, where huge ocher sand dunes dominate the landscape. Here, not even the native Tuareg are able to find water. The search for this life-giving element also dominates the existence of animals in the Serengeti, where sprawling herds roam the savanna during the dry season.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**164797 003**

### **Created by the Gods**

As legend would have it, Australia's Fraser Island is a beautiful goddess who wanted to remain on Earth forever. The world's largest sand island can boast an astonishing variety of vegetation. The sacred Mount Tongariro in New Zealand is also shrouded in legend. The region encompasses spectacular volcanic phenomena as well as diverse flora and fauna.

### **The Mysteries of the Pacific**

Two of the natural wonders are in the Pacific Ocean – and are not immediately obvious to the eye. The Galápagos archipelago in the eastern Pacific is an evolutionary laboratory with incomparably rich animal and plant life. On the other side of the ocean, beneath the surface of the water, are the paradise gardens of the Great Barrier Reef.

### **Breathtaking Sights**

Just a century ago, the inhabitants of the western US found themselves having to contend with two almost insurmountable natural obstacles: the Rocky Mountains and the Grand Canyon, which plunges almost two kilometers at its deepest point. Today both are easily accessible, but they still have the power to take our breath away.

### **Powerful and Unpredictable**

The Perito Moreno Glacier in Patagonia, southern Argentina, continues to grow. At irregular intervals, its errant masses of ice dam up Argentino Lake until the water pressure builds and shatters the icy barrier. Three thousand kilometers to the north, the seasonally fluctuating water volumes of the Río Iguazú come crashing down in one of the Earth's most powerful Falls.

**164797 007**

### **Mountains of Fire**

There are no fewer than 170 volcanoes on the Kamchatka Peninsular in Russia's far east. The region is a natural paradise with diverse and abundant wildlife, including very large brown bears. The Kilauea Volcano is located on the island of Hawaii. It is one of the most active volcanoes in the world, and has been continuously erupting lava since 1983.

## Struggle for Survival

One in every four species of mammal, one in every eight species of bird and a third of all amphibian species are threatened with extinction. The diversity of life on our planet is declining at an alarming rate. The International Union for Conservation of Nature's Red List of Threatened Species shows that not enough is being done to save them. The number of species on it has increased dramatically. Immediate, drastic action is required to preserve valuable habitats and halt the extinction of species.

### **Grzimek's Legacy in Africa**

The Swiss biologist Dr. Markus Borner is one of the conservationists who worked personally alongside Prof. Dr. Bernhard Grzimek. Together with his son Michael, Grzimek produced the movie "The Serengeti Shall Not Die", the first German documentary film to be awarded an Oscar. The Serengeti is Dr. Borner's place of work. The TV crew joined him on an excursion to see just what has become of Grzimek's legacy.

### **Hama – A Rhinoceros, a Stranger in Africa**

A young black hook-lipped rhinoceros comes from Frankfurt Zoo to Africa, to boost dwindling numbers of the endangered species as quickly as possible. A zoo animal released into the wild has much to learn: it must cope with a new environment, learn to locate food independently, and find its place among the wild animals whose territory it must now share. Will Hama overcome the challenges?

### **Grzimek's Legacy in South America**

Prof. Dr. Bernhard Grzimek was the man who brought the animals of this world into German living rooms, with his television series "Ein Platz für Tiere" (A Place for Animals). When he let a fully-grown South American marine iguana run over his desk, a creature he knew Germans had never seen before, he not only fascinated people, he also mobilised them to support the preservation of the world's last paradises. The camera crew follows in the footsteps of those who have taken up Grzimek's cause, and who fight for the protection of threatened habitats and species in South America.

**264702 004**

### **Bears in the Andes**

Few South Americans are aware that they share their homeland with a large species of bear: the Spectacled, or Andean Bear. The animals are descended from the largest primeval beasts of prey bears since the demise of the dinosaurs. They are still threatened with extinction to this day. Their natural habitat, the cloud forests of the Andes, is continually in decline, and they are also at the mercy of hunters.

**Documentary, 30 min.**, 2008, SD; Arabic, English, French, Spanish; LR

**264702 005**

### **Grzimek's Legacy in Asia**

Grzimek's successors are also active in Asia, for example in The Philippines and Indonesia. They are the resolute guardians of such magnificent wild animals as the langurs of Vietnam, the writhed-billed hornbills on the Philippine island of Panay, or the Sumatran orang-utans.

**Documentary, 30 min.**, 2008, SD; Arabic, English, French, Spanish; LR

**264702 006****In the Forest of the Hornbills**

For the dulungan, as the locals call the hornbill, survival has become a difficult challenge. Its habitat consists of just a few meagre remnants of the rain-forest on the Philippine island of Panay. In addition, the flesh of the bird fetches a high price as a luxury snack. Thus the number of dulungans is decimated by around 50 percent every year. Conservationists from Germany have developed a plan to turn former poachers into the birds' protectors.

**264702 008****Gardens of the Oceans – Seagrass Fields in Mozambique**

Seagrass fields are some of the most productive ecosystems in the world, but they are under threat because of natural and human factors. One rare and extremely shy species that feeds exclusively on seagrass is the dugong or sea cow. The loss of seagrass fields means the dugong's fate is very uncertain.

**Documentary, 30 min.**, 2009, SD; Arabic, English, Spanish; LR

**264702 010****On the Tuna Fish Trail**

Tuna has featured on Mediterranean menus for more than 4,000 years. But man is not the only predator to lie in wait as tuna come from the Atlantic to the Mediterranean to spawn. This documentary looks at the dramatic decline in tuna stocks, but also explores the beauty and diversity of species of fish still to be found in the Mediterranean.

**264702 011****Arctic Fox in the Ark**

Nordens Ark in western Sweden is a beautiful and special zoo located in a wonderful landscape beside a fjord. Its main task is to breed rare species such as the arctic fox, snow leopard, wolverines and European wildcats.

**Documentary, 30 min.**, 2009, SD; Arabic, English, Spanish; LR

**264702 012****Dhole – The Disappearing Dog**

Once widespread in Asia, today the Asiatic wild dog – the dhole – is practically only found in India. But even there, its survival is under threat. Until recently, the dogs were hunted or poisoned mercilessly. The film observes these timid creatures in their natural habitat, the jungle of Periyar.

**Documentary, 30 min.**, 2009, SD; Arabic, English, Spanish; LR

**264702 014****Elephant Villages**

The locals call them the "elephant villages". They are located in the Dzanga-Ndoki National Park in the Central African Republic. They are clearings in the swamp forests where groups of rare forest elephants gather. Little is known about the African elephant's smaller relative. It is thought that about 200,000 still live in the tropical rainforests of Central and West Africa. But their habitat is under serious threat.

**264702 015****Douc Monkeys and Their Coats of Many Colors**

Douc monkeys have very distinctive, vividly colored fur. Three species of Doucs live in the rainforests of Vietnam, Laos and Cambodia, and they are all threatened with extinction. The primary dangers are posed by the destruction of their habitats as well as the illegal hunting and keeping of the animals. The Endangered Primate Rescue Center in Cuc Phuong National Park in northern Vietnam is working to ensure the survival of the Doucs and other species of primate.

**264702 016****The Atlantic Salmon Returns to the Rhine**

In the mid-1980s, all the nations along the Rhine agreed on a unique, joint nature conservation program to re-introduce the salmon, a fish that had been eradicated in the contaminated waters of the western European river. The program has succeeded in reestablishing the pollution-sensitive fish – in one of the world's busiest waterways with its attendant throng of people and industry.

**Bringing Back the Bush Dog**

Many packs of bush dogs used to roam Brazil's Atlantic rainforest, the Mata Atlântica. It originally covered an area of about two million square kilometers, but large-scale clearing has reduced the forest to just seven percent of its original size. Bush dogs are so shy and have become so rare that few Brazilians have ever seen one. Biologists are doing their utmost to try to preserve the species.

**Wolves in Gran Paradiso**

While wolves, along with bears and lynxes, were wiped out in Central Europe, a small population of wolves survived further south in the Apennine Mountains of Italy. Thanks to a variety of protective measures, their numbers are again rising. Scientists have been surprised to establish that some have moved north and now live in the Alps. But this could lead to a conflict of interests between wolf and man, for which new solutions must be sought.

**The Peaceful Monkeys of Brazil**

Brazil's Atlantic rainforest is home to the largest and most threatened monkey species in the Americas: the muriqui. US biologist Karen Strier has been observing this monkey's extraordinary behavior

for several decades: In comparison to other primates, relations between male muriquis within a troop are extremely harmonious. But this unusual animal's survival is threatened by the deforestation of their habitat.

**Hunting Down Peru's Butterflies**

Peru's rainforests are home to an array of magnificent butterflies. Collectors are ready to pay huge sums of money for fine specimens. This has given rise to a roaring trade in butterflies that have been hunted almost to extinction in the forests. As so often the collector's demand for rare species becomes a threat to their very existence.

**Surrogate Moms for Wombats**

Wombats used to be regarded as vermin in Australia and were hunted mercilessly. Of the three surviving species, one is in acute danger of dying out: the northern hairy-nosed wombat. Scientists and former hunters are looking at ways to save the dwindling population. One approach is to use southern hairy-nosed wombats as surrogate mothers.

**Beavers: Overprotected or Over Hunted?**

In Germany, the beaver was almost extinct. The rivers dammed up by its constructions put precious arable land underwater. Today, public perception of the animal has been turned on its head. The population has grown again, and the marshlands created by beavers are viewed as valuable biospheres. It's a different story however in Tierra del Fuego, at the southern tip of South America, where authorities have launched a massive program to eradicate the animals.

**The Vulnerable Nile Crocodile**

The Nile Crocodile was under threat from intensive hunting until the mid-1990s. Since then, a number of protective measures have led to a recovery in numbers. But the sudden death of masses of the animals in Olifants River in the South African Kruger National Park shows that even species with healthy populations can be vulnerable.

**Back on the Prairie: The Black-Footed Ferret**

The black-footed ferret was once just as common on the North American prairie as its most important prey, the prairie dog. The slender ferrets live in vacant prairie dog burrows. It appeared as though depleted prairie dog populations had led to the extinction of the ferret. But small populations were discovered in 1981 and are now flourishing again in the US and Canada, thanks to breeding programs.

**New Home for the Tree Frog**

European tree frogs are small and green and can be heard for miles during mating season. They need pools free of fish to spawn, hedges and trees to hunt, and burrows to hibernate. Agriculture and river re-routing have destroyed many such landscapes. But the tree frog is now being introduced to a new habitat in western Germany.

**The Dolphin Farm**

Dolphins such as the bottlenose are becoming increasingly rare: they are finding less food, and fishermen view them as competition. To the north of the Italian island of Sardinia, a group of these animals is displaying astonishing behavioral changes. Interacting with a fish farm, they have found a new habitat and source of food. The changes have no detrimental effect on the aquaculture.

**Tasmanian Devils Under Threat**

The Tasmanian Devil is the world's largest carnivorous marsupial and a symbol of the islands of southern Australia. The animal is facing two challenges to its existence: 90 percent of its population has been killed off by an aggressive, infectious type of cancer, and cars are a significant threat to the rest. Animal activists and environmentalists are doing all they can to safeguard the species from extinction.

**Rhinos for the Serengeti**

The Serengeti in Tanzania is famous for its huge herds of herbivorous animals and the large feline predators that hunt them. Rhinos are the only animals that have almost completely disappeared from the national park, hunted almost to extinction by poachers. While heavily armed rangers try to protect the animals that are left, black rhinos from South Africa are being flown into the Serengeti to boost numbers.

**Albatross Island**

Several species of albatross nest in the middle of the stormy Antarctic Ocean on Bird Island. Populations are facing severe pressure; many birds are killed by long-line fishing. No other animals travel so far so fast as albatrosses. They can circumnavigate the globe in just a few weeks, almost without flapping their wings. The inhabitants of Bird Island have been the focus of the British Antarctic Survey for more than 50 years.

**The Disappearance of the Belugas**

Beluga whales can be found in most Arctic and sub-Arctic waters. One of their most southerly populations is in the St Lawrence Estuary on the eastern coast of Canada, and it's in decline. Not only are the animals here isolated from other populations, they're also exposed to harsh environmental pressures. Researchers are trying to pinpoint the factors contributing to the decline in beluga numbers.

#### **Bearded Vultures over the Alps**

The bearded vulture is a huge raptor that feeds primarily on bones. It lives in mountain regions of Asia, Africa and Europe. For a long time, it was erroneously regarded as a predator of herds and hunted to the brink of extinction. It was reintroduced to the French Alps 30 years ago; breeding pairs are now well established.

#### **Asian Black Bears in the Ussuri Krai**

The Asian black bear is prevalent in southern and eastern Asia. One of its subspecies – endangered like all the others – is the Ussuri black bear, which lives in the region of the same name in the far east of Russia. Poaching and the destruction of the bears' habitat are huge problems. Biologist Alex Sedow is trying to find ways to protect the population.

#### **The Crocodiles of the Okavango**

The Okavango River begins in Angola, crosses a section of Namibia and then discharges into a closed basin in Botswana. It is home to Nile crocodiles, which are hunted as they pose a potential threat to humans. But the animals play an important ecological role: they eat large catfish, preventing these from proliferating and decimating stocks of other fish in the Okavango, which represent the livelihood of local people.

### The Serengeti

Since the 1960s, animal welfare activists have been fighting for the survival of the Serengeti, one of Africa's most complex eco-systems, which extends from the north of Tanzania to the southwest of Kenya. In the language of the native Maasai, the word 'Serengeti' means "endless plains". But climate change, population growth and poaching are endangering the land and the many species of animals living there. A team from the German Zoological Society in Frankfurt is working to preserve and protect the Serengeti National Park in Tanzania.

### Indonesia's Orangutans

They have human names like Dora, Suro or Jackie. They also behave very like humans, as they explore their habitat, the rainforests of the Indonesian island of Sumatra, with child-like curiosity. Everything is new for the orangutans, even though they are not babies. In fact, if they could talk, Dora, Suro, Jackie and all the others would have quite a few stories to tell. The animals are aged between 5 and 19 and have spent considerable lengths of time in captivity, as pets or as objects of prestige. Now, in their jungle school, they must learn to survive in the wild.

### My Favorite

When asked what their favorite animal is, most people think of dogs, cats or horses. But stingrays, sponges and cattle also have their fans. Often, people with a rather unusual favorite are doing something to protect that species: all over the world, nature conservationists are doing their bit for animals – counting and examining them, nurturing the young in breeding centers, or campaigning against poaching, pollution and climate change. Their enthusiasm is infectious and inspires hope that it is perhaps not yet too late for the fascinating creatures of which they are so fond.

## Guardians of Nature

Humans have made the earth their playground. Unspoilt habitats fall victim to merciless exploitation, cleared or ravaged for things it is believed we cannot live without. But we are all part of nature and cannot survive without it. More and more people are realising that the environment is more than just a supplier of cheap and abundant materials. Many are getting involved in nature conservation projects. Some dedicate their fortune, others their time; some even risk their lives. Their aim is the same: to preserve our planet's biodiversity for the future. These people are Guardians of Nature.

### Protection for Threatened Mangrove Forests

The mangroves' bizarrely interwoven root structures represent a unique habitat in tropical and sub-tropical coastal regions. Where salty and fresh water mingle, the mangrove forests provide protection for countless creatures. They are essential for the survival of many species of fish, and therefore for the livelihood of the local population. But mangroves are being destroyed all over the world, by tourism, environmental pollution or, for example in Brazil, industrial shrimp cultivation. Ulf Mehlig and Clemente Coelho are committed to maintaining these indispensable habitats.

### Solidarity Against Drought

Vast swathes of land are turning to desert in Burkina Faso. Climate change is making rainfall on the edge of the Sahara unpredictable. Conflicts among the population are worsening. Communities are breaking up, and entire villages have been deserted. Madame Fanta works for an aid organization run by Muslims and Christians. She is responsible for the construction of boullis, village water reservoirs with fields nearby for small-scale farmers. Pre-conditions for their use are cooperation and tolerance among village residents. The boullis are making it possible for people to remain in their changing homeland.

### An Island for Humans and Monkeys

The Indonesian island of Maratua lies off the coast of Borneo. Sea nomads have settled here, built houses and cultivated fields. But their presence has not gone down well with the indigenous residents of the small island – a population of macaques. Biologist Thomas Ziegler is looking for ways to facilitate the coexistence of humans and monkeys.

### The Arctic Circle's Primeval Forest

The Muddus National Park is situated in the far north of Sweden. At its heart is one of the last primeval forests in Europe. Jan Stuge is a Muddus park ranger. It's his job to make sure people can continue to visit the forest without damaging its sensitive eco-system. After all, the more people experience such pristine natural surroundings, the greater the awareness of the need to protect them.

### Safe Passage for Elephants

Botswana is home to about 130,000 elephants – and that's putting an environmental and economic strain on the human population. Many of the animals originate from regions in Namibia and Angola affected by civil war. Now they are retracing their steps through densely populated areas. Ecologist Mike Chase is trying to establish conservation enclaves that link Botswana with other elephant habitats.

### Saving the Elbe Floodplain

The floodplain of the River Elbe was once an open expanse of meadowland rich in flora and fauna. It was sustained by the grazing habits of large herbivores such as wild horses, wisent and aurochs. Today these areas are monocultures, or have been lost to forest encroachment. Andreas Wenk has now introduced a descendant of the extinct aurochs to the Elbe Valley floodplain.

**Campaigning for Iceland's Landscapes**

Iceland has an abundance of energy sources thanks to its unique geology. Electricity, for example, can be generated almost everywhere with geothermal energy and hydropower. This attracts energy-intensive industries such as aluminium-smelting. Omar Ragnarsson is a journalist and environmentalist who campaigns for the protection of Iceland's unspoiled territories, which he views as the nation's greatest asset.

**Bats to the Rescue**

The government of Costa Rica wants to restore areas of rainforest cut down to make way for agriculture. They will be supported in their reforestation efforts, at no cost, by bats, who will be used to spread seeds. Bat colonies are being established by biologist Detlev Kelm with the help of local farmers.

**Saving the Snow Leopard**

Snow leopards live in mountainous regions of Central Asia. They are hunted by poachers for their fur and killed by shepherds who drive their flocks to higher altitudes and encroach upon the leopards' habitat. In Kyrgyzstan, biologist Thorsten Harder is leading a project to protect snow leopards – in cooperation with an anti-poaching squad who are risking their lives on behalf of the endangered animals.

**The Environment as Public Asset**

Chinese environmentalists Liu Jianqiang and Wu Lihong are employing a new and increasingly effective method in their campaign: publicity. They courageously challenge shocking violations of environmental protection law passed by the Chinese central government. Their opponents are powerful functionaries and local business people.

**Keeping the Balance**

The Etosha National Park in Namibia is one of the oldest in the world. It's the workplace of veterinarian Mark Jago and rangers Johnson Veyorerako and Ole Friede. Together, they are responsible for trying to maintain the delicate balance of flora and fauna within this environment. They also seek to harmonise the interests of nature conservation with those of the people living in the area.

Melting polar caps, devastating hurricanes, and rising sea levels. The changes ascribed to climate change are disheartening to say the least. Our series Global Ideas features people across the world who are pursuing innovative projects to counter global warming. To reduce greenhouse gases, maintain biodiversity, provide food for thought, and promote effective action – these are the goals of the projects we profile. We present initiatives that are exemplary in character and creative in approach. Each show has four reports. All the projects are “best practice” models, featuring ideas worthy of emulation.

### SAMPLE EPISODE 30 MINUTE VERSION

#### Suriname – Sloths Displaced by Deforestation

Tropical rainforest covers more than 90 percent of this South American country. But development is on the rise, and that’s having dramatic consequences for the lush habitat of many unique species. Suriname’s three-toed sloths are particularly affected.

#### South Africa – Making Refrigerated Trucks More Climate-friendly

Refrigerated trucks are bad for the climate – coolants used to keep fruit, vegetables and meat fresh on the road are worse than CO2 emissions. The German Development Agency GIZ and the South African company Transfrig are developing new, more eco-friendly coolants.

#### Bosnia and Herzegovina – Ailing Rays and Sharks in the Adriatic Sea

Sharks and rays in the Adriatic Sea are dying off. Biologists at the University of Sarajevo have made some interesting discoveries. Many of the animals they have examined reveal evidence of liver disease.

#### Uganda – Hydro Power Station Replaces Thousands of Diesel Generators

By 2040, it is believed that the global energy requirement will be twice that of 2015 levels. In Africa, there’s huge potential for large-scale clean energy projects. One is a new hydro power plant on the River Lubilia in southwestern Uganda.

## SOS – Earth Calling!

Massive changes are underway on planet Earth, and many have to do with human actions and their intended and unintended consequences. Greenhouse-gas emissions, pollution and land degradation drive climate change, which poses a threat to the environment as a whole, to biodiversity, and to humankind itself. Global warming is setting a destructive, self-accelerating chain of climatic events in motion, resulting in more frequent natural disasters. More and more farmland is being lost the world over. Some argue that genetically manipulated organisms can help solve the problems, but the consequences of releasing such organisms into the environment are not known.

SOS – Earth Calling! Many people are hearing this cry for help. The nations of the world won't rethink their response to global warming overnight, but local projects can try to mitigate some of the consequences of our blind exploitation of the Earth.

### **Losing Ground – When Fields Turn to Desert**

Rapid worldwide desertification is one of the biggest environmental problems facing our planet. 250 million people in 110 countries are threatened by this process of degradation, which is jeopardizing food supplies for one sixth of the world's population. A variety of projects show that something can be done to reduce the advancing devastation.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564771 002**

### **Ecocide – Canada's Oil Sands**

Canada holds the world's second largest oil reserves. But that oil lies hidden in layers of sand up to 70 meters below the surface. In order to extract it, gigantic wounds are being torn in the untouched Canadian wilderness. The process is having a catastrophic effect on the environment and on people living in the region.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564771 005**

### **Coal Seam Fires – The Smoldering Poison**

Huge subterranean fires are raging in the coal belts of China. The fires are often caused by incorrect and illegal mining practices. The seam fires ignite upon contact with air and can smolder for decades. Vast amounts of toxic substances are released, and valuable resources destroyed.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564771 006**

### **Climate Change – The Big Melt**

The Earth is getting warmer. Climate change is most evident in three key regions. In Greenland, average temperatures have risen by five degrees Celsius. In the Peruvian Andes, ancient glaciers are melting. In Bangladesh, saltwater from rising seas is infiltrating inland regions via the tributaries of the Ganges and is rendering coastal areas infertile.

**564771 007**

### **Uranium Ore Mining – The Clean Energy Lie**

Accidents such as those that occurred in Chernobyl and Fukushima contradict the claim that electricity generated by nuclear power is clean and cheap. Furthermore, the extraction of the nuclear fuel uranium in nations such as Namibia, Canada and Australia causes huge ecological damage. Germany too is having to clean up its former uranium mines at great expense.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**564771 008**

**Overfishing – Our Seas at the Crossroads**

Oceans are rich and complex ecosystems. Humans extract 90 million tons of fish from them every year, and this affects the balance of life in our waters. The path to sustainable fishing demands radical steps that must be taken now.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**564771 009**

**Contaminated Ground – Industry’s Toxic Legacy**

Industrial plants often use toxic substances. And if waste from the manufacturing process seeps into the ground, it can pose a threat to the health of those living in the surrounding area. Germany is now going to great lengths to clean up several former industrial sites.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

**564771 010**

**Invasive Species – The Endangered Garden of Kauai**

The Hawaiian island of Kauai is known as the ‘garden isle’. It is home to a wide range of rare plants and animals not found anywhere else. But this biodiversity is under threat: Over the past 200 years more than half of Kauai’s indigenous species have been wiped out. Many were overwhelmed by non-native species of flora and fauna.

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; VoD, IFE, LR

**564771 011**

**Chemicals in Water – The Invisible Threat**

Increasing amounts of pharmaceuticals and other chemicals are being found in lakes and rivers, and in our drinking water. These substances cannot be filtered out completely, even by the most advanced purification and sewage-treatment plants. Researchers are warning of the considerable risks.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**564771 012**

**Illegal Logging – Undercover Against the Timber Mafia**

The illegal trade in timber is threatening the tropical forests of the world and exacerbating the effects of climate change. Alexander von Bismarck is taking steps to tackle the problem. In undercover missions, he draws back the veil on the shady deals and transit routes of the timber mafia.

**564771 013**

**Nuclear Waste – Submerged and Forgotten**

Until the 1990s, Europe’s nuclear waste was simply put into containers and thrown into the sea – in all, more than 100,000 tons of radioactive material. Now, those containers are beginning to leak. This nuclear legacy has come back to haunt the Europeans.

## The Barren Sea

By the year 2030 more than one and a half million species of plants and animals will have disappeared – on all the continents and in all the oceans. But it is no easy task to stop plundering nature. Consider fishing, for example: Billions of people depend on the fishing industry for their livelihood. An estimated quarter of all fish species have been decimated, seven percent have become extinct, and many more are in grave danger. Nonetheless, subsidized industrial fishing fleets continue to scour the oceans. Other dangers to fish include pollution, huge drift nets, and alien organisms brought from distant parts as more and more freighters criss-cross the globe.

**264707 001**

### Overfishing – Bye-bye, Cod

The cod, one of the most important of all edible fish, is threatened with extinction. Yet EU authorities still cannot reach agreement on catch quotas. The attempt to set up protection zones has failed. Conservationists are finding it hard to come up with campaigns aimed at protecting the cod, which is not as popular as the whale or the dolphin.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**264707 002**

### Ghost Nets – Deadly Traps in the Ocean

On each fishing trip a trawler will cast up to a thousand nets. When storms make it impossible to haul them in, or if the crew fails to find them again, these nets become lethal traps for fish and other marine creatures. Lost nets that sink to great depths cause major damage, because some species that inhabit such zones have already decreased in number by over ninety percent.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**264707 003**

### Fighting Pirate Fishing in the Arctic Ocean

Pirate fishermen simply ignore catch quotas and laws. They satisfy the demand for cheap fish, which finds its way into supermarkets by illicit means. Every year pirate fishing-boats land North Atlantic cod worth around two hundred million euros. To combat illegal fishing, Norwegian coastguard vessels are now monitoring the high seas.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**264707 004**

### Aquafarming – Profit or Conservation in Chile

The waters off southern Chile are frequented by large numbers of blue whales. But, with the world's biggest mammal now in danger of extinction, whale researchers are calling for a marine protection zone to be set up. The aim is also to combat environmental damage, because there is scarcely a bay in the region that does not have a salmon farm. Fish and plants in the vicinity of salmon farms are dying. People are also threatened, because intensive salmon farming involves the use of large quantities of medicinal drugs and chemicals.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**264707 006**

### Water Pollution – Greece's Sponges Face Extinction

For centuries sponges formed the main source of income for people on the Greek island of Kalymnos. Diving for sponges was a dangerous and often fatal occupation – but there was good money to be made. However, sponges have been almost wiped out by water pollution and disease. Sponge beds take a long time to recover. At the same time, demand for natural sponges is increasing.

**264707 007**

### Reef Protection – Gentle Dive Tourism on the Red Sea

The Red Sea is a paradise for divers. But tourism has its price: huge hotel complexes right next to the reef, environmental pollution, and reef damage caused by untrained divers. At his eco-lodge 'Marsa Shagra' near the famous Elphinstone reef, Hossam Helmy hopes to show that this does not have to be the case. The divers who come here abide strictly by the rules of gentle dive tourism.

## Founders' Valley

How Asia's Startups Founders Work on Innovative and Inspiring Solutions

Award-winning German entrepreneur Fridtjof Detzner sets off to look for people with visionary ideas across Asia. He meets with start-up founders and activists who work on innovative and inspiring solutions to pressing problems: artificial ice-stupas fighting climate change, revolutionary materials to save the world's oceans, smart apps to fight hunger...

Of course, entrepreneurship isn't always glorious. It requires a ton of sacrifice and total dedication. We also show the challenges founders need to overcome as well as the troubles and opportunities in a digitized and globalized world. Showcasing unique characters, their stories and the solutions to some of the world's most intractable issues that they offer, we feel the pulse of the Asian start-up ecosystem and what makes it so special. Come meet people and companies working on innovative and inspiring solutions in Founders' Valley.

## Inside €conomic\$

Every day we hear about what is supposedly good or bad for the economy. But what exactly is “the economy”? Major players may feel remote, and economic principles obscure, but in fact we are all economic agents and part of the system ourselves. We may imagine economic developments are happening somewhere “out there”, but in fact we are in the midst of them the entire time. How do they affect our lives? What happens on the financial markets? What do free trade agreements mean for us? We look for the answers to such questions in Inside Economics.

**064873 001**

### Goodbye Cash

Sweden and Denmark look set to become the world’s first – almost – cashless societies. Nearly all payments there are already made by card, transfer or app. It’s quick and easy, and should make it harder to evade tax or work illegally. Producing fewer banknotes and coins also cuts costs. But can a society really function without cash? What does it mean for democracy? Does it mean ceding control of our money to banks and the state?

**Documentary, 30 min.**, 2016, HD; Arabic, English, Russian, Spanish; VoD, IFE, LR

**064873 002**

### A World in the Red

The world’s industrialized nations are 55 trillion Euros in debt. Many are slashing public budgets as a result, although this does little to get the situation under control. Combined with speculative financial markets that dominate the economy, this represents a danger to prosperity, society and democracy. A world mired in debt is not a natural phenomenon, but rather the consequence of an unfettered financial sector and many bad decisions.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**064873 003**

### Free Trade – Pledges and Reality

Many countries have signed up to international free-trade agreements. They are sold as engines of prosperity, generating jobs and investment. But is that the way it really is? And if they do enhance prosperity, whose prosperity is it? Who benefits? Ordinary people or large corporations? NAFTA, the trade agreement in place between the US, Canada and Mexico, offers some interesting insights.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**064873 004**

### Warning: High-Frequency Trading

Traders on the world’s stock exchanges are not always people. These days, it is often computers, placing orders in a flash on the basis of sophisticated algorithms. One strategy seeks to exploit even tiny price fluctuations to turn a profit. This kind of trading carries a multitude of risks and could potentially trigger market crashes.

**064873 005**

### Offshore Business – A Gray Area

Offshore companies are simple to set up, and international law firms can use them to spin complex networks to obscure ownership and “optimize” tax liabilities. Many well-known banks have been only too keen to handle their business. Offshore companies are a major industry in a number of low-tax or no-tax countries. It is not usually illegal to own one. Using them to avoid tax or conceal identities can be. How do offshore companies work? How do criminals use them to their benefit?

**Documentary, 30 min.**, 2016, HD; Arabic, English, Russian, Spanish; VoD, IFE, LR

## Tricks of the Trade

Whenever we buy something – in the supermarket, the shopping mall or online – we participate in a market, local or global. But do we make intelligent decisions when we part with our money? And what are the consequences for the environment, our own health and that of the workers toiling to make the products we buy? Only the well-informed can make responsible purchase decisions, though some manufacturers would prefer us all to be blissfully ignorant: For them, an awful lot of money is at stake. That is why they often declare crucial facts about their products only when forced to by law. And marketing strategies can often amount to perfidious manipulation. But a sustainable economy needs informed and critical consumers. We reveal some of the Tricks of the Trade.

**064814 004**

### **Throwaway Society – Electrical Equipment That Simply Don't Last**

Our lives are filled with consumer electronics and electrical appliances. When they stop working, it is often said they are not worth repairing and they are simply thrown away. Is industry intentionally making products that break down quickly and can't be fixed? **Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**064814 005**

### **No More Use-By Date – Questionable Food Conservation Methods**

Preservation technology is revolutionising the food industry. Sophisticated cool chain logistics and new preservatives are increasing product shelf-life like never before. But some of these methods are questionable from a health point of view. And is it always a good idea to alter the natural state of a foodstuff to give it a long shelf-life?

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; VoD, IFE, LR

**064814 006**

### **Healthy or Dangerous? – Synthetic Vitamins**

Vitamins are essential for life; without them we would fall ill. The manufacturers of vitamin supplements would have us believe that the high doses they sell us contribute to good health. But scientific studies cast serious doubt on such claims: Many supplements are useless, and some are downright dangerous.

**Documentary, 30 min.**, 2013, SD; Arabic, English, Spanish; LR

**064814 008**

### **The Beauty Myth – The Cons of Cosmetics**

The cosmetics industry is forever bringing new and ever more enticing make-up, creams and perfumes to market. They promise beauty and eternal youth, but sometimes trigger allergies and illness. That is because they often contain substances that are problematic for the skin or even downright toxic.

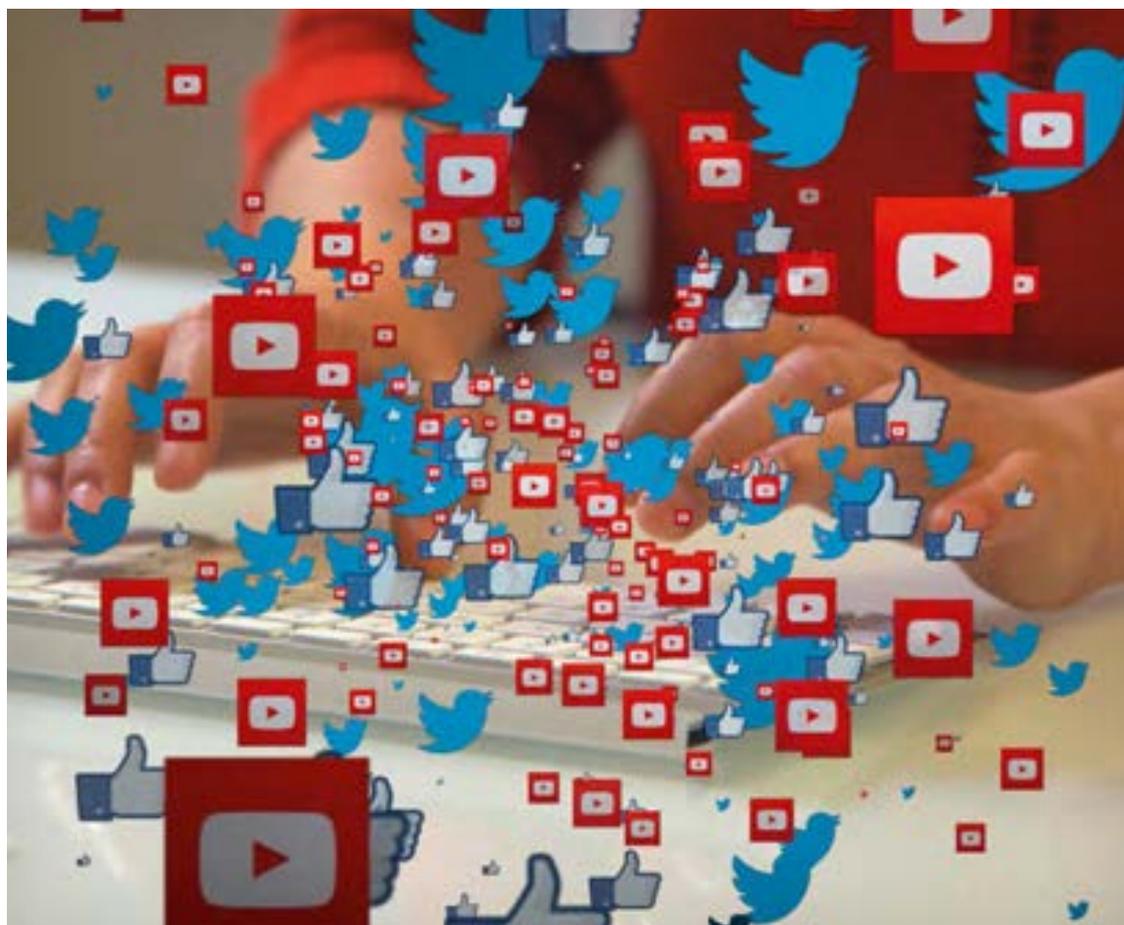

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**064814 009**

### **Bargain Bananas – Cheap at Any Price?**

European consumers love bananas, and most prefer to snap up the fruit at rock-bottom prices in discount stores. And those stores outdo each other in pushing down the price – at the expense of those who grow the bananas. This means poor working conditions on the plantations and ever more environmental degradation in the banana-growing countries.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

064814 010

**Self-Service – Putting the Customer to Work**

Retailers and other enterprises are transferring more and more of the work involved in sales to their customers. What appears at first glance to be simple and practical – self-service tills at the supermarket, ticket machines at stations, online shops or self-assembly flatpack furniture – represents above all a way for companies to cut costs. The valued customer is becoming a source of unpaid labor.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

064814 011

**Pesticides in Tea – A Bitter Aftertaste**

Tea is the world's second most popular beverage after water, and Kenya is one of the world's largest growers of tea. Few tea drinkers realize that on many plantations pesticides are used; that is something the industry does not talk much about. The pesticides endanger the health of plantation workers and also leave traces in the final product.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Russian, Spanish; VoD, IFE, LR

064814 012

**What Does a T-Shirt Cost? – The True Price of a Product**

In the shops, garments are always marked with a price, but what do they really cost? What for instance is the human cost to those who make them in factories where conditions are often poor and pay is often low? Retailers in wealthy countries tend to keep quiet about where their goods come from and how much they pay for them. After all, the real cost of producing cheap clothing is usually a tiny fraction of the price on the tags.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Russian, Spanish; VoD, IFE, LR

064814 013

**Sweet Seduction – The Sugar Drug**

Sugar makes you happy, but also fuels a craving for more. Food manufacturers exploit this fact to their own ends. Commercials make enticing offers: the bigger the pack, the better the price! Product labels often conceal the true sugar content.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Russian, Spanish; VoD, IFE, LR

**064814 014**

**The Likes Business – Advertising in Social Media**

Social media platforms don't only bring people together – they are also, perhaps first and foremost, powerful advertising tools. For businesses, politicians and celebrities it can be hugely important to increase the numbers of followers, friends or "likes". In order to do this, they use sophisticated marketing strategies. Or they simply buy their "fans".

**064814 015**

**The Online Dating Love Trap**

Online dating sites are booming: More and more lonesome souls are searching for a partner online, and are prepared to pay for the service. But there can be nasty surprises in store: many dating sites use fake profiles. And criminals are also being drawn to the online love business by the promise of a quick profit.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; LR

**064814 016**

**The Diet Deception**

Have you ever tried unsuccessfully to shed those extra kilos by dieting? And was your wallet the only thing lighter at the end of it all? There are all kinds of weight-loss products on the market, many of them claiming their effectiveness is scientifically proven. Using a fake "chocolate diet", two journalists show how easy it is to manipulate scientific studies to deliver the desired outcome.

**Documentary, 30 min.**, 2016, HD; Arabic, English, Spanish; VoD, IFE, LR

**064814 017**

**Ready Meals – Instant Temptation**

When people are in a hurry, they often opt for a ready meal. There's a huge variety to choose from, and food technicians are working constantly to improve taste and quality. The blend of fats and carbohydrates is finely tuned to impact the internal reward system of the diner. This has little to do with healthy eating – and much more to do with fat profits for the food industry.

064814 018

#### Back in Fashion – The Resurgence of the Fur Industry

For a long while, many people regarded fur as an ethical fashion taboo. The fur industry responded by claiming that fur is a “sustainable natural product” and by creating its own certification to back it up. It also focused on selling more small fur accessories instead of fur coats. The strategy has paid off, with customers reporting fewer ethical concerns over the purchase of fur. For the animals that bear the precious fur however, nothing has changed.

#### Optimized for the Senses – Food Design

Humans are the only living beings that cook food so that it will appeal to all the senses. Food should not only satiate our appetites, it should also smell and look good. The food industry knows how to take advantage of this cultural accomplishment, with food designers creating an increasing number of products that claim to be an all-round sensory experience.

#### The Global Tomato Trade

The unassuming tomato has become a profitable and competitive item on the global market. The world's largest producer is China, although the country itself has very few tomato consumers. Tomato purée from China is marketed in packaging to make it look like it comes from Italy. Some of these products contain additives that push down price and quality. Without clear labelling requirements manufacturers will continue to use tricks like these, and the exploitation of harvesters and the displacement of smallholders will remain a problem.

#### Second-Hand Clothes: The Donation Business

In Europe, vast amounts of clothing are bought and frequently disposed of after just a few months. Often the clothing is dumped in containers to be distributed to the poor – or at least that's what most donors believe. But 98 per cent of these items are fueling a globally-active, profit-orientated industry. In Tunisia, for example. There, second-hand clothes are sorted and then sold or recycled. Some of the items even find their way back to the countries where they were first discarded – to be sold as vintage fashion pieces in chic second-hand boutiques.

**Weather as a Commodity**

Sectors such as agriculture and logistics, but also insurance and tourism rely on weather forecasts. And even the average media consumer likes to know if it's going to rain or snow the following day. Weather data and their dissemination have therefore become a lucrative commodity; the range of services more diverse. But what does this mean for the quality of the forecasts themselves?

**Meat with Side-Effects**

Sodium nitrate makes food look good, which means it's good for the sale of industrially processed meat products, but probably bad for consumers' health: the WHO has classified it as carcinogenic. But the meat industry is afraid of a sales drop without it, and the additive is still widely used. A vociferous lobby and dubious scientific practices are helping the industry to deny the health risks associated with the consumption of meat.

**Cruises: The Uncomfortable Facts**

The cruise boom continues apace, with promises of luxury and holidays of a lifetime. But the business of realizing dreams has a massive dark side. Quite apart from the liners' very high pollutant emission levels, crew members are frequently the victims of what's being dubbed "sweat ship" exploitation. A high-gloss world that's beginning to show cracks, which could in turn herald a new era in fair and environmentally-friendly cruise ship tourism.

## Profit At All Cost

Globalization is not happening by chance. It is something that the power centers of the world actively seek and enforce in order to attain commercial, economic and political advantage. The series Profit At All Cost illustrates in simple terms what globalization means – an increase in the volume and frequency of the exchange of people, goods, capital and ideas beyond the borders of nation states. It has been made possible by the lowering of barriers that used to protect countries and regions from economic integration. Today everything is measured by the same yardstick, that of Profit At All Cost. And no mercy is shown to those who cannot keep pace.

### **Matters Hirsute – The Global Exchange of Human Hair**

Human hair grows around one centimeter per month. On any single day, 500 tonnes of hair grows on the heads of the world's population. Nonetheless, it is difficult to meet global demand for toupees, wigs and hairpieces. India is the world's largest supplier of hair; hair traders are based in Spain and Italy; hairpieces are designed in Germany and the United States and made in China. Hair is a hugely profitable business.

### **A Matter of Life and Death – The Trade in Human Organs**

Thousands of people afflicted by serious illnesses around the world hope their suffering can be alleviated by an organ transplant, but the number of donors is declining. International criminal organ traders earn millions by capitalizing on these patients' dire need. Together with doctors, they operate global networks supplying wealthy patients with organs from the poorest of the poor.

### **Modern Prophets – The Power and the Impotence of the Forecasting Industry**

Whether they concern the price of oil, financial markets or population growth – every day sees a whole new set of forecasts and predictions. The forecasting industry makes billions in profits. The forecasters' statements shape public discourse, but the actual worth of their predictions is questionable. Surprisingly simple methods reveal why this is so, and who is capitalizing on the situation.

## Farming for the Planet

Agriculture is under pressure to feed a burgeoning global population. And it has undergone dramatic developments in this regard over the last 100 years. But increasing industrialization of the sector has negative consequences: it burdens the environment and replaces manpower with technology, providing fewer people with a livelihood. If these developments continue unchecked, then before long the food we eat will be controlled by large corporations, and food markets will be geared towards short-term profit – at the expense of non-renewable resources such as land and water, at the expense of the rural population and biodiversity. But this is not the only way forward. Sustainable agricultural approaches and an efficient smallholding economy can in the long term create equilibrium between food security and the utilization of natural resources. There are examples of this all over the world, pursued by people who are Farming for the Planet.

#### **The Quest for Food Security**

The future of food production is more uncertain than it has been in recent decades, and in light of the growing global population it has become an urgent issue. Due to rising meat consumption, the use of energy crops, pest infestations as well as crop and transport losses, less than half of the world's crop yield is available for human consumption. Projects in Tanzania, Brazil, the US, Germany and Switzerland show how food production can be made more sustainable, more environmentally friendly and less damaging to the health of the rural population.

#### **Defending Agriculture Against Drought**

Some 40 percent of the world's land surface is now classified as dry land. Scientists expect climate change to continue to exacerbate extreme heat in many parts of the world. How should agriculture respond to this? Technology provides many possibilities, but these are only within the reach of large-scale concerns in developed nations. But there are also simple, affordable solutions that are proving to be effective in poorer countries such as Burkina Faso. Here, education is the key.

**The Fight for Future Food Systems**

There are many different answers to the question of how to feed the world's growing human population. Dutch agronomist Peter Smeets favors high-tech, intensive crop cultivation and livestock farming in industrial zones around cities. German farmer and agronomist Felix zu Löwenstein wants to see decentralized, ecologically sustainable food production, which offers rural populations a long-term livelihood so they no longer move to urban centers.

**Life on a Biodynamic Farm**

The Pageot family runs a farm with dairy cattle and pigs, arable crops and a dairy in Brittany in northern France. They adhere to the principles of biodynamics, something initially regarded with great skepticism by their neighbors. But the method isn't mumbo jumbo, and the Pageots aren't dogmatic about it. They are simply doing what they believe works best in agriculture.

## The Migration Millennium

Increasing numbers of people all over the world are leaving their homes to build their lives in a different place. At least 150 million people worldwide are living as migrants in a country that is not their nation of origin, but many more are leaving behind all that is dear to them for a destination within their home country. The reasons are just as diverse as the ways and means: from labor migration and joining other family members, to escape from persecution and war. While some are only away for a short time, others know they will be relocating for several years, perhaps even for the rest of their lives. Most nations only welcome highly-qualified economic migrants. In our globalized world, more and more people are on the move. And they are having an increasing influence on political, societal and economic processes in both their nations of origin and their destination regions. The Migration Millennium highlights the difficulties and the consequences of flight and migration movements – but also the opportunities they present to our global community.

### **The Hellish Journey to Tijuana**

Every day, thousands of people from South and Central America head to the US. The main reason for their flight is violence by gangs and drug dealers in their homeland. But most of the refugees never reach their intended destination – they are threatened with prison, deportation and even death.

**864885 002**

### **Villages of Abandoned Children in China**

In China, boomtowns are attracting millions of migrant workers. They pay a high price: their children are brought up by relatives, because only in their home villages do they have a right to education. An entire generation is missing from rural areas.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; LR

**864885 003**

### **Money in Minutes**

Every year, migrant workers transfer many hundreds of billions of dollars to their families back home. These cash transfers have given rise to a whole industry, which utilizes migration as its business model while at the same time forming its financial infrastructure.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**864885 004**

### **Tahrib – The Endless Journey**

Tahrib is the name given in many African nations to the dangerous journey to Europe undertaken by refugees. Their one and only goal: to arrive safely. But even in many purportedly safe countries, many refugees are exposed to dangers and repression.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; LR

**864885 005**

### **On the Run – Children Disappearing Without Trace**

According to unofficial estimates, up to 30,000 child refugees in Europe can no longer be accounted for. Many are living in a parallel world that remains hidden to most. It is all too easy for them to fall into the hands of criminals who force them into prostitution or the drugs trade.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**864885 006**

### **Latinos, the Changing Face of America**

Immigration is the very foundation of the US. Whereas most immigrants used to come from Europe, these days they come from South and Central American nations. It is estimated that by the year 2035, Latinos will make up 35 percent of the US population. This demographic change is already having an impact on American society.

**Documentary, 30 min.**, 2017, HD; Arabic, English, Spanish; VoD, IFE, LR

**864885 007**

### **Beirut Parc – Breaking Down Barriers Through Sport**

'Soccer Camp Lebanon' is a project for kids in the capital Beirut and three other cities in Lebanon to play soccer. The teams are mixed in two respects: Boys and girls play together; Lebanese, Syrian and Palestinian kids play together. 'Beirut Parc' documents these encounters and shows how prejudices can be overcome in the process.

## Whose World Is It?

At the start of the 21st century, the global population, resource consumption and the ensuing environmental problems are increasing at an unprecedented rate. The attendant shortage of resources is leading to allocation conflicts that are increasingly played out on world markets – even in the case of vital commodities such as water or arable land, which had thus far enjoyed a certain level of protection owing to their significance. The growing gulf between rich and poor, between the haves and the have-nots, is becoming ever more widespread as a result, both on a global and national level. *Whose World Is It?* explores major problems that will have a significant impact on the future of mankind.

**864847 001**

### **The Power of the Financial Concerns**

Regulators are now paying closer attention to the world's big banks, and so are the media. But a large portion of the world's financial activity is channeled through the shadow banking system, where institutions speculate and lend and invest huge sums of money while eluding public oversight.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, LR

**864847 002**

### **The Hunt for Land**

In recent years, investors have been buying up vast tracts of farmland around the world. They are betting on continued population growth and increasing demand for food crops. This is turning the basis of food production into a speculative commodity, and the generation of profit into a chief priority.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**864847 003**

### **The Battle Over Water**

Water is perhaps our most precious resource, and it is scarce. Multinational companies are scrambling to secure the best sources of drinking water. For them, it is simply another commodity they want to sell at the best price.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Russian, Spanish; VoD, LR

**864847 004**

### **The Raw Materials Business**

Commodity traders are a powerful force in the global economy, and are rarely subject to close scrutiny. Some of the leading firms have been acquiring mines and farmland, often in developing countries. Profits are high for the investors, but the host countries rarely benefit.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, LR

**864847 005**

### **The Future of Food Supply**

In the face of climate change, water shortages, population growth and questionable agricultural policies, urgent questions arise: What will we be eating in the future? Organic or industrial food? Local produce or imports? From small-scale farms or industrial agribusinesses? Fast food or trash food? Who will starve, and who will get to eat their fill?

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

**864847 006**

### **Poverty in the West**

It used to be said that desperate poverty had been banished from western Europe. Such claims ring hollow nowadays. Neo-liberal reforms, purportedly designed to streamline economies and generate prosperity, have in fact cast many people into poverty – even in rich countries such as France and Germany.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Russian, Spanish; LR

**864847 007**

### **The Patent Wars**

A patent used to be nothing more than a right to protect an invention. Today, we find ourselves in the midst of a global struggle in which patents are being used as strategic weapons. Anything with the potential for profit is being patented: From designs, to foodstuffs, and even the human genome.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; LR

## This Means War

The face of war is changing. Governments and armies attempt to package it as a legitimate political tool and, as far as is possible, try to portray military campaigns as harmless. Few opportunities remain for journalists to convey an accurate and genuine representation of war and its consequences – with reporters themselves often becoming targets in a conflict. Civilians are only safe as long as this is deemed appropriate. Only sanitized images of war are made public; “clean” and precise strikes using combat drones and intelligent bombs; and those involved are given all the air time they need to justify their military activities. The reality on the ground is very different. Wars continue to inflict great suffering, destruction and death – long after the battles have ceased.

**864824 001**

### **The Invisible US Army**

In Uganda, security firms working for the US army recruit former child soldiers. They serve as security personnel during US military operations all over the world, as mercenaries for whom, when things take a turn for the worse, no one accepts responsibility.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**864824 002**

### **The War Reporter**

Kurt Pelda has reported from the war zones of the world for almost 30 years. This documentary takes a close look at the nature of his work, and explores why he feels compelled to return to the frontline time and time again.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**864824 003**

### **Peacekeepers Pose a Threat**

20,000 UN peacekeepers are currently deployed to protect civilians in the east of the Democratic Republic of Congo. But increasingly the troops themselves pose a threat to local people, with women and girls frequently the target of sex attacks.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Russian, Spanish; VoD, LR

**864824 004**

### **A Soldier's Grave**

Joachim Kozlowski searches old battlefields for the remains of soldiers killed in the Second World War. He works for Germany's war graves commission. He has the remains properly buried and informs any family members. For them, it can mean closure after decades of uncertainty and grief.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**864824 005****The Strategy of a Worldwide Presence**

Over the course of the last century the US, like no other global power before it, has spanned the world with a network of military sites – more than 700 facilities in some 40 countries. These bases are impacting upon the lives of millions of people.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Russian, Spanish; VoD, LR

**864824 006****Sardinia's Deadly Secret**

The largest NATO training facility in Europe is located on the Mediterranean island of Sardinia. The cancer rate among the local population and the incidence of deformities in babies and animals are unusually high here. Many blame the depleted uranium in some of the munitions tested at the site.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**864824 007****America's Clandestine War in Laos**

During the Vietnam War, the US waged an eight-year bombing campaign in Laos without the rest of the world finding out about it. Using archive footage, some of which has never been shown before, this film relates the story of this secret war.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**864824 008****One Man's Path to War**

Anwar supported the rebels in the Syrian civil war but did not fight. Then he was radicalized by the brutality of the war and the lack of support from abroad. He decided to join an Islamist group and bear arms in the conflict.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**864824 009****Danger Beneath the Seas**

It is thought that more than a million tonnes of chemical weapons lie on ocean beds around the world. From 1917 to 1970, these deadly munitions were dumped in the sea by armies worldwide. The cases and drums are corroding and releasing highly toxic substances. This poses a huge threat to marine life and human health, with no immediate prospect of a solution.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**864824 010****Congo's Women Take Up Arms**

It is estimated that 500,000 women have been raped during the 20-year civil war in the Democratic Republic of Congo, either by marauding gangs or by soldiers. Several hundred women, however, have decided that, rather than remain defenseless, they are going to fight. Some sign up with the army, others join the various rebel groups.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Russian, Spanish; VoD, LR

**864824 011****NATO's Lethal Legacy**

As they pulled out of Afghanistan, NATO-led ISAF troops left behind a dangerous legacy: unexploded bombs. They remain in battle zones, in places hit by airstrikes – and on former training grounds. The live munitions pose a grave threat to local people. NATO is obliged to clear them, but this is happening far too slowly – if at all.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, LR

**864824 012****The Deadly Effects of the Gulf Wars**

During the two wars of 1991 and 2003, it's thought that up to 2,000 tons of depleted uranium weapons were deployed in Iraq – although to date no reliable data has been collected on the issue. 300 regions in Iraq are viewed as contaminated and urgently need to be cleared of harmful substances. There has been a huge increase in instances of cancer, stillbirths and congenital deformities in local populations.

There are no official studies on the causes of these afflictions, and unofficial studies are not recognized.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

## Uncovered

A good reputation can be an important asset. But a squeaky-clean facade may mask shenanigans and even crime. Greed and the quest for profit can lead businesses astray; their sense of responsibility cannot be assumed. Laws and their enforcement are required to combat corruption and the exploitation of humans and nature. The gripping documentaries in the series Uncovered draw back the veil on stories some would rather keep hidden.

### **Blood Treasures – The Antiquities Trade and Terror**

Although the export of historical artefacts is banned in most countries, thousands of new pieces enter the market every year. Demand from wealthy countries motivates looters to raid historical sites and thereby inflict great damage. Many antique dealers are not concerned about where their goods come from – even if the sellers may have blood on their hands.

**564786 002**

### **Poisonous Profits – Sending Toxic Waste to Ghana**

Up to 50 million tonnes of electronic waste is produced every year around the world. Exporting this hazardous garbage is illegal in many countries. But unscrupulous scrap dealers declare it as second-hand goods in working order and export it to Ghana, where it is then dumped. Toxic heavy metals contaminate humans, water and the earth – while the merchants earn a fortune.

**Documentary, 30 min.**, 2012 HD; Arabic, English, Spanish; LR

**564786 004**

### **Going for Gold – An Exploitative and Damaging Business**

The price of gold has been soaring. But major gold belts in developing countries – such as Cajamarca in Peru – are often among the world's poorest regions. The mining process contaminates and dessicates the earth and makes people sick. The only ones to profit from the gold price boom are mining companies and speculators.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**564786 005**

### **The Reptile Mafia – Species in Danger in the Rain Forest**

The worldwide demand for exotic reptiles is increasing rapidly, so there is a lot of money to be made. The legal breeding of these animals is often difficult and expensive. Profit margins are much greater if the creatures are captured in the wild – despite the Washington Convention on International Trade in Endangered Species. Many reptile populations are facing extinction.

**564786 007**

### **Gas Flaring – Profit at the Expense of the Environment**

The thirst for oil has fatal consequences: In nations such as Russia and Nigeria, oil concerns burn off the natural gas that escapes as they pump crude, because harnessing it for use would not be cost-effective. The practice not only destroys vast amounts of a precious resource, it also inflicts massive damage on the environment.

**564786 010**

**Human Trafficking – Exploited Forestry Workers in the Czech Republic**

In the Czech Republic more than 2,000 people, most of them from Vietnam, were systematically deceived and exploited as forestry workers. The authorities took no action, and the shocking case only came to light through the engagement of committed individuals.

**Documentary, 30 min.**, 2013, HD; Arabic, English, Spanish; LR

**564786 011**

**The Second-Hand Clothing Scam – The Impact of Charitable Donations**

Millions of people in industrialized nations donate their used clothing to charity, assuming the items are then sent to poor people around the world. But most of the clothing is actually sold at a profit. More than 60 percent ends up in Africa, where local markets are swamped by the cheap clothing, bringing the continent's textile industry to its knees.

**564681 106****The Deadly Row Over the Sacred Cow**

It's an ongoing conflict with the potential to tear India's multi-faith society apart: Because the Hindu faith views the cow as a sacred animal, Hindu fundamentalists are targeting Muslims and lower-caste Hindus who consume beef. The attacks are increasing in brutality and have already claimed several lives. The transport of beef is prohibited in many Indian states. Self-proclaimed cow vigilantes hunt down beef smugglers, real or alleged, and subject them to violent retribution. In the south of the country, secular and left-wing groups are mobilizing against the Hindu fundamentalists.

### Nuclear Power – A Controllable Risk?

Nuclear fission was one of the most dramatic discoveries of the 20th century. The energy released by the reaction was initially seen as something with enormous scientific and practical potential for humankind – but the risks soon became apparent. The US, Russia and China built up huge nuclear arsenals that could destroy the world several times over. More and more nations developed their own atomic bombs. The nuclear accident at Chernobyl and Fukushima made very clear that even the civilian use of nuclear power can unleash dangers almost beyond its control. Full Report Special shines a spotlight on aspects of nuclear fission: from the spread of nuclear weapons to Chernobyl and the ticking time bomb that is radioactive waste.

#### **Cold Warriors Disarm – The Campaign Against New Nuclear Weapons**

Despite taking steps towards disarmament, the superpowers still hold enormous nuclear arsenals – and new nuclear weapons are still in the planning. In the US, 1,800 physicists including seven Nobel prize winners, as well as a number of high-ranking politicians, have registered their opposition to these plans. They are calling for drastic disarmament at a time when the threat of a nuclear strike is still very real.

#### **The Nuclear Fallacy – Demystifying a High-Risk Technology**

Nuclear power plants are safe, the energy they produce is cheap, and the disposal of radioactive waste is unproblematic – claims such as these by the nuclear industry have remained unchallenged almost everywhere for decades. But now, the nuclear energy debate is becoming more robustly critical in many countries. Just how safe are nuclear power plants in everyday operation and in an era overshadowed by the threat of terrorism? What measures will be undertaken in case of an accident? What happens to all the nuclear waste? The answers to these questions are alarming.

### Kids Seeking Refuge in Football

**884886**

**Documentary,**

The little boys and girls proudly pull on their new soccer boots and, seconds later, they're out on the field to train together. Many have experienced terrible things as refugees and live in a precarious situation in a new country. But here on the soccer pitch, they can forget about their worries for a few hours. Their laughter rings out over the field and, after scoring a goal, they all hug each other, regardless of where they come from, whether they're refugees or were born here. And where is this wonderful place? In the Lebanese capital Beirut. And the kids are taking part in 'Soccer Camp Lebanon'.

Lebanon has more refugees relative to the size of its population than any other country. Here Syrian refugees live alongside Lebanese locals and Palestinian refugees who were forced to leave their homes decades ago – sometimes in close proximity. This has created a volatile situation that requires a variety of strategies to build tolerance and mutual trust if social conflict is to be avoided.

'Soccer Camp Lebanon', a nationwide tournament for children and young people, is an initiative of Germany's Goethe Institute and coaches at a local soccer school. Based on faith in the conciliatory power of soccer, it gives 900 youngsters from Beirut and three other Lebanese cities the chance to play soccer together, to escape from their everyday lives and gain new perspectives in the process. At training sessions in mixed teams – boys and girls from Lebanese, Palestinian and Syrian families – and a closing tournament, the children have the opportunity to explore their cultural and social commonalities and differences.

Beirut Parc – Kids Seeking Refuge in Football observes the young people and explores the impact of the soccer camp on their daily lives. The program provides an insight into how the youngsters and their families live in Lebanon – either as locals or refugees – and what role soccer can play in developing new perspectives and the foundation for a peaceful coexistence.

## Greed

### A Fatal Desire

“People like to have a lot of stuff because it makes them the feeling of living forever,” says American social psychologist Sheldon Solomon, who believes today’s materialism and consumerism will have disastrous consequences.

Anyone who fails to satisfy his or her desires in this age of the ego is deemed a loser. But with more than 7 billion people on the earth, the ramifications of this excessive consumption of resources are already clear. Isn’t the deplorable state of our planet proof enough that “The Greed Program,” which has made us crave possessions, status and power, is coming to an end? Or is the frenzied search for more and more still an indispensable part of our nature?

We set off to look for the essence of greed. And we tell the stories of people who – whether as perpetrators or victims or even just as willing consumers – have become accomplices in a sea change in values.

## The Rich, the Poor and the Trash

**864905**

**Documentary,**

Trash is a symbol of our times. The amount we generate and the way we deal with it speak volumes about our consumption patterns and level of prosperity – and also about social inequality. The rich consume much more than the poor and produce much more waste. But what some people throw away, others need to survive.

Godwin Ochieng lives in Dandora, a poor suburb of Nairobi, Kenya, where one of the largest dumpsites in Africa is located. He spends his days combing through endless piles of garbage, brought in by the truckload from the city's wealthier districts, in the hope of finding something to sell: for him, the mountain of trash is a lifeline. Meanwhile, halfway around the globe in one of the world's richest and most expensive cities, Pierre Simmons combs the streets of New York for cans he can sell to recycling companies. Both men live in countries where the gap between rich and poor is vast. But the economic and social disparities between the US and Kenya are also huge. Economists Lucas Chancel and Kate Raworth warn against the consequences of huge imbalances at both the national and international levels. They argue that they poses a great danger to our entire system of values, to our understanding of democracy and to our economy.

## After the Escape

### Finding a Home in a Foreign Land

**884903**

**Documentary,**  
45 min., 2018, HD

Arabic, English,  
German, Spanish

WW, VoD, M, IFE

Judith Kerr, Aeham Ahmad, Saša Stanišić, Nneka Egbuna and Antonio Skármeta come from four different continents and have one thing in common: They all fled war, hardship or persecution and started over in a new and unfamiliar place. Culture became their key to integration. Books, films and music helped pave the way.

“Isn’t it wonderful to be a refugee?” ten-year-old Judith Kerr shouted across the rooftops of Paris in 1934. She and her family had fled Nazi Germany one year earlier. Escape was a great adventure for her, and her parents didn’t let her sense their fear. Today, the world-famous writer (“When Hitler Stole Pink Rabbit”) lives in London and says: “For me, England was my home at the end of the war. But it wasn’t for my parents. They never belonged anywhere.” It’s a story typical of many refugee families.

Aeham Ahmad, “the pianist amid the rubble” of the Yarmouk refugee camp in Damascus, keeps wondering why he of all people survived while so many others didn’t. Saša Stanišić has become a renowned German-language author after fleeing the Bosnian War in 1992 at the age of 14. Musician Nneka Egbuna who fled the violence in her family in Nigeria as a teenager, lives in Lagos, Hamburg and Paris but isn’t truly at home anywhere – “home” to her is a feeling. Author Antonio Skármeta was no longer allowed to work at home in Chile after Augusto Pinochet’s coup d’etat in 1973, and lived in exile in West Germany.

## Classified: World War II

During World War Two, lies, propaganda and disinformation were the order of the day. What do we now know about the machinations of those involved, kept secret from the public for decades after the end of the conflict? What were the crimes that one simply didn't speak of, even if one was aware of them? What were the events that historians were only able to find out about years after they happened? New facts are coming to light all the time, whether about espionage, diplomatic contacts or economic ties. Classified: World War II tells the stories from this terrible war that aren't common knowledge.

### The Dead Man Who Had Hitler Fooled

In 1943 the Allies were planning to invade Sicily but wanted Nazi Germany to believe they intended to invade Sardinia and Greece instead. So they thought up a disinformation manoeuvre, Operation Mincemeat. It involved the body of a dead man dressed up as a British officer with misleading fake documents in his pockets. The Germans fell for the ruse.

### Japan's Attack on Manchuria

The roots of the Second World War in Asia lie in the conflict between Japan and China, which escalated into a full-scale war in 1937. But even as early as 1931, Japan attacked and occupied the Chinese territory of Manchuria. The pretext was a staged event, which became known as the Mukden Incident. The secret operation and disinformation campaign was devised and led by a Japanese military officer named Ishiwara Kanji, who was probably acting independently of the government.

## When We Were 17

### Youth at the Crossroads

A century of youth in Germany: We take a look at how young people experienced turning points in history at turning points in their own lives. Our protagonists lead us back to where they spent their teenage years, places where German and European history was made. The personal stories of young people at six different milestones in German history show that the role young people play in a society says a great deal about that country's attitude towards freedom and democracy. Teaching young people respect for human rights, freedom of speech and tolerance is a vital cornerstone for the peaceful co-existence of different peoples.

The science magazine Know it! History takes a fresh look at historical events and buildings, archeological research and cultural phenomena, and makes use of vivid re-enactment.

The clips present historical figures such as Cleopatra, queen of Egypt; Cixi, empress dowager of China; the Carthaginian general Hannibal; the Italian artist and polymath Leonardo da Vinci; and Catherine the Great, empress of Russia.

The clips consider epochs such as the Babylonian Empire, the era of Viking rule or the Golden Age of Islam in medieval Spain, as well as turning points in history – including the emergence of the Chinese Empire, the birth of the Roman Empire and the battle of the Incas against the Spanish conquistadors.

They also present buildings and structures such as the symbolic tomb of the Egyptian god of the afterlife Osiris, the Mayan city of Chichén Itzá, the Dome of the Rock on Jerusalem's Temple Mount, the Kremlin in Moscow and the Taj Mahal in the Indian city of Agra.

Other clips show archeologists at work: Searching for the wrecks of galleys off the Turkish coast, investigating ancient gold-extraction practices in south-eastern Europe, or as they find out more about the lives of people in the early Bronze Age.

#### Transit Camp Friedland, Part I and II

For millions of people, arrival at the Friedland camp in Lower Saxony marked the beginning of a new life – or at least some respite from a life on the run. The British military government opened the camp for German refugees and returning soldiers in September 1945. Today, Friedland is a reception center for asylum seekers and refugees. Many have abandoned everything back home and risked their lives to reach Europe. We accompanied some refugees during their stay in the camp and also talked to people who came to Friedland in the early days. All had dramatic stories to tell. “When I meet children from Syria or elsewhere in Friedland today, I am always meeting myself,” says Annelie Keil, who arrived there as an eight-year-old child in 1947. How different are the feelings, experiences and aspirations of the people in this place where so many decades of escape stories intersect?

#### The Scent of Home – Encounters in Little Hanoi

It smells of coriander, mint and fish sauce. The Dong Xuan wholesale market in Berlin's Lichtenberg district is like a mini-version of Hanoi in Germany. The stalls are a meeting place for East and West, Germans, immigrants, tourists and locals alike. “Dong Xuan means spring meadow,” explains Mai-Phuong Kollath, who came from Vietnam to the former East Germany as a contract worker in 1981. Here she buys fresh herbs for her spring rolls. Retailers like Raghbir Singh buy clothes wholesale here. He arrived in West Berlin from Punjab as a student in the summer of 1989. The Sikh is now a grandfather. His children and grandchildren were born in Berlin and only know a unified Germany. Businessman Suat Bakir was eight years old when he arrived from Turkey with his parents. “German reunification was like a wedding to which the immigrants were not invited,” he says. We also meet Elisa Dosse from Mozambique, who lives with her husband in the eastern German city of Dessau. One of her best friends was murdered by neo-Nazis in 2000. They all have their own stories to tell, and all of them are closely linked to Germany. We visit them at home, in Dessau, Hamburg and Rostock, and accompany them to a place where Germany is exotic and different: a place that feels and smells like home.

## Walled in! The Inner German Border

524730 001

### Walled in!

The computer animation, depicting the Berlin Wall and the border between East and West Germany, illustrates the oppressive reality of the border region as it seeks to answer the question: "What was the Wall really like?"

Today, only fractions of the no-man's land and the Wall itself remain. The computer animation connects the dots – making the perils of the border region visible. For the first time, historians and television producers have created a detailed reconstruction of the no-man's land as it looked at the start of the 1980s, including new views of the border fortifications.

With startling imagery, the animation recreates what was once a divided Germany for those who know it today as just another piece of distant history, helping younger generations better understand the suffering of people in Berlin and throughout Germany, divided for decades by the border between East and West.

### Making of "Walled in!"

To recreate the border region in as much detail as possible, animators generated more than 130,000 images from historical models, in a high-definition computer process that took some 100,000 hours to complete. Every object had to be created as an individual graphical element using polygon shapes. The Church of Reconciliation, located in the death strip, for instance required some 500,000 polygons. The Making of Walled in! tells the backstory of the striking animation, including the intensive effort required to build a virtual replication of the Berlin Wall.

## The Promise of the West

The Berlin Wall was one of the most infamous symbols of the Cold War and the division of Germany. For some people living behind the Iron Curtain, the pull of the West was so strong that they were willing to risk their lives to cross the heavily guarded border between East and West Berlin. Hundreds were killed trying to flee, but many others managed to make it to the West by using ingenious and spectacular methods of escape.

#### Sailing to Freedom

The Russian combat helicopter dived towards the little boat at top speed. When it was almost on top of the craft, the pilot pulled the nose up and turned away. The three men in the boat thought they had made it and continued heading north-west towards Denmark. What reads like a scene from an action novel was a daring escape bid that took place in 1986.

#### Veiled Plans

As the daughter of a diplomat, Kerstin Beck saw more of the world than most East Germans. She lived in Iraq and Vietnam, and went to Soviet-occupied Afghanistan as an exchange student when she was 23 after hatching a plan to cross the Hindu Kush and enter Pakistan. From there, she was able to fly on to West Germany.

#### Risking Everything

When Berit Geißler was 21, she and her family escaped the GDR by hiding in the back of a caravan belonging to a holidaying Swiss couple. They then crossed from what was then Yugoslavia to the West, with Berit locked into a water tank and her husband and baby sewn into a mattress.

### 564713 006

#### Escape Through the Sewers

Dieter Wohlfahrt was 15 when he left the GDR and moved to West Berlin. Years later, he took advantage of the fact that his Austrian nationality allowed him to cross between West and East Berlin to help East Germans escape through the sewerage system. During a rescue attempt in 1961 he was shot and killed by GDR border guards. Karl-Heinz Albert was with him at the time. He's never come to terms with his friend's death.

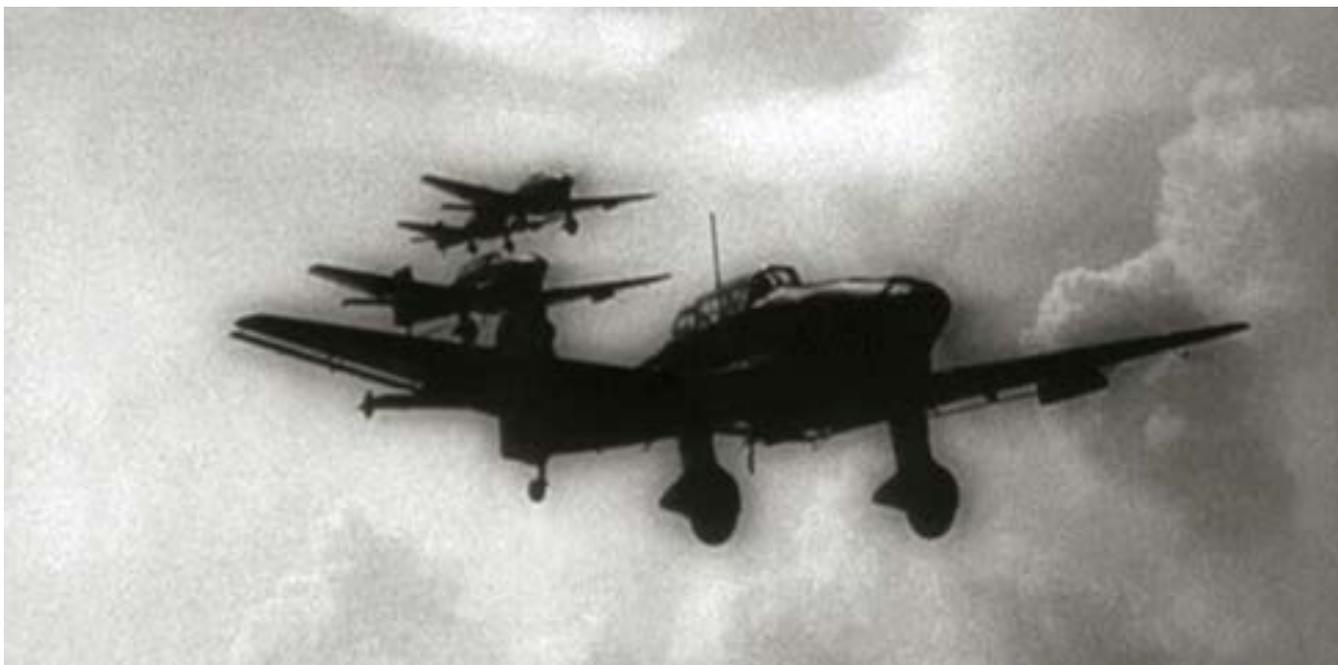

When the Berlin Wall fell in 1989, it marked the end of an era. How did people adjust to their new lives?

#### The Harvest – The Aftermath of East Germany's Fortified Border

The fall of communism in 1989 turned life in a small East German village upside down. Twenty years on, most of the inhabitants were still there, but their lives had been transformed. This epic report from deep in the heart of the former GDR provides fascinating insight and is compelling as a study of personal hopes and fears, joy and suffering.

## Hitler's Assault

How World War II Began

**364738**

Documentary,

02 x 30 min.,

2009, SD;

Arabic, English,

German, Spanish

WW, VoD, M

It was Hitler's invasion of Poland that triggered World War Two in Europe. This assault by National Socialist Germany, which contravened international law, began on 1 September 1939 when German troops entered Poland without warning. It ended on 6 October that same year when the last remaining Polish forces capitulated.

The commonly accepted theory is that the war began when the German warship Schleswig-Holstein shelled a Polish garrison on the Westerplatte peninsular in the city of Gdansk. In fact, however, a German air force bomber squadron had already reduced the small Polish town of Wielun to rubble.

The town's unsuspecting residents were taken by surprise as they lay sleeping in their beds. Wielun was a town without any military presence or strategic importance. It was almost completely destroyed in three bombardments.

Hitler's Assault is without precedent in television history. It is the first German-Polish co-production to document the events that started World War Two. The bombing of Wielun forms the dramatic framework of the film, which is told from both sides – German residents of the border region and soldiers on the one hand, and Polish eyewitnesses on the other. 70 years on, they talked about their personal recollections of how the war began. Renowned historians also discuss the events of August and September 1939.

## Fake, Stolen – Sold!

There's a lot of money to be made from art – legally and illegally. Speculators invest in works of art in the hope they appreciate more quickly than property or shares. Experts say that the third largest illegal trade worldwide is in art, behind drugs and arms. Top forgers make a fortune, and many in the international art world turn a blind eye to fraud if it is profitable. Criminals steal works in order to demand a ransom from their owners. *Fake, Stolen – Sold!* shows just how much criminal energy and human resourcefulness are devoted to making money from art – and how the police and judiciary, scientists and the media seek to put a stop to their game.

### **Great Masters, Easy Prey – Spectacular Art Thefts and Forgeries**

The list of spectacular raids on museums and galleries is a lengthy one. The cliché of the gentleman art thief has long been consigned to the realm of fiction. Art theft often involves violence. Crooks sometimes threaten to destroy paintings or sculptures if their demand for cash isn't met. Another misleading cliché is that of the forger as brilliant artist. In fact, forgers often make amateurish mistakes in their quest to make lots of money.

## Visions for Asia's Megacities

Asia's cities are growing at a fast and furious pace. In some regions, within just a few years fishing villages have become megacities with millions of inhabitants. Urban structures have barely had time to evolve in the process: many cities have no center, no appropriate infrastructure, and no discernible identity.

Renowned architects and urban planners are now trying to help shape the growth of Asia's cities. They aim to impose some controls on unbridled development and to come up with new architectural solutions for megacities that are unprecedented in size. First and foremost cities in China – such as Beijing, Chongqing and Shanghai – and Japan – such as Tokyo and Yokosuka – are developing projects that might serve as models for the entire world.

### 364859 001

#### The Creative Use of Space

In the densely built-up megacities of Asia, living space is scarce and the cost of property astronomically high. In the Japanese capital Tokyo, an entire school of architecture is dedicated to the design of compact residential units. For architects, the art lies in the creative use of available space. They build on the tiniest of plots or stack units one on top of the other. They also seek to counter the increasing isolation of urban dwellers by creating communal spaces, modern village communities within the anonymity of the metropolis.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

### 364859 002

#### Architecture and Landscape

Most of Asia's new megacities have few public squares or green spaces. The high cost of land and the striving for maximum profit often result in a destructive style of architecture that pays no regard to nature, even though the landscape and greenery have a particular spiritual significance in Asia. But architects have again begun to consider the landscape and to integrate their buildings within it. They are trying to bring nature back into the city, with gardens on roofs and in courtyards and with pools and lakes. Sometimes, the architecture itself becomes the landscape, as in the Fake Hills project in the Chinese city of Beihai.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

### 364859 003

#### Cultural Buildings as City Centers

Cities need spaces for people to meet – and that includes the new Asian megacities. Cultural buildings can serve as such spaces. A great number of museums, opera houses and arts centers are currently being built, especially in China. The structures are often spectacular and aim to give the cities a unique face. This approach is giving rise to a great number of bold and distinctive buildings in Asia, setting the architectural tone for the 21st century.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

### 364859 004

#### New Urban Models

Many Asian cities are threatening to implode under their own sheer size. The perpetual influx of people is driving the skyline upwards, and transit systems are struggling to cope. Buildings are erected in every available space. A new kind of urban planning is needed. In the Chinese city of Ningbo, for example, a residential complex of 200 homes has been constructed in layers, to promote the establishment of neighborly relations. New cities are being built today in the hope they will attract millions of people in the future. Public buildings, central squares and residential districts have all been laid out, though no one knows whether these ghost towns will ever evolve into vibrant metropolises.

**Documentary, 30 min.**, 2015, HD; Arabic, English, Spanish; VoD, IFE, LR

## Art Beats

Mention culture, and what usually springs to mind is famous writers and composers, great painters and sculptors, celebrated actors and singers. But culture encompasses much more: street musicians and graffiti artists, samba and tango virtuosos, masters of caricature and satire. Culture is vibrant and diverse, international and able to unite nations and peoples.

### **Elegance and Passion – The World of Tango**

Tango is rhythm. Tango is passion. Tango is elegance. Once you've been gripped by tango fever, you'll soon forget everything else. The dance originated in the 19th century in Buenos Aires and Montevideo. Today, it's a worldwide phenomenon. But no matter where its practitioners live, they all share one thing: a burning love for the dance and a desire to "lose themselves" in the music.

#### **Flamenco – Spain’s Primal Scream**

Outside Spain, flamenco is often associated with a particular style of dance. But for the Spanish themselves, it is the song form that is most important. The music is raw, with an eastern inflection, and was at first only performed vocally. The familiar guitar and dance accompaniment came much later. Created by the gitanos, the Romani people of Andalusia, flamenco tells of poverty and hunger, and of the pride and exuberance of this marginalized ethnic group.

A bar is a place where people meet – in public, but nevertheless in an intimate setting. It may sound like a contradiction, but the best bars manage to marry the two aspects perfectly. Creating the right space for this to work is the secret of a good architect or designer.

This series presents unusual and fabulous bars all over the world – from the “Ice Bar” in Copenhagen to the “Flair Bar” in Shanghai. We explore their innovative design by daylight and relish their moody magic by night.

**364838 001**

### Bars in Dramatic Spaces

How do you design a bar in a former church or theater, or a famous museum – buildings that already have their own special aura and ambience? Should the style defer respectfully to that of the host venue, or be bold and different? We look for answers at “Teatriz” in Madrid and at “The Wright” in New York’s Guggenheim Museum.

**364838 002**

### The Pull of the Panorama

A spectacular view over the metropolis is what these bars in Tokyo, New York, Shanghai and Hamburg have in common. The design is understated, allowing nothing to distract from the breathtaking vista. At the “Roppongi Hills Club” on the 51st floor of a Tokyo skyscraper, guests find tranquility in one of the world’s fastest-moving cities.

**364838 003**

### Intimacy in Cavernous Spaces

At the Centre Pompidou, the challenge was to create a bar and restaurant in a huge rectangular space with spectacular views over Paris. The architects added complexity and cosiness with a landscape of curving grotto-like chambers. Designers in Copenhagen, Berlin and Mumbai have also managed to create intimate bars and restaurants in large spaces.

**364838 004**

### From Concept to Brand

The unique interior design of these bars in London, Amsterdam and Copenhagen made them so famous they have since spawned offshoots and inspired copies all over the world. The cool design of Copenhagen’s “Ice Bar”, for example, has become an international brand.

**364838 005**

### The Return of the Decorative

When it comes to bar décor, the unfussy, purist look has been all the rage in recent years. But not for these bars in Madrid, New York and Shanghai. At the Madrid tapas bar “Estado Puro”, the designers paid playful tribute to Spanish tradition.

**364838 006**

### Digital Pop

The bar at the Nhow Hotel in Berlin packs a surprising punch with its futuristic design in digital style. The décor is a declaration of war on the restraint and strict straight lines of modernism. Eye-catching patterns, curvy forms and bright colors are now also in evidence in bars in Madrid, Venice and Shanghai.

**364838 007**

### Hidden Gems in Unexpected Places

These exclusive bars in Bangkok, Amsterdam, New York and Shanghai have given their interiors a grand exterior. The sleek white horizontal tubular structure in Bangkok’s business district is no science lab, but one of the city’s most trendy places to hang out, the “Supperclub”.

## The Art of Space

Green oases in the desert sands. Cool high-rise blocks and mythical gardens. Floating cities and underwater settlements. Skyscrapers and towers. Architecture in a category of its own, employing the most up-to-the-minute construction designs and traditional composition in natural spaces. From the breathtaking to the bizarre, the series *The Art of Space* shows the incredible variety of spatial experimentation being conducted today. It shines the spotlight on the risks and opportunities presented by the ever-changing face of our world.

### **The Gardener and the Princes – Enchanted Saudi Arabia**

A German landscape architect has been working in Arab countries for the last 30 years, designing parks, gardens and boulevards. He grants us a rare glimpse of the otherwise very private sphere of the Saudi royal family. The gardener's work involves marrying the highly modern lifestyle of the contemporary royals with ancient traditions and natural features.

**Documentary, 30 min.**, 2008, SD; Arabic, English, French, Spanish; LR

**564704 002**

### **When Buildings Grow Wings – Architects Emulate Nature**

Pneumatic constructions, lightweight varieties of steel, rope nets and membrane sails. New construction forms and materials modelled on natural phenomena – a spider's web, for example, the surface of a soap bubble, the animal skin of a wing. Spectacular buildings are being erected all over the globe, fantastically light creations on the highest technical and scientific level.

**564704 004**

### **The Cabriolet House – Letting the Light Flood In**

Whatever your views on modern architecture might be, the chances are you are fascinated by the idea of a house with almost windowless outer walls. The challenge for architects is to afford the resident family the maximum privacy, without making them feel in any way restricted. The result: a dream home that positively basks in light, with a courtyard that can be opened up like cabriolet.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**564704 005****The Telescopic House – A Home With Good Prospects**

The woman who built this home says: “Spaces have an influence not only on physical sensitivities, but also on spiritual mood.” And how right she is. But there’s just one problem: the building plot is long and narrow, posing an extreme challenge. The result is a design masterpiece, a unique modern burrow. A telescopic house with very special prospects.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**564704 006****Feng Shui for a Better Life – Arranging Spaces the Chinese Way**

Are you having trouble sleeping? Maybe there’s a water vein under your bed. Or the energy, known in Chinese as the Qi, is not flowing properly in your home. A solution is at hand. The practice of Feng Shui balances and harmonizes that energy within buildings and landscapes. It accentuates the relationship between man and nature, based on fundamental Chinese philosophical principles, for example the teachings of yin and yang. You never know, it could change your life.

**Documentary, 30 min.**, 2009, SD; Arabic, English, French, Spanish; LR

**564704 007****Floating Cities – A New Home on the Water?**

Rising sea levels are threatening coastal regions throughout the world. One of the countries likely to be hardest hit by climate change is The Netherlands. More than a quarter of its territory lies below sea level. The Dutch response to the experts’ dire predictions is innovative and unusual. Architects there are designing buildings that float on water.

**564704 008****Nothing But Glass – A Far-Sighted Concept**

Anyone building on a south-facing hillside with a stunning view should open the house up to the light and the landscape and keep it closed to the north. We visit just such a house, with a thirty-meter facade of glass overlooking a beautiful valley.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**564704 009****Boomtown Dubai – In a Financial Tight Spot**

Dubai has the tallest skyscrapers, the most magnificent shopping mall, the most luxurious hotel and the largest artificial islands in the world. But Dubai’s property market nearly experienced a crash, which revealed a brief but shocking glimpse at its economic vulnerability. This has increased doubts about Dubai’s urban planning concept and about whether it can withstand the pressures of the international financial markets.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**564704 010****Purists at Work – An Intelligent House**

The design is clear and simple. But the façade of this particular house conceals some phenomenal technology. For example, the owner may be away on holiday, but he can still communicate with people trying to visit him at home. Advanced control systems allow for energy-saving and intelligent interaction between the house and its human inhabitants.

**564704 011****Up in the Clouds – Life in Chicago’s Hancock Center**

The John Hancock Center is one of the world’s tallest structures and draws half a million tourists every year. About 5,000 people live in this Chicago landmark and they rarely need to leave it. They have everything they need under one roof – offices, a post office, a bank, a car park, a television station, fitness center, swimming pool, and plenty of shops.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**564704 012****Old Without, New Within – A House Inside a House**

Deep in the Bavarian Forest lies an old, weather-beaten farmhouse. It was small, humble, warped, cramped and totally dilapidated; its history stretches back 170 years. Then it was remodelled. The integration of concrete cubes into the existing framework created a house inside a house, a living space where new design finds its place within the original structure.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; LR

**564704 013****Under Pressure – Living and Working Under Water**

The idea of colonizing the ocean floor has been mankind’s dream for centuries, but could people really live or work underwater? For years now, visionary architects have been thinking up ways to make that dream a reality.

**Documentary, 30 min.**, 2010, SD; Arabic, English, Spanish; VoD, IFE, LR

**564704 014****Way Up High – Skyscrapers and Towers**

Tall buildings have always represented a fascinating challenge to architects. Chicago is the birthplace of the skyscraper. The tallest buildings the world had ever seen were constructed here using steel in the late 19th century, and the city skyline is still dominated by an impressive number of skyscrapers. Structures such as the Eiffel Tower in Paris or the TV tower in Berlin also attract hundreds of visitors daily hoping for a bird's eye view of the city.

**Documentary, 30 min.**, 2011, HD; Arabic, English, Spanish; LR

**564704 015****Clay Building Is Back**

Building with clay has long been out of fashion in Europe and other parts of the world. But as the concept of sustainability gains in significance, clay's qualities as a construction material are finding new favor among architects and planners. Clay is universally available, it is malleable, it stores warmth and it can even help keep the air clean indoors. Above all, construction with clay requires little energy.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564704 016****The House as a Source of Energy**

In the assessment of factors causing climate change, houses rank among the most voracious consumers of energy. Now, the world is seeing the construction of the first "energy plus houses", which produce more energy than they use.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564704 017****Brick – Nature's Own Building Material**

Fired bricks have been used as a construction material for more than 5,000 years – from ancient Mesopotamia, Egypt, Greece and Rome through to the present day. Bricks still enjoy a good reputation worldwide. They offer protection from damaging environmental factors, protect against fire, and have good heat-insulating and sound-proofing properties.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564704 019****Nature Is Future**

Awareness of the need to save energy is growing in Arab Mediterranean nations. That, in part, is in response to climate change and rising energy prices. More and more money is now being spent on the construction of low-energy housing, rather than badly insulated concrete buildings. Prototypes are being developed in many countries.

**Documentary, 30 min.**, 2011, SD; Arabic, English, Spanish; LR

**564704 020****Searching for the City of Tomorrow**

More and more people are living in cities, and they are constantly growing and changing. Photographer Peter Bialobrzeski captures this state of flux in his images. His search for the city of tomorrow takes him to the Chinese megacities of Hong Kong and Shenzhen, as well as the South African township of Soweto.

**Documentary, 30 min.**, 2011, HD; Arabic, English, Spanish; LR

**564704 021****My Home is My Castle – Living in Historic Buildings**

Many people dream of living in a castle. But what is it really like to live a modern life in such a historical setting, often with unheatable rooms and immense maintenance costs? Families that have lived in stately homes for generations and others that have acquired theirs more recently throw open the doors to their private quarters.

**Documentary, 30 min.**, 2012, SD; Arabic, English, Spanish; LR

**564704 022****The Fagus Factory – Walter Gropius' Timeless Factory Building**

In 1911, the German businessman Carl Benscheidt commissioned a new factory from the man who would later found the Bauhaus. With his Fagus Factory in Alfeld, Walter Gropius wrote architectural history. The innovative design broke with all tradition and created working conditions that were exemplary at the time. The factory is an important example of early modern architecture and has been included on UNESCO's list of world heritage sites.

**Living in a Castle – Construction Site Hell or Fairytale Dreamworld?**

Hohenlohe in southwest Germany is a region brimming with castles and palaces. Many people dream of owning such a historic property – but, in reality, this is often a life-long duty that requires a huge commitment in terms of both time and money. Still, the reward is nothing less than a home where every stone has a story to tell.

#### **Architecture and the Elements – Building for the Future**

Does architecture still fulfill its essential purpose, to protect against cold, heat and rain? Architects are currently engaged in a global debate over how best to deal with emerging challenges such as climate change and increasingly extreme weather phenomena. Floating houses and homes built below ground level are just two of many approaches under consideration.

## Ecopia

Intelligent Building, Sustainable Living

Today, more than half the world's population lives in cities. By 2050, the figure will have risen to more than two thirds.

Cities produce huge amounts of greenhouse gases and garbage, and are at the root of many of the world's environmental problems. Energy, water and raw materials are in increasingly short supply. What can we do to halt this trend?

The series Ecopia looks at exciting projects that address key questions: How should we live and work in the future? How should we shape our public urban spaces? How can green architecture provide new impetus for urgently needed ecological reforms?

**Eco-Cities**

Hamburg's Hafencity and the Tianjin Eco-City have been praised as models of sustainable urban planning. A huge stretch of derelict dockland along the Elbe river in Hamburg is being redeveloped to create vibrant new city neighborhoods. It is currently Europe's largest building site. The Tianjin Eco-City in eastern China is being built on undeveloped land. The plan is to try out eco-friendly technologies that can help slash energy consumption in China's cities.

**364792 002**

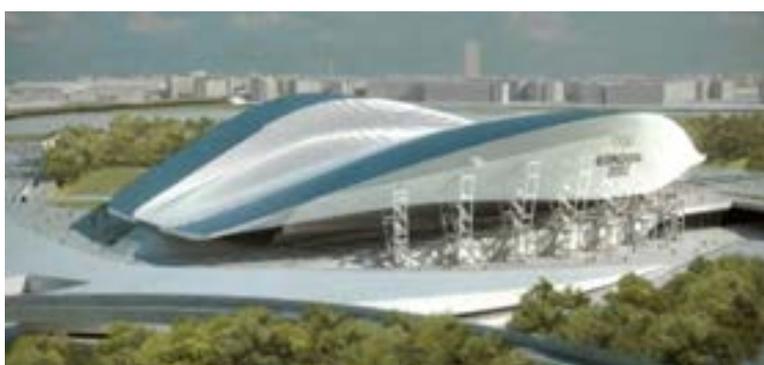

**Worlds of Knowledge**

School buildings made of locally-sourced clay in Burkina Faso, with a sophisticated roof construction and a passive ventilation system that uses no electricity. A university campus in South Korea that has been partially sunk into the ground to blend in with the landscape of an existing park. And a virtually planned science lab in Germany that is carrying out research into work environments of the future. These three sustainable projects from Africa, Asia and Europe in the education sector invite imitation.

**The Sky's the Limit**

The number of skyscrapers currently at planning or construction stage has never been greater. These buildings are becoming steadily more luxurious, imposing, taller and more robust. But architects are increasingly required to consider the environmental impact of their designs. The key question here is how to build in a manner that is simultaneously effective, efficient and ecologically sound. A sustainably built high-rise block costs around 10 percent more than a conventional one. But in view of rising energy prices, this investment pays for itself in just a few years. When assessing how to improve the green credentials of our towns and cities, the skyscrapers of the future are representative of the need to consider ecological and economic principles in equal measure.

### Modern Culture Temples

Museums, concert halls, theaters and libraries enjoy high status throughout the world. They are all landmarks of a town or city and define its cultural identity. As well as being important factors in the competition to attract international tourists, they also provide local people with a place to gather and exchange ideas. And if their architectural design is spectacular and avant-garde, these buildings hold a very special appeal.

### Tourism Goes Green

The tourism industry is viewed worldwide as an important economic factor with considerable growth potential. But more and more people are concerned about the environmental impact of their holidays. This has led to more sustainable architecture for tourist facilities. For example, in the east African nation of Rwanda, work is underway on two hotels distinguished by their innovative ecological approaches, cooperation with local partners and a design that reflects local traditions. On the Indonesian island of Bali, designers have created a holiday complex that aims to combine luxury with ecological principles. Materials have been sourced from the region; the ceilings are made of bamboo from certified plantations. The water recycling quota within the complex is at 80 percent, and most of the staff have been recruited from nearby villages.

Two artists who embodied the ideal of the Renaissance man were Lucas Cranach the Elder (1472–1553) and his son Lucas Cranach the Younger (1515–1586). They were among the most successful painters of the 16th century, working as court painters and immortalizing Martin Luther and the Reformation in their paintings. They also ran printing workshops, were paper wholesalers, had a pharmacy license and were mayors of the renowned university city of Wittenberg. In Cologne, the Cranachs' work is being digitized – a treasure trove for professionals and art lovers. The Cranach Digital Archive (CDA) makes it possible to zoom in on even the tiniest figures or the fine networks of cracks in painted faces. Our film follows in the Cranachs' footsteps and provides an insight into the lives, work and times of the famous family of painters.

With its 17,000 islands, 800 languages and 300 ethnic groups, Indonesia is a nation of superlatives. And one that is still searching for a common identity. After 350 years of Dutch colonial rule, decades of regional independence wars and a military regime that cost the lives of a million people, the country has yet to look its past squarely in the eye. For many years, a number of courageous writers have been agitating for this process to begin, by tackling subjects that still remain shrouded in silence: As a student in the 1990s, Linda Christanty from Jakarta joined the movement to topple Suharto. Azhari Aiyub from Banda Aceh writes about the region's past struggle for liberation and coping with the aftermath of the tsunami. Oka Rusmini lives on the island of Bali. She describes the constraints of the Hindu caste system. Through their work, all three give a voice to the weak.

Ai Weiwei is one of the most provocative artists of our time. At home in China, he was subjected to surveillance, detention and house arrest. He was able to leave in 2015 and now lives in Berlin. In his recent work, he takes Europe to task for what he considers its disastrous refugee policy. He turns his despair and anger into art and protest.

A solitary rubber dinghy floats in the Aegean between Turkey and Greece. Ai Weiwei cowers inside the boat. He cannot swim. What is the message? "We are all refugees," the artist says. He has created memorials in museums and public spaces out of boats, lifejackets and clothes abandoned on Europe's beaches.

The film gets close to Ai Weiwei, illuminates his work, and also gives a rare glimpse into his private life – with his mother in Beijing, with his son and partner in Berlin. Nevertheless, he remains a mysterious figure in many respects. Just who is Ai Weiwei?

WW, VoD, M, IFE

For years, a talented fraudster smuggled counterfeit antiques onto the art market. No one knew who the person was but workshops in southern Europe aroused suspicion. Experts have therefore named the fraudster the "Spanish master." The documentary follows German archaeologist Stefan Lehmann, who's been on the shark's tail. Around 40 counterfeits have been discovered so far, but he thinks it's only the tip of the iceberg. Lehmann hasn't made himself popular, as the subject of counterfeiting tends to get swept under the rug within the art trade and museums. A Swiss collector was the first to break the silence. He gave Lehmann access to a bronze head of Emperor Augustus, which he had bought for several hundred thousand dollars in New York. It's an exciting case for Lehmann. Will his examinations prove that the head is fake? Auction houses and galleries know exactly what they're selling, according to Christoph Leon, an art dealer from Basel who's working with Lehmann. He says the market is full of fakes because antique sculptures fetch high prices among investors. This film follows a trail of dirty dealings and gives an insight into the secretive world of the antiques trade.

For centuries, the book has been the vehicle and symbol of knowledge and intellect. But it has now been caught up in the digital revolution. Reading from a screen has become widespread. Online retailers of E-books are replacing bookstores, and putting publishers under pressure. Data about E-reading habits are being captured and analyzed, leaving readers vulnerable to manipulation. What is the value of the book in the digital age? How different are the approaches in Germany, where movable type was invented, and in the US, the pioneer of digitalization?

## Global Beethoven

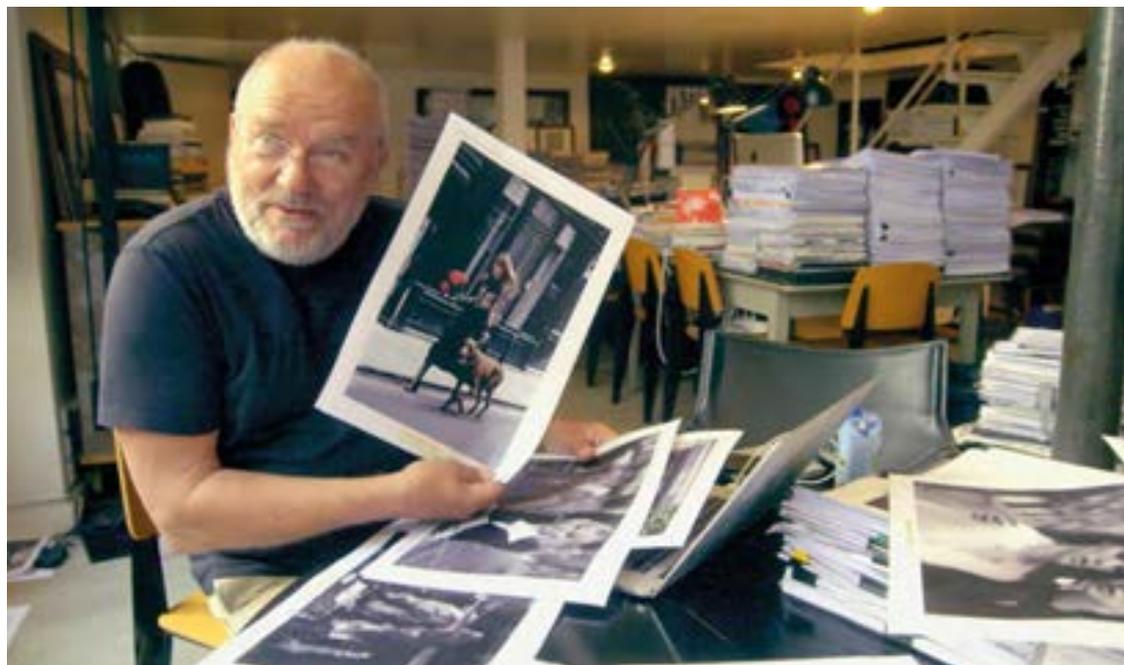

Cello and Horsehead Fiddle

**364861**

What does it sound like when Germany's National Youth Orchestra (BJO), plays music by the Chinese-Mongolian avant-garde composer Zulan? Zulan, who comes from Inner Mongolia, composed an opulent piece for the BJO and her own ensemble Mongolism. It's called Amila and describes the dance of the shaman that gives mankind a new soul. While the BJO's role is to set the scene, recreating the natural world, the shrubs, the mountains, Mongolism's role is to relate the story. The film charts the journey of Zulan and the orchestra, beginning with the first encounter in Germany. Then there is the BJO's concert tour of China, the second meeting with Zulan in Beijing and the first rehearsal of her music. And finally, the premiere of Amila at the 2015 Beethoven Festival in Bonn, where the German National Youth Orchestra and Mongolism perform together on the same stage for the first time.

Peter Lindbergh has taken pictures of countless supermodels and stars, and has become a star in his own right for his artistry and boldness as a photographer. His approach to fashion photography is very individual – and has been hugely influential. He establishes a very personal relationship during photo shoots. His talent at getting people to open up and at capturing them at a single, particular moment, is what makes his pictures so special. Vogue magazine selected his iconic photo of supermodels in white shirts as the most memorable image of the 1990s.

Lindbergh has a particular fondness for black-and-white photography, which he feels often conveys a particular kind of melancholy. His photos blend an avantgarde aesthetic with the unpretentious style of the down-to-earth person that is Lindbergh. The result: realistic portrayals that allow for the odd flaw.

### Islamic Garden Design

In Islamic tradition, gardens and leafy courtyards are a foretaste of paradise. They are places to find shade and to rest, places for families and friends to gather. But the typical features of such gardens were developed much earlier: 2,500 years ago, the kings of Persia commissioned magnificent palace gardens, bursting with fragrant flowers and shrubs, cooled by watercourses, pools and fountains, and surrounded by high walls. Pavilions and trellises provided shade and dappled sunlight. The kings' engineers created underground channels to bring water from faraway sources.

These palace gardens stood in stark contrast to the arid and inhospitable landscape that surrounded them. With their symmetry and opulent vegetation, they were seen as ideal images of nature. It is no coincidence that ideas of paradise in Judaism, Christianity and Islam were informed by such gardens. Whether on a grand scale, as the imposing park of a ruler's palace, or on a more modest scale as the courtyard of a merchant's house – this kind of garden spread, along with Islam, to the Arabian Peninsula, Central Asia, North Africa, Spain and the Indian subcontinent. While remaining true to its basic principles, it developed in different ways in each region.

The gardens in Morocco's oases and coastal towns are often embellished with splendid architectural elements, colorful ceramics and decorative metalwork. In India, under the Muslim Mughal emperors, many impressive parks were laid out, with huge ornamental pools. One famous example is at the Taj Mahal in Agra. In medieval Spain, horticulture flourished during the era of Moorish rule: For centuries, the opulent palace gardens of the Alhambra in Granada were also an inspiration to architects of Christian rulers. And in Arabia, the planners of public parks adhere to ancient tradition to this day: Fountains and streams with rippling water, trees that provide shade, and aromatic herbs are seen as indispensable features in spaces that offer the inhabitants of densely built-up cities relief from the heat and the hustle and bustle of everyday life.

What do escalators in Medellín, Arabic lettering in Amman, story-telling furniture from London, urban farming in Detroit and a co-living complex in Tokyo have to do with the Bauhaus?

The architect Walter Gropius founded the Bauhaus in Weimar in 1919. He brought together some of the most illustrious artists in Europe to create a school that would fuse the fine arts and the crafts. Together, they set out to fundamentally rethink the world and society. Although the Bauhaus school – which later relocated to Dessau and then to Berlin – only existed for a few years, it revolutionized ideas about the organization of modern life.

In 2019, the Bauhaus will celebrate the 100th anniversary of its founding. To mark the occasion, planetfilm has produced a series of three documentaries for Deutsche Welle. The films focus on the influence that the philosophy of the Bauhaus movement still exerts on the globalized society of the 21st century. They also explore historical parallels between 1919 and the present day: Society is facing major upheavals and challenges, just as it did back then.

We meet architects, urban planners, designers and artists from around the globe who, in the spirit of the Bauhaus, want to rethink and change the world. Tatiana Bilbao, for example, is a Mexican architect who has designed an 8,000-dollar house for the poorest members of society. The designer Ahmed Humeid is working on plans to bring order to the traffic chaos of the Jordanian capital Amman. How and where will the world's burgeoning population live in future? Minimalistically and collectively in tiny spaces, as the German architect Van Bo Le-Mentzel envisages it? Or maybe even on Mars? British star architect Sir Norman Foster has drawn up designs for a settlement there.

Segments on the history and philosophy of the Bauhaus provide context and background to some of today's most pressing issues.

### Bauhaus in 60 Seconds

One clip for each of the three Bauhaus films “The Code”, “The Effect” and “The Utopia” to answer the questions at the heart of the episodes.

**324908 001**

#### What Is Bauhaus?

Bauhaus is composed of many different ideas and values. Harmony, innovation, functionality, creativity, freedom, intuition, community, accessibility and fairness – all this is what Bauhaus is about.

**324908 002**

#### Where Can We Find Bauhaus?

Even 100 years after the founding of the Bauhaus school, its effects can still be felt around the world in architecture, fashion, technology, art, dance, industry and typography.

**324908 003**

#### Why Care About Bauhaus?

How we utilize the spaces we live in has strong implications for our present and our future. Democracy, humanity, nature – all are under threat and smart design might be the only thing that can save us.

### The Spirit of Bauhaus

Meet three creative individuals who keep the spirit of the Bauhaus alive.

**324908 004**

#### Space to Develop: Norman Foster

The world-renowned architect dares to envisage the future. There’s so much space left to develop right here, to optimize our societies, adapt to imminent threats and better our lives.

**324908 005**

#### Follow Your Gut: Yinka Ilori

Always on the lookout for vintage furniture that he can up-cycle, Yinka Ilori transforms his find into a functional piece of art, inspired by the traditional Nigerian parables and African fabrics that surrounded him as child.

**324908 006**

#### Design = Bauhaus: Jan Gerner

When German graphic designer Jan Gerner traveled to Jordan, he developed the official “Amman font”. It represents both Arabic and Latin lettering equally well and adorns the capital’s many street signs, public vehicles and buildings.

### The Bauhaus Philosophy

Our great minds of today find new solutions for tomorrow inspired by the ideas of the Bauhaus. Our shared desire for utopia is what propels innovation and inspires us to pull together.

#### A Better Life for All: Elevating the Favelas

## Unlocking the Past

Wherever people live, they leave traces behind them. Some of these are temporary, others survive the test of time. What we know about the history of humanity we owe to such traces: impressive buildings; magnificent works of art, music and literature; great achievements in the fields of science and technology – but also everyday objects, transit routes, the remains of settlements or ritual sites. All over the world, scientists are investigating the often hidden traces of past eras and cultures. They preserve the remains of the past for the future, and explore the wide range of human activity over many millennia.

### **Multi-Colored Deities – The Aesthetics of Antiquity**

It was long believed that the sculptures and buildings of ancient Greece and Rome were of pure unpainted stone, often white marble. Archaeologist Vinzenz Brinkmann, however, argues that many sculptures and temples in ancient Greece were actually brightly colored and often decorated in highly provocative fashion.

#### **Troy: The Truth behind the Myth**

As the legend would have it, the Greeks were only able to capture Troy because they lured the Trojans into a trap. Pretending to sail away after a long siege, the Greeks left behind a large wooden horse, which the Trojans dragged into their city as a trophy of war. A select group of Greek soldiers were hiding in its belly. Once they'd crept out, the soldiers opened the city gates allowing the Greek army access. It's a fable familiar to many. But is there any truth in it?

## Of Gardens and Gardeners

Gardens: oases of the modern world, places where people go to regenerate and reconnect with their senses. Previously sites for the cultivation of food, these days gardens are status symbols and islands of peace and reflection. Gardens fulfill a human need for beauty, creativity and proximity to nature. They are also an expression of the era in which they were designed, their geographical location as well as the social standing and preferences of their owners. As a result, not only does a garden serve those who design and utilize it, it also reveals a great deal about them.

### **A Turbulent History – The Gardens of Southwest Ireland**

In Ireland, ornamental gardens were for a long time the preserve of the upper classes. Ordinary people cultivated the land to grow food out of necessity. During the civil war in the 1920s, the manorial estates were often ransacked. It was decades before some of the owners eventually returned to reclaim their property. The gardens in the southwest of the country, a region blessed with a mild climate, reflect this fascinating history.

**364779 004**

### **Turning the Desert Green – Gardens in Saudi Arabia**

Saudi Arabia is investing a great deal of money in measures to inject some green into its desert-dominated lands. Whether it is to create more parkland in the capital Riyadh or to establish private gardens, the harsh climate and shortage of water are just as much factors in the design as Arab tradition and the desire to pursue avantgarde ideas. One of the most influential landscape architects currently active in Saudi Arabia is Germany's Richard Bödeker.

**364779 007**

### **Royal Parks and Community Spaces – The Gardens of Paris**

French garden design is famous for its long perspectives and geometrically ordered landscaping. Absolutist in style, its dominance of nature reflected the omnipotence of the King. Contemporary Paris has seen the creation of modern gardens that are open to all. Community gardens serve as places for urbanites to gather in natural surroundings.

## Sites of the World's Cultures

This series looks at landscapes, cities, cult sites and monuments, all of which have made a unique contribution to the cultural heritage of mankind. Each episode brings alive civilizations which rose in the last ten thousand years and then sank – sometimes without a trace – into the mists of history. The films focus on epochs which moulded the identity of nations and continents, and on cult sites which have retained their fascination and influence through to the present day.

### **Stonehenge and Megalithic Cultures**

There are some 5,000 neolithic monuments in Europe – relics of a culture which left nothing in writing and whose religion is shrouded in mystery. This film looks at the megalithic enigma of Stonehenge and builds up a picture of the culture that created it.

**384628 002**

### **Xian – Changan: Cradle of Chinese Civilization**

Xian, the Changan of ancient China, is a major world cultural site. The city on the Huang (Yellow) River and the area around it were a cradle of Chinese culture and civilization.

**384628 003**

### **Southern India and the Dance of the Gods**

According to an ancient Indian myth, the world emerged from a kumbha, a pot – and it all began in Kumbakonam. The city in the south of India claims to be the hub of the universe – a status reserved by Hindus for the sacred city of Benares.

**384628 004**

### **Tikal and the Gods of the Maya**

The Maya emerged from the mists of history more than 3,000 years ago and created an advanced civilisation which lasted six times longer than the Roman Empire.

**384628 005**

### **Egypt and the Nile Valley**

Everyone has heard of the pyramids, the legendary gold mask of Tutankhamun and Egyptian mummies. Even so, these products of an advanced civilization born 5,000 years ago continue to pose questions that still puzzle historians today.

**384628 006**

### **Athens – Birthplace of Democracy**

Athens – model and mother of western civilization – is still one of the liveliest cities in Europe, an ancient metropolis that has retained its youth.

**384628 008**

### **Palmyra Part 1 – Hub of Trade and Military Crossroads**

A country criss-crossed by trade routes, Syria looks back on thousands of years as a cultural and commercial transit zone between East and West.

**384628 009**

### **Palmyra Part 2 – Bride of the Desert**

The oasis city of Palmyra on the northern fringe of the Syrian Desert is a treasure trove of ancient architecture, a place where the magic of desert life and desert civilization can still be felt in the remains of magnificent temples and baths, theatres and tombs.

**384628 010**

### **Teotihuacán – City of the Gods**

Only a short bus ride from Mexico City are the remains of the ancient city of Teotihuacán. Founded more than 2,000 years ago, it was the home of some 200,000 people – creators of gigantic pyramids and stunning murals and sculptures who ruled over large parts of Central America for many centuries.

**384628 011**

#### **Jerusalem – City Between Religions**

Jerusalem is a city sacred to Jews, Muslims and Christians alike and the home of three religious communities living more side by side than together. Their holy places are only metres apart. Each of the great monotheistic religions has laid claim to this city.

**384628 012**

#### **Venice – The Insatiable City-State**

Venice's glorious past is literally paraded by its wealth of splendid buildings, especially along the Grand Canal. Thanks to the lagoon city's prowess in international maritime trade, it was for centuries one of the most influential places in Europe.

**384628 013**

#### **Paris – A Celebration of the 19th Century**

In the middle of the 19th century, Paris was a desperately overcrowded city choking on its own waste. Within decades, however, demolition and redevelopment had turned it into one of the world's most resplendent capitals with a magnetic attraction for artists, writers, revolutionaries and pleasure-seekers.

**384628 014**

#### **The Ganges – The Divine River**

Ganga, as the Indians call it, Mother Ganges, the goddess Ganges, is the sacred river of India. Devout Hindus believe that bathing in the holy waters of the Ganges can wash away their sins.

**384628 015**

#### **Damascus – Paradise on Earth**

After the Umayyid dynasty chose Damascus as its seat in the middle of the seventh century A.D. the Syrian city acquired a legendary reputation. For around one hundred years Damascus was the focal point of world culture. Alongside its Islamic history, the name Damascus also has close links with Christianity.

**384628 016**

#### **Macchu Pichu and the Legacy of the Incas**

Macchu Pichu is a magical place. Yet more than any other historical site, it has come to symbolize the lost culture of those who built it: the Incas.

384628 017

**Florence and the Spirit of the Renaissance**

Florence is regarded as the focal point of the development that restored the revolutionary ideas of the Renaissance and its enthusiasm for the art of antiquity. Back then, this Italian city on the river Arno was one of the most important commercial centres in Europe and a centre, too, of culture and political power.

384628 018

**Pergamon and the New View of the World**

Greece is regarded as the cradle of European culture. But the origins of Greek philosophy, and thus of the history of European thought, are to be found in Asia Minor. Through the influence of Greek immigrants, in cities such as Smyrna (modern-day Izmir), Milet, and Ephesus those ideas emerged to form the basis of the writings of Plato and Aristotle.

384628 019

**Persepolis – The Stage of Kings**

King Darius I of Persia had a residency built which was intended to be more magnificent than anything the world had ever seen: Persepolis. It was soon regarded as the “richest city under the sun”.

384628 020

**St. Petersburg – Window on Europe**

When he laid the foundation stone for his new capital of the Russian Empire in 1703, Peter the Great wanted to create a window on Europe. But it was only under Catherine the Great that Petersburg developed into the flourishing metropolis Peter the Great had dreamt of: a “Venice of the North”, a city of the arts, science, and literature.

384628 022

**Hue – The City on the Perfume River**

Hue, the city on the much extolled Perfume River, can be described as Vietnam’s centre of culture. Based on the Forbidden City in Peking, in the 19th century an imperial palace was built in Hue to bear witness to the power and wealth of the Nguyn dynasty.

384628 023

**Chartres and the Spirit of the Middle Ages**

In the eyes of many, the Gothic cathedral at Chartres is the most beautiful of the numerous splendid cathedrals in northern France. A synthesis of architecture, sculpture, and glass painting, this vast work of art has survived down the centuries with very little damage.

384628 024

**Lhasa and the Spirit of Tibet**

The Potala Palace overlooking Lhasa bears testimony to the former power of the Dalai Lama and to a once colorful culture.

384628 025

**Konya and the Whirling Dervishes**

The Turkish city of Konya is regarded as the heart of Sufism, a mystical movement within Islam. Sufism is characterized not by a fundamental interpretation of the Koran but by the search for a deep and passionate love of God. The legendary dance of the whirling dervishes also originated in Konya.

384628 026

**The Escorial – The Dream of a Devout Monarch**

As a bulwark of faith and a symbol of the greatness and power of the Spanish Empire, the Escorial is a perfect reflection of the 16th century. An aura of the Inquisition pervades this huge and austere monastic castle which was built by King Philipp the Second of Spain and from which he ruled his empire with an iron fist.

European architecture stands out through an almost unparalleled pluralism of style. The striking buildings of the modern era are characterized sometimes by structural achievements or the innovative use of materials, sometimes by a special language of form. In view of such architectural variety, it is impossible to talk in terms of a pan-European style. Yet constants and popular stylistic devices can be identified. In postmodern architecture everything seems possible: from geometric cubes to organic domes, from neo-classical stylistic creations to futuristic constructions.

To a certain extent, the latest examples of post-modern European architecture pay homage to the old rule “form follows function”, which dominated all schools of architecture and design in the early 20th century.

We proudly present Euromaxx Architecture showcasing the most important and exciting and also the most controversial European buildings of the 20th and 21st centuries.

### SAMPLE EPISODE

#### Historical Apartment Meets Ethnic Furnishings

An historical apartment with ethnic furnishings. The 100 square meter condo of artist’s collective “Slavs and Tatars” is anything but dull. It’s fitted with a Moroccan door and has Asian rugs.

#### A Remodeled 1960s Bungalow in Iceland

Anna Gunnarsdóttir has remodeled her bungalow near Reykjavik, retaining the concrete look of the exterior. The living space has big windows and the garden has a typical Icelandic thermal bath.

#### Living in a Pyramid House

A house shaped like a pyramid can be hard to furnish, with all the slanting walls and dead space. Norwegian artist Birte Lohne shows us around her own pyramid house, and reveals how she’s made the most of it.

#### A Seafront Vacation Home in Greece

A cozy vacation home on the sea in Greece’s Peloponnese region features the color-schemes of the surrounding landscape: the blue hues of the sea, and the beige tones of the local sandstone.

#### A “Villa Villekulla” in Lyon

From the outside, the Chavannes’ house looks quite traditional. Inside, however, the creative couple have constructed a unique home: colorful and almost magically decorated, yet functional at the same time.

#### All Lit Up: The “Luminale” Festival

The six-day ‘Luminale’ festival turns Frankfurt in Germany into a sea of light, with installations by light artists making more than 100 sites in the city sparkle and shine.

Design is the process by which nearly all objects – from cars to paper clips, from clothing to chairs – acquire a certain form and function. But design involves more than just shaping and styling: good design is a complex process in which different and often contradictory requirements have to be met to ensure that objects function in the desired way. Design is only good when aesthetic, ergonomic and ecological aspects, durability, function and comfort harmonize and complement one another.

Euromaxx Design presents the most important and exciting creations on the European design scene. It portrays star designers, shows emerging trends and pays tribute to traditional design.

The individual reports of our successful series Euromaxx Design introduce the latest creations from the automotive industry, from furniture designers, glassworks and material and jewelry studios and visit trade fairs, exhibitions and presentations.

### SAMPLE EPISODE

#### Cool Art: Snow Village

Each year in Finland's Lapland region, the Snow Village is created from 20 million kilograms of snow and 350 tons of ice. Despite temperatures of -35°C, you can even spend the night in one of the igloo suites.

#### Pixel Art Made from Fuse Beads

Swedish artist Johan Karlgren revives the cartoon, film and video game heroes of the 1990s. His pixellated figures appeal to the taste of many retro fans on Instagram.

#### Digital Baking

Ukrainian confectioner Dinara Kasko accurately designs her geometric cakes on a computer. Then she 3D-prints silicon molds. Sweet works of art, almost too amazing to eat! Almost.

#### Lockengelöt's Designer Upcycling

Two designers from Hamburg are exploring the creative potential in junk. They make egg cups from old skateboards, clocks from vinyl records and stylish coffee tables from disused oil barrels.

#### Fashion for the Blind

How can fashion be transformed into a multi-sensory experience for the blind and vision-impaired? European fashion schools explored the question and came up with clothes that feel, smell and sound good.

#### Honoring a Fashion Legend: Gianni Versace

A retrospective on the work of fashion designer Gianni Versace has opened in Berlin. The exhibition includes many unique items and sketches. The opening-night festivities paid tribute to this legendary designer.

We travel around Europe to trace the manifold roots of European cuisine and to show how Europe's culinary heritage is reworked and refined by the continent's top chefs. They give us an insight into their skills as they turn regional specialties into gourmet delights. For Euromaxx à la Carte they demonstrate European gastronomy at its finest in their award-winning restaurants.

It's all here – from new Scandinavian cuisine to hearty Bavarian dishes. For dessert, each program focuses on a special subject, such as the delicate craft of the chocolatier or top wines from France. Euromaxx à la Carte takes your taste buds on a European tour.

### **The Enduring Success of 'Dinner in the Sky'**

The gondola serving a gourmet dinner was first hoisted 50 meters above the ground in 2006. It's served meals in 55 countries since then, to rave reviews. Now, it's back in Belgium, where the idea first got off the ground.

### **Tasty Lamb Goulash Gheimeh Bademjan from Iran**

Rice is the most important side dish to accompany Gheimeh Bademjan, a lamb goulash made with eggplant and yellow split peas. And no one cooks rice like an Iranian, says restaurant owner Saeed Sanatpour.

### **Wine From the Greek Mainland**

Wine has been cultivated in Greece for over 4,000 years. Simple wines are traditionally served in taverns here, but now stylish wine bars are competing. And a new generation of vintners is taking over the market.

### **Revolutionary Cuisine: Mikkel Karstad**

Mikkel Karstad is one of Denmark's most unusual chefs. He says there's no excuse for companies to provide their workers with bad canteen food – and he's set out to change that.

### **A Dish to Cook at Home: Koshary from Cairo**

Egypt's national dish, Koshary, is a mixture of macaroni noodles, chickpeas and tomato sauce. It inspired the name of Michael Landeck's Berlin delicatessen. The Koshary Lux serves original Egyptian dishes.

Food can break down boundaries and connect people all over the globe. It also tells stories about the world's diverse cultures. An omnipresent phenomenon in our globalized world is fast food, or light bites on the go. When it comes to snacks, every region has its own specialties. The snack is a reliable barometer of a nation and its people.

Whether it's tapioca in Brazil, falafel in Lebanon, dal baati in India or maandazi in Kenya, ... whether it's a mobile cookshop, a hawker's tray or a hotdog stand: Global Snack guides the hungry through the maze of light-bite possibilities, wherever you happen to be.

### The Gurus of Indian Cuisine

Working as a top chef in India is a particularly challenging job in view of the many different culinary preferences and traditions on the subcontinent. For many Indians, beef is taboo for religious reasons; it's important to understand and master vegetarian cooking; and some people won't even eat vegetables that grow beneath the earth. All of this means the gurus of Indian cooking have to be highly creative.

**564837 010**

#### **Scrumptious Switzerland**

If you're watching your waistline, then the dishes typically served in the Swiss canton of Graubünden are probably not for you. Barley soup or stuffed dumplings, special kinds of sausage or pastries made with nuts – traditional meals here are a revelation for fans of hearty, filling food. It's down-to-earth cuisine just like grandma used to make.

**Documentary, 30 min.**, 2015, HD; English, Spanish; LR

**564837 011**

#### **Thailand's Delicacies**

Thai cuisine offers an amazing variety of tastes and is made with fresh, healthy ingredients. No wonder it is popular around the world. In Thailand itself, mealtime traditionally involves a pleasurable custom. All dishes on the table are shared – to ensure that each diner partakes of a balanced, substantial meal: A little of everything, instead of too much of one thing.

**Documentary, 30 min.**, 2015, HD; English, Spanish; LR

**564837 012**

#### **South Tyrol – Cuisine Flavored by Italy and Austria**

Hearty Alpine specialties combined with Mediterranean lightness – this is the charm of South Tyrolean cuisine. It is a synthesis of two culinary cultures – the Italian and the Austrian. The cuisine in the northernmost province of Italy may be rooted in tradition, but it's often served up with an innovative twist, and with the accent on top quality ingredients.

**Documentary, 30 min.**, 2015, HD; English, Spanish; LR

**564837 013**

#### **The Alsatian Gourmet Experience**

Wherever you might be in the eastern French region of Alsace, you'll never be far from haute cuisine. The finest goose pie, partridge in cognac sauce, desserts that melt in the mouth – many starred chefs are at work in Alsace, which borders Germany. As well as diners, the region also attracts those keen to look over the shoulder of one of these masters and learn some of the secrets of their trade.

**564837 014**

#### **Pizza – The Global Fast Food Hit**

The first big waves of migrants from southern Italy reached the US in the 19th century. The Neapolitans arrived with the recipe for their national dish – pizza. It wasn't long before the new dish had captivated the taste buds of the New World. Today, it's not just a case of the Americanized version returning to Europe and competing with the original Italian fare. Pizza is also the most popular fast food in the world.

**Documentary, 30 min.**, 2017, HD; English, Spanish; VoD, IFE, LR

**564837 015**

#### **Barbecue – Meat Cooked to Perfection**

It was invented by the French, perfected by the Americans and introduced to the rest of the world – the barbecue. But we're not talking about a few sausages and burgers out in the garden. A real barbecue involves cooking the meat for hours in the hot smoke of a wooden fire, then serving it with a variety of sauces to suit all tastes. Barbecue fever has now spread to the inhabitants of other continents. Like the typical oven, known as a smoker, the strictly regulated barbecue competitions from the US are also catching on.

**Documentary, 30 min.**, 2017, HD; English, Spanish; VoD, IFE, LR

**564837 016****Tofu, Miso and Soya Sauce – The Magic of the Soya Bean**

Centuries ago, Buddhist monks in China allowed soya milk to curdle, and named the resulting “cheese” tofu. The Japanese continued to develop it into its present soft form. Soya products are intrinsic to Asian cuisine. Tofu, miso soup and soya sauce are now regarded as key components of a healthy diet all over the world. And beyond the borders of Asia too, tofu is increasingly being regarded as a foodstuff in its own right, rather than just a substitute for meat.

**Documentary, 30 min.**, 2017, HD; English, Spanish; VoD, IFE, LR

**564837 017****Pasta – Simple and Versatile**

Spaghetti, tortellini, ravioli – a success story initiated by the Arabs. The idea of drying pasta products was theirs, and they brought it to Italy during the Middle Ages. This meant that pasta was no longer just for the domestic kitchen. It became an industrial product that could be preserved and transported, in a variety of forms to appeal to all tastes. From that point on, the success of pasta knew no bounds.

**Documentary, 30 min.**, 2017, HD; English, Spanish; VoD, IFE, LR

**564837 018****The Sausage – A Story with Two Endings**

The humble sausage handmade by Viennese butchers is steeped in legend, anecdotes and a multitude of questions. Why do the Viennese call the wiener a frankfurter? How did it evolve into today’s hot dog? And what do an emperor, a countess and even a pope have to do with the sausage from Vienna? Although the wiener is a common snack food pretty much everywhere these days, its story is far from over. As the old German saying goes: “Everything has an end – only the sausage has two.”

**Documentary, 30 min.**, 2017, HD; English, Spanish; VoD, LR

## Animal Encounters

Can there be such a thing as a spiritual affinity between animals and humans? The men and women in our Animal Encounters would probably say yes. They have all felt a profound connection with certain animals, a relationship that has stayed with them ever since their first meeting. The devotion with which they commit to the welfare of their protégés, the trust that these animals demonstrate and the wordless form of understanding between them are often an enigma to outsiders.

**564825 001**

### **My Friend, the Wolf**

Few people have such an intense relationship with wolves as the Norwegian Frank Andrè Soma. This is evident to anyone watching him playfighting with "his" wolves. Frank Andrè Soma campaigns for wolves to be able return to their old habitats in Europe.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; VoD, IFE, LR

**564825 002**

### **Masters of the Eagle**

Among the nomadic Kazakhs of Mongolia, the berkutchi are a respected group of men who hunt with golden eagles. The skills needed to train the birds are passed down from one generation to the next. Aralbay and his female eagle have been hunting together for many years. He removed it as a chick from its nest and tamed it.

**564825 003**

### **At the Elephant Orphanage**

In Kenya, keepers at the David Sheldrick Wildlife Trust lovingly raise baby elephants, most of whom were orphaned when poachers killed their mothers. For all of those concerned, this is more than just a job. The men bottle feed the babies every three hours and are there when traumatised calves are plagued by nightmares.

#### **Searching for Sky the Bear**

The Swiss-Canadian bear researcher Reno Sommerhalder released five young grizzlies into the wild in Kamchatka, Russia. Years later, he returns to find out what has become of his favorite female, Sky. Has she survived in the wilderness?

**Documentary, 30 min.**, 2014, SD; Arabic, English, Spanish; LR

**564825 007**

#### **A School for Monkeys**

In Thailand, the coconut harvest is monkey business. Usually, wild monkeys are captured and beaten until they have learned how to do their job. But at Somjai Saekhow's school for monkeys, it's quite a different story. With plenty of love and endless patience, her staff teach them how to recognise a ripe fruit and pluck it.

**Documentary, 30 min.**, 2014, HD; Arabic, English, Spanish; LR

**564825 008**

#### **Among Dolphins**

The Swiss biologist Angela Ziltener resigned her job, left family and friends, and moved to Egypt's Red Sea coast, all to be close to "her" dolphins. While diving with these animals, she gains the most extraordinary insights. This is because she manages to integrate herself within the pod, as though she were a dolphin herself.

Black people have been living in Germany for around 400 years, and today there are an estimated one million Germans with dark skin. But they still get asked, "Where are you from?" Jana Pareigis is all too familiar with this often latently racist question. When she was a child, the Afro-German TV presenter also thought her skin color was a disadvantage. "When I was young, I wanted to be white", she says. Pareigis takes us on a trip through Germany from its colonial past up to the present day, visiting other dark-skinned Germans to talk about their experiences. They include rapper Samy Deluxe, pro footballer Gerald Asamoah and Theodor Michael, who lived as a black man in the Third Reich. They talk about what it's like to be black in Germany – and what needs to change.

### **In Search of a Lost Childhood – The Cruel Fate of Bruno Schulz**

For a short time around the turn of the millennium, everyone in Europe was talking about the Jewish Polish painter and writer Bruno Schulz. A German documentary film maker had discovered frescoes that Schulz had been ordered to paint for an SS officer in a villa in Drohobycz, in what is now Ukraine. A short time later, representatives of Yad Vashem removed parts of the pictures and took them to Israel where they are now on display. But what do we really know about Bruno Schulz? He was born in Drohobycz in 1892 and shot there by a Nazi officer in 1942. He created images and stories often set in a fantastical, fairytale realm. He could so easily have been forgotten, but now his literary oeuvre has been translated into 30 languages, a successful Polish group is named after him, and in the town of his birth, artists from all over the world gather to perform his work.

## On Island Time

Islands often figure in our dreams and fantasies. We are drawn to the idea of white sandy beaches and clear blue water, remoteness and tranquility. Real islands can be tiny coral reefs or huge expanses of land, nation states with large cities and millions of inhabitants; they can be located in tropical climes or in the icy waters of the Arctic. Many secluded islands have developed their own distinctive flora and fauna.

As for their human inhabitants, there is often talk of an island mentality. Many islanders are closely bound up with the ocean, are involved in maritime trade or fishing, and maintain local traditions. We tell of South Sea islands, natural paradises, islands of fire and ice as well as the lives of island dwellers.

#### Elba, Montecristo and Gorgona – Italy's Tuscan Islands

Tuscany is considered one of Italy's most beautiful regions. The islands just off its coasts are just as diverse and picturesque as the mainland region itself. They combine many of the region's attractive features in a small space. Mountains, rocky coastlines and sandy beaches make the main island, Elba, seem like a small continent and yet it's only thirty kilometers long. The islands of the Tuscan Archipelago have been a popular holiday destination since the 1960s.

**564834 012****Mallorca and Menorca – Spanish Mediterranean Sisters**

The Spanish Mediterranean islands of Mallorca and Menorca are popular with northern and central Europeans looking for beach holidays. Accessible after just a short flight, the islands offer lots of sand and a pleasant beach climate. That's why tourism here has developed since the 1960s to become the most important economic factor, and it's brought prosperity to the islands. But off the beaten track of mass tourism and all-inclusive deals, both Mallorca and Menorca have held on to their original character – in remote and lonely mountain regions, in medieval towns in the interior, at village fetes and most recently in a few places along the coast where old traditions are being rediscovered.

## By the River, by the Water

Rivers define the landscape and the lives of those who live along their banks. They supply water, food and construction materials and make the land fertile. Rivers transport people and goods and are the source of many myths and legends. They are places of recreation and the habitat for countless animal and plant species. All over the world, the quantity and the quality of river water are decisive in determining the quality of life. On our journeys along the rivers of the world, we meet people who live with the water and depend on it for their livelihood and we provide insights into cultures and habitats.

**The Yenisei – Russia's River of Tears**

Ships are only able to sail down the Yenisei to regions north of the Arctic Circle during the short Siberian summer. When the river is icebound, the villages along its banks are practically cut off from the outside world. There are no roads or railway links to this desolate region. Most of the people who live here are descendants of those displaced and banished during the Stalin era. For them, the Yenisei is both a lifeline and a source of great sorrow.

## Exploring Germany

Germany is one of the world's top travel destinations. It boasts not only outstanding natural beauty, but also a huge variety of historic sights and places of interest. The "nation of poets and thinkers" is also the homeland of inventors and composers, explorers and monarchs who have left their mark on German culture. Retrace their steps and you'll see many magnificent buildings and learn a great deal about the history of Europe along the way. Germany's most recent history is represented by, for example, the remains of the Berlin Wall, a symbol of the East-West divide. Away from major cities such as Munich or Berlin, special vacation routes guide visitors to interesting and beautiful places across the country.

### Berlin – A Constantly Changing Capital

To this day, the character of the German capital is still defined by the Berlin Wall, which divided the city into East and West. Berlin is one of the most captivating cities in the world, and not just because of its fascinating history. It has long been regarded as a multi-cultural, creative metropolis with lots of green space and a night life unrivalled for its diversity and exuberance.

**564842 002**

### Time Travel – Retracing the Footsteps of Famous Germans

We visit some key locations in the lives of influential Germans. We go to Berlin to see sites associated with the explorer Alexander von Humboldt, including the Museum of Natural History. Then it is on to Bavaria, where King Ludwig II built magnificent fairytale castles. We also follow in the footsteps of the composer Richard Wagner, the church reformer Martin Luther and the folklorists, the Brothers Grimm.

**564842 003**

### Munich – Bavarian Metropolis with Tradition

Munich's contemporary role may be to host big names in the technology and automobile sectors, but the city can also look back on a long and vibrant history. The kings of Bavaria put their stamp on their capital with many imposing buildings and institutions, including world-renowned museums. Munich is also famous for its annual Oktoberfest or beer festival, which is now the largest public festival in the world.

**564842 004**

### Experiencing History – German Division, German Unity

For a taste of communist East Germany and the peaceful revolution that brought it to an end in 1990, one should visit Leipzig, where the revolution began with a series of mass demonstrations, and of course Berlin. The eastern part was the capital of the GDR, the western part enclosed by the Berlin Wall. A visit to Eisenhüttenstadt is also fascinating; it was planned as a model socialist city. The once fortified inner-German border has since been replaced with peaceful nature reserves.

**564842 005**

### Tourist Trails – Following Popular Themed Routes

Germany has more than 150 special vacation routes. It's a good way to gain a more profound understanding of a particular subject or region. The Castle Road, for example, runs past magnificent palaces and castles, some dating back to the Middle Ages. This edition also features the German Wine Route, the Coal, Steam and Light industrial trail, the European Route of Brick Gothic Architecture, and the German Alpine Road.

### Wintertime – Snowscapes, Winter Sports and Christmas

Winter holidaymakers flock to the many ski resorts in the mountainous regions of Germany. One of the most popular destinations is the Zugspitze, the country's highest peak. Another seasonal highlight is a visit to one of the many Christmas markets, such as the Striezelmarkt in Dresden. A region with a distinctive traditional flavor is the Erzgebirge, where craftspeople have been making toys and Christmas decorations for many generations.

The three-part documentary series *Transoceânica – The World's Longest Bus Journey* takes the viewer through the heart of South America. The series follows a bus that travels from Rio de Janeiro to Lima. The bus trip lasts six days and covers a distance of 6,300 kilometers – a journey of superlatives. A voyage filled with contrast: from the Atlantic, it leads initially through a savannah landscape, then through the Earth's largest area of wetland, the Amazon jungle, and finally up to the Andes and the Pacific on the western side of the mountain range. The road movie affords the viewer a glimpse into the soul of South America. It shows the beauty of its nature and the pride of its people, but also some of the negatives: environmental pollution, poverty and crime.

The Rhine is one of Europe's great rivers, and has long been bound up with myth and mystery. Majestic and romantic, scenic and legendary are just some of the adjectives used to describe it. The French writer Victor Hugo called it a "noble river". And the English landscape painter William Turner captured the essence of the romantic Rhine.

No other river in Germany is so steeped in legend. For example, it is said that the Nibelung treasure lies on the riverbed near the town of Worms. Further north, the beautiful Lorelei would bewitch hapless sailors with her song and cause them to capsize their boats. The rock that bears her name is visited by tourists from all over the world.

The Rhine not only has its place in myths and legends, songs and poems, it also plays a political and economic role. Whereas it used to serve as a dividing line between "arch enemies" Germany and France, today it unites the two neighbors now perceived as the motor driving European unity. The river serves as a key transport route between the industrial cities along its course and the North Sea. Its banks are strewn with romantic towns and villages drawing tourists with their quaint alleys, picturesque half-timbered houses and countless pubs selling local wines and beers. Another attraction are the region's many castles, formerly customs posts that brought their owners great wealth and now elegant restaurants and hotels.

## The Bayern Munich Phenomenon

484890  
Documentary,  
60 min., 2018, HD

Arabic, English,  
German, Spanish

WW, IFE

A 1:0 victory by Bayern Munich over Glasgow Rangers in the 1967 European Cup Winner's Cup final suddenly puts the West German club on the international soccer map. Striker Franz Roth recalls: "The ball came so high over me, the goalkeeper came towards me and at the moment when the defender almost brought me down, I tried to lift the ball over the goalie. He couldn't get to it and the ball went in under the bar. That was the goal. Fantastic! I kept the trophy overnight on my bedside table and stared at it. All night long..."

In the years that followed, Bayern Munich rapidly grew from erstwhile regional club to one of the most successful and best-known global soccer brands. Not least due to some 60 national and international titles and international star players, Bayern Munich's current membership stands at almost 300,000. Then there are about 4,300 fanclubs and millions of fans all over the world. "What makes this club so special, isn't winning the Champions League, it's not the titles, it's the inclusive team concept with the fans," says Raffael, a fan from Puerto Rico.

But at the same time, few clubs manage to polarize opinion in the soccer world like Bayern, a club you either hate or love. Real Madrid once branded it "La Bestia Negra", a black beast that cannot be vanquished. Jaime Carrasco, a sports reporter for El Mundo says: "There are in the world only two or three teams that have maintained such a continuous will to win over the years. Perhaps Barcelona and Madrid – and definitely FC Bayern."

Philipp Lahm spent more than two decades "asserting myself in the FC Bayern shark pool", an effort that eventually earned him the captain's shirt. Why can so few players resist the call from Munich? And how was a club with such strong southern German roots able to develop such global appeal?

Club President Uli Hoeness says FC Bayern is "for many people something akin to a homeland, a substitute family". Players, coaches and fans from all over the globe explain the global "Bayern Munich Phenomenon". The film provides insights into the Bavarian club, its traditions, the way it sees itself, and its visions for the future.

## Need to Compete

Fun and excitement – this is what we expect from games and contests. Whether it's about sport, dexterity or artistic talent – the pleasure is common to almost all the world's cultures.

Many contests are based on ancient traditions, others are of more recent provenance. But for all their differences, they have one thing in common: they bring people together. Alongside our urge to play, they also fulfill our Need to Compete.

### **Betting on Insects – Cricket Fighting in China**

Cricket fighting is a traditional Chinese pastime that dates back more than a thousand years. Male field crickets from a small area in the northeast of China are said to be the most combative. The insects are sold at street markets all over the country, and prize fighters can cost up to a thousand Euros. The battles take place in small transparent boxes. Spectators place bets and, nowadays, can follow the action on a large screen. The cricket that throws its opponent out of the ring three times is declared the winner.

### **Fireworks for the Gods – Rocket Festivals in Thailand**

People living in Isaan province in northeast Thailand gather every year to celebrate the Bun Bang Fai festival: huge homemade rockets are fired into the sky to impress the gods. In return, it is hoped the gods will then start the rainy season, which is crucial for the harvest. Festival participants spare no effort or cost in making their brightly decorated rockets, some of them more than five meters long. People believe that the owner of the highest-flying rocket can be certain of winning the gods' favor.

## The Power of Sports

Sport is the world's most popular leisure pursuit, quite apart from major competitions and international leagues. But sport is also much more: It has the ability to connect and inspire people regardless of their age, social status and background. The Power of Sports observes those who seek passion, concentration, team spirit, competition and recognition through sport – people who have succumbed to its fascination.

## Chasing the Rush

You do have to be just a little bit crazy to do this kind of thing: Extreme sportsmen and women are not content with regular challenges. They need to push themselves to the limits of their physical and mental capacity, and sometimes even beyond those limits. The pains and strains, the dangers and fears that would deter most mere mortals, serve only to spur them on and provide them with the incentive to continue. For them, the greatest satisfaction comes once the challenge is over, when they are able to say: "I did it."

### **Northern Islands, Rowdy Games**

Every Christmas and New Year, the capital of the Scottish Orkney Islands hosts a game that could, with a little goodwill and flexibility, be called "mass football". The aim of the opponents from the south and north of Kirkwall – the "Uppies" and the "Doonies" – is to get the ball into their own goal. It is a process that involves a lot of pushing, shoving and general uncoordinated battling. Rules are as non-existent as team colors. The pitch is the entire town. It can be hours before a winner is decided – but victory is also possible within just a few minutes.

**Hooked on Adrenaline**

What is it that drives adrenaline junkies to take ever greater risks? Psychologists, researchers and emergency medics have no clear answer to that question. Some people, they say, seek out risk to compensate for their monotonous everyday lives. Others use it to escape the fact that their biographies are somewhat lacking. One thing is certain: When some people seek out a challenge, then it has to be an extreme one.

Sports history tells us that soccer originated in England. But a form of the game was played in China some 2,300 years ago in the city of Linzi, the capital of the kingdom of Qi. The winners were awarded prizes, while the losers were flogged. Other versions of what we call football are associated with Egypt, Greece, the Roman Empire, and France. But it was in England in 1863 that the Football Association was founded which drew up the first rules of the game as we know it today.

From England the sport spread throughout the world. International matches and Olympic tournaments first made soccer popular in Europe. Then, in the 1920s the game also conquered Latin America.

The first World Cup tournament was held in Uruguay in 1930. In the final in Montevideo, the host nation defeated Argentina. The next two tournaments, 1934 and 1938, were won by Italy. In 1938 Indonesia became the first Asian nation to qualify for the World Cup finals. The 1950 tournament in Brazil saw Uruguay emerge as champions for the second time. Four years later the sensational winners in the Swiss capital, Berne, were West Germany who surprisingly defeated the hot favorites, the Magical Magyars from Hungary. In Sweden in 1958 a young man called Pelé burst on to the scene and helped Brazil become world champions for the first time.

#### 464671 002

Brazil retained their crown in Chile in 1962. Four years later, just over a century after the Football Association was founded, the tournament was held for the first time in England.

The group matches provided a sensation as North Korea knocked out one of the favorites, Italy. The final between England and West Germany was a thriller with England emerging victors by four goals to two, although one of their goals was highly controversial. In the years that followed, African and Asian teams made tremendous advances. With superstar Pelé in the side, in Mexico in 1970 Brazil became world champions for the third time. Four years later the tenth World Cup tournament was held in West Germany. In the final the host nation defeated the much-fancied Dutch by two goals to one.

32 years later, Germany once again played host to a World Cup tournament – and it was one to remember. The weather was glorious, the games exciting and the atmosphere amongst the fans friendly and relaxed. Italy secured its fourth World Cup title, while the German team thrilled the host nation by reaching the semi-final. But no sooner is one World Cup over, than preparations for the next begin.

## Motoring Legends

The Mercedes 300 SL was technically superb, the Jeep is the mother of all SUVs, and the Citroën DS was and still is simply wonderful. Such vehicles are icons of the zeitgeist that prevailed when they were built. They also exert an influence on contemporary design – because they stand out from the crowd, have character and a story to tell. Some are admired or even adored by all – designers, engineers, vintage car fans and neutral observers alike – as vehicles of legendary status.

**Edward Elgar's "Land of Hope and Glory"**

"Land of Hope and Glory" is the most popular British hymn and the best-known work of the British composer Edward Elgar. Whether played in the concert hall or the soccer stadium, the music is recognizable to everyone after just a few notes. To this day, the piece serves as England's unofficial national anthem – a song used to celebrate a nation, but also to take it into war. When Elgar realized just how much his work had become associated with death and suffering, he withdrew from public life and ceased composing, devoting himself solely to observation of the natural world. Nevertheless, he will always be remembered for this hymn above all else.

**Sergei Prokofiev's "Peter and the Wolf"**

The musical fairytale "Peter and the Wolf" is the best-known work by Russian composer Sergei Prokofiev. But without the Moscow theater director Natalya Sats, he would never have written it at all. It was her idea to commission a piece that would tell children an engaging story while introducing them to the sounds of different instruments. It premiered in 1936. The following year Sats was arrested by the Soviet secret police and taken to a labor camp. The circumstances of her arrest remain a mystery to this day.

## Spotlight On

Pieces of music that remain etched on the memory have been written throughout time. Even though the concept of "hits" did not yet exist in the Baroque, Classical or Romantic era when they were composed. And often, they are just as popular today – if not more popular. What is it about these works that has made them so famous? What makes them so fascinating? When, where and how were they created? Who composed them? What motivated the composer to write this particular piece? How difficult or easy are they to sing or play? Where were they usually played in the past, and where are you most likely to hear them today?

We shine a Spotlight On incomparable pieces of music. As well as playing excerpts of the music in question, we visit key locations in the creation process and provide an insight into the life and work of the composer.

**Ludwig van Beethoven's "Für Elise"**

"Für Elise" by Ludwig van Beethoven is one of the best-known pieces of piano music ever written. A catchy tune attempted by most students of the instrument, it's also one that virtuoso pianists like to perform as an encore. Beethoven started to work on the piece in 1808 but the score was not published until four decades after his death in 1827. It soon became very popular as more and more pianos were sold all over the world. A pop version by the French pianist Richard Clayderman became an international hit in the 1970s. The identity of the mysterious Elise named in the title has eluded scholars for two centuries.

**Gustav Mahler's Symphony No. 2**

Gustav Mahler's Symphony No. 2, also known as the Resurrection Symphony, has exerted a powerful fascination since its premiere. On the one hand, because the work shattered all the temporal and spatial conventions of the time. More than 90 minutes long, it requires more than 150 musicians – orchestral, choral and solo voices. Another factor is that in this symphony, Mahler attempts to answer one of humankind's most pressing existential questions: What is the point of life? Already a famous conductor at the time of the premiere, Mahler achieved his breakthrough as a composer with this work.

#### Baroque Star George Frideric Handel

George Frideric Handel is a giant among Baroque composers. The three years he spent in Italy as a young man were formative. Rome was the inspiration for ideas that would stay with him throughout his life and result in new compositions time and again. In Venice, he was so popular the locals called him “the dear Saxon”. He became a celebrity in London, where he was honored with a life-size statue during his lifetime. Despite his dizzying success, he never lost his sense of social responsibility.

#### Mendelssohn the Classical Romantic

Felix Mendelssohn is one of the stand-out musicians of the Romantic period. As a young composer, conductor, pianist and organist, he toured numerous countries to great acclaim. His fan base was especially large and enthusiastic in Italy and England. But 50 years after his death, he fell out of favor. Critics described his music as pleasing and elegant, but lacking in depth. Mendelssohn wasn’t rediscovered until the first half of the 20th century. Today he is among the most popular of the European greats.

#### The Art of Chopin

Frédéric Chopin, as the French call him, or Fryderyk Chopin, as he is known in Poland, is one of the most influential and popular pianists and composers of all time. He was raised in Warsaw as the son of a Polish mother and a French father, but moved to Paris at the age of 21. He soon strayed from well-worn compositional paths to develop his own style. His romantic-poetic piano artistry influenced generations of composers. Although many of his works sound straightforward and accessible, they are very difficult to play and represent a huge challenge for any pianist.

#### Richard Strauss and His Heroines

Richard Strauss was one of the leading exponents of the program music of the late 19th century and wrote some of the great operas of the 20th century. He expanded the scope and timbre palette of the orchestra. Women played a key role in his life and work, first and foremost his wife Pauline de Ahna, to whom he was married for more than 55 years. She gave up her career as an opera singer for him, and supported him throughout his life. She inspired Strauss to write some of his most beautiful and ethereal songs.

**Joseph Haydn – Music for Prince and People**

Joseph Haydn is one of three key composers - alongside Mozart and Beethoven - who made up the First Viennese School of western classical music. He's considered the father of the classical symphony and string quartet and an innovator in the composition of piano sonatas and piano trios. Although he was an employee of the wealthy Hungarian Esterházy family for most of his life, he was a master at pursuing his own interests. As a composer, he aimed to write music to please everyone - from his aristocratic patrons to "regular people".

**Ignaz Joseph Pleyel – Global Career as Composer and Piano Builder**

At times, his music was as popular as Haydn's. But that popularity didn't last, and his work faded into obscurity during his lifetime. Ignaz Joseph Pleyel was a student of Haydn and revered his teacher, just as Mozart had done. The latter, in turn, had high praise for Pleyel's string quartets. But Pleyel wasn't just a successful composer, he also made a name for himself as a piano builder. In the 19th century, grand pianos made by Pleyel were regarded as the best in the world.

**Heinrich Schütz – Giant of the 17th Century**

Heinrich Schütz is regarded as the most important German composer of the Early Baroque. He wrote a huge volume of sacred music, some to Latin but most to German texts. This music was destined for church services at the court of the Elector of Saxony, whom Schütz served as court conductor. But as a sideline, he also composed music to entertain his employer and the royal household. Even during his lifetime, Schütz was revered as the "father of our modern music".

**Michael Nyman – Avant-garde Minimalism**

British composer Michael Nyman is best known for his film music. His biggest success was with the soundtrack to the movie *The Piano*. Because he rejected contemporary atonal music, he gave up composing in the 1960s and turned to music criticism. An encounter with Steve Reich led him back to composition. US composer Reich is a pioneer of a musical style that Nyman was the first to call "minimalism". Music written in this style consists of just a few melodies, rhythms and harmonies that are then perpetually repeated. Michael Nyman is undoubtedly the most important British exponent of minimal music.

**Krzysztof Penderecki – Music without Concessions**

The Polish composer and conductor Krzysztof Penderecki is one of the most-performed composers of the modern age. He was always a thorn in the side of the authorities, someone who always refused to toe the line and wrote music that ruffled the feathers of those who happened to be in charge at the time. Penderecki grants no freedom at all to interpreters of his compositions. He has very precise ideas about how he wants his music to be played and makes no concessions on this point.

Beethoven wrote the most famous sequence of notes in Western music history: the first four notes of his Fifth Symphony. But, tragically, he could not hear the wonderful music he created because he was deaf.

The work of Ludwig van Beethoven, who was born in Bonn in 1770 and died in Vienna in 1827, brought the Viennese School to its stylistic zenith, and thereby served as a bridge between Classicism and Romanticism.

For much of his life Beethoven suffered from various illnesses and was often in great pain.

He died at the age of 56. For decades, researchers have tried to reconstruct the progression of his illnesses and seek clues as to the cause of his death.

Analysis of strands of his hair by scientists in the US suggests Beethoven died from lead poisoning. That might also explain his deafness, mood swings and angry outbursts. But it is not clear why he should have been exposed to a lot of lead.

There are also questions about the history of the lock of hair that was brought to the US for analysis. One day after Beethoven died, his friend the pianist and composer Johann Nepomuk Hummel visited his apartment to bid him farewell. Beethoven's body was laid out in his coffin. Hummel was accompanied by a young student of his named Ferdinand Hiller, who cut off the lock of hair as a memento. It was kept by the Hiller family and passed on as an heirloom through the generations. The lock came into the possession of a doctor in a small town in Nazi-occupied Denmark. Who gave him the hair? Why? Nobody knows. Half a century later, in 1994, his daughter sold it at Sotheby's in London. The two Americans who acquired it commissioned the forensic analysis, which found the level of lead in Beethoven's hair to be 100 times higher than normal.

## Masters of Classical Music

Music is a language of emotions that needs no words and is understood by everyone. The poet Rainer Maria Rilke called it “language where languages end”, and the violinist Yehudi Menuhin once said: “Music speaks for itself – if we give it a chance.”

In the series Masters of Classical Music, European music from all periods is given a chance: From Baroque and Rococo to Classical and Romantic and beyond. The music is interpreted by outstanding orchestras and soloists from all over the world. Conductors include such eminent artists as Claudio Abbado, Daniel Barenboim, Pierre Boulez and Sir Simon Rattle.

Every summer DJs like Felix Jaehn and Alle Farben clock up more air miles than some airline pilots, conquering the international charts from their laptops. They produce hit songs, and have made German-style Deep House popular in Australia, Japan and the US.

We accompany Alle Farben, Felix Jaehn and Trance pioneer Paul van Dyk to some gigs. Jaehn performs at Summer Sound in Latvia, the biggest festival in the Baltic region. Frans Zimmer aka Alle Farben has to contend with torrential rain and a power outage at the Parookaville festival in Germany. And at a rave in San Francisco Paul van Dyk tells us why he keeps performing in the aftermath of a near-fatal accident during a concert.

They each attained fame and fortune in their twenties. What drives them on? The three DJs tell us about their different views on music, success and the music business. It's a scene in which nobody becomes a star 'just like that'. Their life is not all glamour and glory. It is also very tough; it takes hard work and self-discipline. It means late nights and long periods far from home, spending the summers traveling from festival to festival.

## Musica Maestra: With Alondra de la Parra

It's still rare to see a woman conducting an orchestra. But female conductors do exist – and one of them is Alondra de la Parra. Although the Mexican maestra is not yet 40, she's already conducted some of the best orchestras in the world. Since 2017, she's been Music Director of the Queensland Symphony Orchestra in Australia. As well as the standard classical repertoire, she believes it is important to familiarize audiences with the work of South American composers. To this end, she's even founded her own orchestra. Alondra de la Parra also doesn't shy away from cooperation with pop and rock musicians. In the series Musica Maestra she introduces some of the artists she has performed with in the concert hall or on stage.

## Schumann at Pier2

The German Philharmonic Chamber Orchestra Bremen and its conductor Paavo Järvi dust off the symphonies of Robert Schumann and present them in a new light. They offer a refreshing take on the work of one of the greatest composers of the Romantic era.

“After performing all of Schumann’s symphonies you get a sense that what you learned about him at school was simply wrong. Robert Schumann’s symphonic music is amazing. If you’re brave enough to look beyond tradition and focus solely on the music, you’ll see just how impressive it is.” The project Schumann at Pier2 consists of two elements: a concert film and a recording of Schumann’s four symphonies.

The concert film Schumann at Pier2 offers a new and unconventional encounter with Schumann’s symphonic oeuvre. The film stars the US-Estonian conductor Paavo Järvi and the German Philharmonic Chamber Orchestra Bremen. The setting is Pier2, a former shipyard in Bremen harbor. Usually a venue for rock and pop concerts, on this occasion it hosts performances of Schumann’s symphonies for a young audience.

The film observes the orchestra during rehearsals and presents elaborately recorded performances. Paavo Järvi explains key sections of the symphonies and talks about Schumann’s life. Studio-takes show members of the orchestra playing selected passages from the symphonies and talking about what makes them so special.

Schumann at Pier2 combines these various filmic elements – concerts, rehearsals and studio recordings – into an entertaining, informative and fascinating musical experience.

### Wintry Dreams and Christmas Melodies

#### 664705

Festive music to celebrate Christmas. On the programme: Arcangelo Corelli's "Christmas Concerto" played by the Baden-Baden Philharmonic, as well as traditional songs and other seasonal melodies. Concert venues include the Kurhaus Baden-Baden, castles, museums, churches and abbeys in southwestern Germany. The centrepiece is the famous "Christmas Concerto", a work that is easily as well known as Antonio Vivaldi's "Four Seasons" these days. It has an especially rich structure, with regard to movement progression, dynamics and melodic structure.

Aggressive sections alternate with wistfully pastoral parts, painfully dissonant movements with calm and peaceful ones; very fast, almost hurried sections are abruptly interspersed with measured passages that almost appear to be grinding to a halt. An intense musical game of questions and answers serves to draw all these divergent, contrasting elements together, and despite the ornamentation and virtuoso coloratura passages, the exceptionally soulful dominant violin melody comes very close to part writing for the human voice. The closing 5th movement leads into the famous Pastorale: in a major key, instead of an austere minor key, and in a tranquil, restrained manner, this comforting pastoral music ambles by: in a rocking gait, with cantilenas in thirds and sixths and a pianissimo as subtle as the beat of angels' wings – as the piece draws to a close. **Live music, 30 min.**, 2008, SD; LR

Christmas concert with Korean soprano Sumi Jo, the Vokal Ensemble Köln, and the Capella Coloniensis conducted by Michael Schneider from St. Maria im Kapitol, Cologne. From baroque to classical with an excursion into the romantic: this Christmas concert covers a broad range. In addition to famous Christmas carols such as “Fröhlich soll mein Herze springen”, the programme includes the Christmas cantata “Fürchtet Euch nicht!” by Christoph Bernhard, Alessandro Scarlatti’s coloratura-rich Italian pendant, and Adolphe Adam’s celebrated Christmas carol “Cantique de Noel” which has been translated into many languages and is known in English as “O Holy Night”.

Wolfgang Amadeus Mozart is represented with the motet “Exsultate, jubilate”, KV 165. The Christmas spirit is maintained by Japanese virtuoso Hiro Kurosaki with Vivaldi’s violin concerto RV 270 in E major “Il riposo – per il Natale”. The highlight of the Christmas concert is the original version of “Stille Nacht, Heilige Nacht” composed in 1836 by Franz Xaver Gruber for flute, clarinets, horns, bassoon, strings, organ, soprano and baritone solo voices, and choir.
